Econometric Models of Asian-Pacific Countries Shinichi Ichimura, Yasumi Matsumoto, 2012-12-06 This book is a sequel to our first report of ASIAN LINK PROJECT in 1985: *Econometric Models of Asian LINK*, Springer-Verlag, Tokyo - Berlin - New York. Now the scope is expanded to Asian-Pacific Countries in coverage, so that this monograph presents the econometric models of Japan, the United States, Canada, China, Korea, Taiwan, Hong Kong, Thailand, the Philippines, Malaysia, Singapore, Indonesia, Australia and the European Community. We are particularly happy to have included the excellent models of Australia and Canada whose economies are essential parts of the Asian-Pacific Economic Community. Most of those models were presented at the Workshop of Asian Link Project held in Bandung, Indonesia at the time of the Second Convention of the East Asian Economic Association, 1990. Those models have been up-dated since then, and several other important models were added. Unlike our previous book, we have not tried here to link these national models as a regional or global model in any way, except for the model by S. Kinoshita which offers a regional linkage for Pacific-basin economies by linking the US, Japan, Canada, the European Community countries as a group, Asian NIEs (Korea, Hong Kong, Taiwan), ASEAN (Indonesia, Malaysia, the Philippines, Singapore) and East Asian economies. As we argued in our previous publication, we tried to publish these econometric models again with the statistical data as much as we could, so as to enable the reader examine the estimation and performance of the models by himself.
