Graffiti a New York Andrea Nelli, 2012 In 1973, graffiti ran rampant in NYC, reaching its peak that summer. The work of black writers from the Bronx like SUPER COOL 223, RIFF 70 (WORM/CASH), and PHASE 2 defined the art which the kids called Top-to- Bottom or T-to-B, as it vertically covered a full subway car. Some T-to-B pieces were so elaborate and complex that the NYT hypothesized that they were a collaboration between professional artists and the graffiti writers. Here are photos from that heady era.

Mr. Worry Holly L. Niner, 2003-01-01 Kevin can't get to sleep at night until he does many things. He straightens his chair and the books on his desk. He asks his mother questions he already knows the answers to. He checks under his bed for a light he knows isn't there, and then, a minute later, he checks again. Kevin knows these actions don't make sense; he wants to stop, but the worry thoughts keep coming. When his parents realize that Kevin has too many worries, they take him to talk to a therapist. She tells Kevin and his parents that Kevin has a condition called obsessive-compulsive disorder (OCD) and that, more importantly, he can be helped.

**Predicasts F & S Index Europe Annual**, 1991

**Revok**, 2014 Revok is undoubtedly one of the most renowned graffiti writers on the planet. Although he's originally from Los Angeles and has travelled the world over, in his adopted home of Detroit, this gifted artist has found grist for an entirely new form. This newer body of work is comprised of found materials from abandoned buildings throughout Detroit. These colourfully textured 3D collages are highly sought after by collectors and fully documented in the book.

**Aquaculture Water Reuse Systems: Engineering Design and Management** M.B. Timmons, T.M. Losordo, 1994-10-25 The demand for high quality aquacultured products and an increasing concern for resource conservation has led individuals and large corporations to invest time and money in commercial scale recirculating production systems. However, there are relatively few reports of profitable recirculating production systems in operation. There is little doubt that most fish reared in ponds, floating net pens, or raceways can be produced in commercial scale recirculating systems. The objective of this book is to provide basic information and analytical skills for the reader so that they may make the proper design or investment decisions concerning water reuse and recycle systems. The chapters of this book are sequenced to provide continuity to a basic approach that would be used in designing a water reuse or recycle system. The chapter authors contributing to this book have written extensively in the literature already on the particular subject being addressed in their chapter. Considerable background information on the basic processes being presented is also given in each chapter to supplement the basic design information being provided. These chapters should provide the reader with essentially all the information required in order to design and manage a water reuse system. The book is written for engineers and biologists working in the area of intensive fish culture. The text should also prove useful as a design manual for practising aquaculturists and as a resource of current state-of-the-art methodologies associated with water reuse systems.
