**Kinship in the Admiralty Islands** Daniel Elazar,2018-01-16 The Manus of New Guinea's Pere village were Margaret Mead's most favored community, the people to whom she returned five times before she died in 1978. Kinship in the Admiralty Islands is the classic and only thorough description of their complex rules of marriage and family relations. It draws on Mead's 1928-1929 field work, conducted with her second husband, New Zealander Reo Fortune, and benefits by her being able to cross-check her data with his. Written in 1931, Kinship followed Mead's first and very popular book on the Manus, *Growing Up in New Guinea*, which was criticized by other anthropologists for being too general in scope. In Kinship Mead succeeded in demonstrating her thorough knowledge of this Melanesian group in the specific terms prized by her scholarly colleagues, while also describing in depth Manus social structure. Kinship in the Admiralty Islands describes an intricate system of social restraints and kinship ties and their impact on the local economy. The Manus' predilection for adoption, for example, allows surrogate fathers to make extended marriage payments, while in the next generation their adopted sons will take on the same responsibility for other young men in the new kin network. Mead reviews other kinship rules, such as avoidance behavior between in-laws of the opposite sex, early betrothals, other forms of adoption, and a range of deference behavior and joking relations among kin. In this work, Mead walks a fine line between functionalist kinship analysis of the British school of Radcliffe Brown and the cultural-and-personality orientation of Americans in the school of Franz Boas. Jeanne Guillemin's new introduction provides a lively in depth description of Margaret Mead's career in the early days of anthropology, the sometimes negative reactions of her contemporaries to her work, and her reasons for writing Kinship in the Admiralty Islands, as well as Mead's later reactions to how her Manus entered the modern world. Margaret Mead was noted for directing her writings to both scholar and laymen alike. Kinship in the Admiralty Islands will be of interest to anthropologists and general readers interested in the peoples of the South Pacific. Margaret Mead was curator of ethnology of the American Museum of Natural History. She was the author of many books including *Continuities in Cultural Evolution* (available from Transaction), *The Study of Culture at a Distance*, *The Mountain of Arapesh*, and *From the South Seas: Studies of Adolescence and Sex in Primitive Societies*. Jeanne Guillemin is a professor of anthropology at Boston College and editor of *Anthropological Realities: Readings in the Science of Culture*, also available from Transaction.

*Island Voices* John Charles Kennedy,2006 Like their counterparts in developing countries, rural people living on the periphery of developed nations are increasingly vulnerable to forces beyond their control. Farmers, miners, and fishermen must cope with periodic resource scarcities, fluctuating global markets, and neoliberal trade pacts. *Island Voices* explores this struggle through the perspective of people living on Arnøya, an island off northern Norway. John C. Kennedy spent years collecting their stories, each of which offers resounding proof of how change, both local and global, has unevenly benefited the island's four villages.

**On Tycho's Island** John Robert Christianson,2000 This book explores Brahe's wide range of activities which encompass much more than his reputed role of astronomer. Christianson broadens this singular perspective by portraying Brahe as Platonic philosopher, Paracelsian chemist, Ovidian poet, and devoted family man. This pioneering study includes capsule biographies of over 100 men and women, including Johannes Kepler, Willebrord Snel, Willem Blaeu, several bishops and numerous technical specialists all of whom helped shape the culture of the Scientific Revolution. Under Tycho Brahe's leadership, their teamwork achieved breakthroughs in astronomy, scientific method, and research organization that were essential to the birth of modern science.

**Arcane Ocean** Nathan Dudley,2013-08-07 Arcane Ocean is a contemporary fantasy about the return of magic to the modern world. The central premise is that when given the ability to shape reality around us, it is easy to find yourself slipping into darkness. As the first in a larger series about magic returning, the story follows the lives of three friends as they struggle to learn magic's secrets and discover their own unique abilities. Morgan discovers she has the ability to communicate with animals, Kaleb discovers the ability to walk the realm of the dead, and Nick learns about psychic vampirism. Without anyone to guide them, they learn magic's mysteries on their own. Their own recklessness and selfishness are their greatest enemies. Arcane Ocean follows the transformation of ordinary young adults into Sorcerers, Shamans, and Vampires. More perils await them in the second part of the trilogy Arcane Fire, when the government discovers magic, and witness the collapse of society in the conclusion Arcane Armageddon.

**Historical Ecology and Archaeology in the Galápagos Islands** Peter W. Stahl,Fernando J. Astudillo,Ross W. Jamieson,Diego Quiroga,Florencio Delgado,2020-01-20 The Galápagos Islands are one of the world's premiere nature attractions, home to unique ecosystems widely thought to be untouched and pristine. Historical Ecology and Archaeology in the Galápagos Islands reveals that the archipelago is not as isolated as many imagine, examining how centuries of human occupation have transformed its landscape. This book shows that the island chain has been a part of global networks since its discovery in 1535 and traces the changes caused by human colonization. Central to this history is the sugar plantation Hacienda El Progreso on San Cristóbal Island. Here, zooarchaeological and archaeobotanical evidence documents the introduction of exotic species and landscape transformations, and material evidence attests that inhabitants maintained connections to the outside world for consumer goods. Beyond illuminating the human history of the islands, the authors also look at the impact of visitors to Galápagos National Park today, raising questions about tourism's role in biological conservation, preservation, and restoration.
