Cardinalism M. Allais,O. Hagen,2012-12-06 THE CONCEPTION OF THIS VOLUME This volume, Cardinalism, has been initiated by Ole Hagen, and is now published due to his perseverance and to Kluwer Academic Publishers. Because of various activities and duties, my contribution to the general conception of this volume has only been formal, and all the credit for it is due to Ole Hagen. I should also emphasize that the responsibility for the year's delay in the publishing of this volume is entirely mine, for two reasons. First of all, I have been involved in many works in very different fields. Second, the English translation of my 1943 contribution to the concept of cardinal utility took some time. The points of view the reader will find in this volume are often different and sometimes contradictory, but this can only increase the interest of its reading. In any case, this is not the editors' part to side with or against. Thus contributions to this volume are presented as they have been submitted to the editors. Of course, this does not mean that they entirely agree with the analyses presented. MAURICE ALLAIS M. Allais and O. Hagen (eds.), Cardinalism, vii INTRODUCTION Everyone's conscious choices are assumed to reflect their preferences in different situations. For some purposes it serves the theorist's preference for simplicity to assume that a person's life style can be described by the values of some concrete variables, such as quantities of goods available.

How AI Is Transforming the Organization MIT Sloan Management Review,2020-02-18 A clear-eyed look at how AI can complement (rather than eliminate) human jobs, with real-world examples from companies that range from Netflix to Walmart. Descriptions of AI's possible effects on businesses and their employees cycle between utopian hype and alarmist doomsaying. This book from MIT Sloan Management Review avoids both these extremes, providing instead a clear-eyed look at how AI can complement (rather than eliminate) human jobs, with real-world examples from companies that range from Netflix to Walmart. The contributors show that organizations can create business value with AI by cooperating with it rather than relinquishing control to it. The smartest companies know that they don't need AI that mimics humans because they already have access to resources with human capability—actual humans. The book acknowledges the prominent role of such leading technology companies as Facebook, Apple, Amazon, Netflix, and Google in applying AI to their businesses, but it goes beyond the FAANG cohort to look at AI applications in many nontechnology companies, including DHL and Fidelity. The chapters address such topics as retraining workers (who may be more ready for change than their companies are); the importance of motivated and knowledgeable leaders; the danger that AI will entrench less-than-ideal legacy processes; ways that AI could promote gender equality and diversity; AI and the global loneliness epidemic; and the benefits of robot-human collaboration.
