Revisiting Targeting in Social Assistance Margaret
Grosh,Phillippe Leite,Matthew Wai-Poi,Emil Tesliuc,2022-06-14
Targeting is a commonly used, but much debated, policy tool
within global social assistance practice. Revisiting Targeting in
Social Assistance: A New Look at Old Dilemmas examines the well-
known dilemmas in light of the growing body of experience, new
implementation capacities, and the potential to bring new data
and data science to bear. The book begins by considering why or
whether or how narrowly or broadly to target different parts of
social assistance and updates the global empirics around the
outcomes and costs of targeting. It illustrates the choices that
must be made in moving from an abstract vision to implementable
definitions and procedures, and in deciding how the choices should
be informed by values, empirics, and context. The importance of
delivery systems and processes to distributional outcomes are
emphasized, and many facets with room for improvement are
discussed. The book also explores the choices between targeting
methods and how differences in purposes and contexts shape
those. The know-how with respect to the data and inference used
by the different household-specific targeting methods is
summarized and comprehensively updated, including a focus on
“big data” and machine learning. A primer on measurement
issues is included. Key findings include the following: · Targeting
selected categories, families, or individuals plays a valuable role
within the framework of universal social protection. · Measuring
the accuracy and cost of targeting can be done in many ways, and
judicious choices require a range of metrics. · Weighing the
relatively low costs of targeting against the potential gains is

important. · Implementing inclusive delivery systems is critical for reducing errors of exclusion and inclusion. · Selecting and customizing the appropriate targeting method depends on purpose and context; there is no method preferred in all circumstances. · Leveraging advances in technology—ICT, big data, artificial intelligence, machine learning—can improve targeting accuracy, but they are not a panacea; better data matters more than sophistication in inference. · Targeting social protection should be a dynamic process.

The Changing Wealth of Nations 2018 Glenn-Marie Lange, Quentin Wodon, Kevin Carey, 2018-01-30 Countries regularly track gross domestic product (GDP) as an indicator of their economic progress, but not wealth—the assets such as infrastructure, forests, minerals, and human capital that produce GDP. In contrast, corporations routinely report on both their income and assets to assess their economic health and prospects for the future. Wealth accounts allow countries to take stock of their assets to monitor the sustainability of development, an urgent concern today for all countries. The Changing Wealth of Nations 2018: Building a Sustainable Future covers national wealth for 141 countries over 20 years (1995†“2014) as the sum of produced capital, 19 types of natural capital, net foreign assets, and human capital overall as well as by gender and type of employment. Great progress has been made in estimating wealth since the fi rst volume, *Where Is the Wealth of Nations? Measuring Capital for the 21st Century*, was published in 2006. New data substantially improve estimates of natural capital, and, for the fi rst time, human capital is measured by using household surveys to estimate lifetime earnings. The Changing Wealth of Nations 2018 begins with a review of global and regional trends in wealth over the past two decades and provides examples of how wealth accounts can be used for the analysis of development patterns. Several chapters discuss the new work on human capital and its application in development policy. The book then tackles elements

of natural capital that are not yet fully incorporated in the wealth accounts: air pollution, marine fisheries, and ecosystems. This book targets policy makers but will engage anyone committed to building a sustainable future for the planet.

Expectations and Aspirations Safaa El Tayeb El-Kogali, Caroline Krafft, 2019-10-21 Education, which has been at the heart of the Middle East and North Africa (MENA) region's history and civilizations for centuries, has a large untapped potential to contribute to human capital, well-being, and wealth. The region has invested heavily in education for decades, but it has not been able to reap the benefits of its investments. Despite a series of reforms, MENA has remained stuck in a low-learning, low-skills level. *Expectations and Aspirations: A New Framework for Education in the Middle East and North Africa* identifies four key sets of tensions that are holding back education in the region: credentials and skills, discipline and inquiry, control and autonomy, and tradition and modernity. These tensions are shaped by society and are reflected in classrooms. If they are not addressed, MENA will continue to operate at a level below its potential. This report outlines a new framework with a three-pronged approach that can help address these tensions and unleash the potential of education in MENA: • A concerted push for learning that starts early for all children regardless of background, with qualified and motivated educators, and that leverages technology, uses modern approaches, and monitors learning outcomes • A stronger pull for skills by all stakeholders in the labor market and society that involves coordinated multisystem reforms within and beyond the education system • A new pact for education at the national level with a unified vision, shared responsibilities, and accountabilities. Education is not just the responsibility of the education system—it is everyone's business. The push, pull, and pact framework offers an opportunity for MENA to move forward to reclaim its heritage of a learned region and to

meet the expectations and aspirations of its people. The current situation in MENA requires a renewed focus on education, not just as a national priority for economic growth and social development, but as a national emergency for stability, peace, and prosperity.

Routledge Handbook of Environmental Displacement and Migration Robert McLeman, François Gemenne, 2018-03-09 The last twenty years have seen a rapid increase in scholarly activity and publications dedicated to environmental migration and displacement, and the field has now reached a point in terms of profile, complexity, and sheer volume of reporting that a general review and assessment of existing knowledge and future research priorities is warranted. So far, such a product does not exist. The Routledge Handbook of Environmental Displacement and Migration provides a state-of-the-science review of research on how environmental variability and change influence current and future global migration patterns and, in some instances, trigger large-scale population displacements. Drawing together contributions from leading researchers in the field, this compendium will become a go-to guide for established and newly interested scholars, for government and policymaking entities, and for students and their instructors. It explains theoretical, conceptual, and empirical developments that have been made in recent years; describes their origins and connections to broader topics including migration research, development studies, and international public policy and law; and highlights emerging areas where new and/or additional research and reflection are warranted. The structure and the nature of the book allow the reader to quickly find a concise review relevant to conducting research or developing policy on particular topics, and to obtain a broad, reliable survey of what is presently known about the subject.

The Urban Rail Development Handbook Daniel Pulido, Georges Darido, Ramon Munoz-Raskin, Joanna

Moody,2018-09-11 Cities across the globe are looking to develop affordable, environmentally friendly, and socially responsible transportation solutions that can meet the accessibility needs of expanding metropolitan populations and support future economic and urban development. When appropriately planned and properly implemented as part of a larger public transportation network, urban rail systems can provide rapid mobility and vital access to city centers from surrounding districts. High-performing urban rail services, when carefully approached as development projects, can help enhance quality of life by giving citizens access to employment opportunities, essential services, urban amenities, and neighboring communities. The purpose of this Handbook is to synthesize and disseminate knowledge to inform the planning, implementation, and operations of urban rail projects with a view towards: -- Emphasizing the need for early studies and project planning; -- Making projects more sustainable (economically, socially, and environmentally); -- Improving socioeconomic returns and access to opportunities for users; -- Maximizing the value of private participation, where appropriate; and -- Building capacity within project implementing and managing institutions This Handbook provides experiential advice to tackle the technical, institutional, and financial challenges faced by decision makers considering urban rail projects. It brings together the expertise of World Bank staff and the input of numerous specialists to synthesize international 'good practices' and recommendations that are independent of commercial, financial political, or other interests. The material presented is intended as an honest-broker guide to maximize the impact and manage the challenges of urban rail systems in cities in both developed and developing countries. Rather than identify a single approach, this Handbook acknowledges the complexities and context necessary when approaching an urban rail development by helping to prepare decision makers to ask the right questions, consider the key issues, perform the necessary studies, apply adequate tools, and

learn from international good practice all at the right time in the project development process.
