Begin at the beginning and go on from there. Programming Windows 10 (PW10) will use the second method to teach. This method makes learning faster and here's why. Read Entire Fish Encyclopedia The first method is similar to reading the entire Fish Encyclopedia so you can know how to catch a fish. Sure, there's a lot of information in the encyclopedia that may be helpful, but perhaps you first want to decide if you even like fishing. Start Fishing The second method gets you fishing so you can feel what it's like to collect bait, put the bait on a hook, cast your line, wait, not catch a fish, and finally (hopefully) catch a fish. There Are Things You Won't Know Using the second method, there are a lot of things that you won't know as you fish. But, those things only matter if you decide to continue fishing. So, as long as you feel comfortable not knowing some things at first, you will like the way this book teaches Windows programming. Try It, Learn It In this book we try it and then we learn it. We build it first and see it work and then we figure out how it works and why it behaves the way it does. Which Is More Memorable? The try it learn it method is more fun and ends up being more memorable too. Which do you think you would remember more? Reading the Encyclopedia of Fish Going on a fishing trip. Right. Going on the fishing trip is a whole lot more fun, a better way to learn and more memorable.What Is the Focus of Programming Windows 10?My focus here is on creating UWAs (Universal Windows Apps) with a focus on creating apps for the Windows 10 desktop. Yes, the dream is to develop an app and deploy it to any type of device (PC, laptop, pad (Surface), phone or whatever). However, the focus here in this book is creating desktop apps that will keep those other platforms in mind but not focus directly on them.
