European Retail Research Dirk Morschett,Thomas Foscht,Thomas Rudolph,2011-05-14 The aim of EUROPEAN RETAIL RESEARCH is to publish interesting manuscripts of high quality and innovativeness with a focus on retail researchers, retail lecturers, retail students and retail executives. As it has always been, retail executives are part of the target group and the knowledge transfer between retail research and retail management remains a part of the publication's concept.

**ATP Synthase in Photosynthetic Organisms** ,2020-09-18 Advances in Botanical Research, Volume 96, highlights new advances in the field, with this new volume presenting interesting chapters on the Structure and supramolecular architecture of chloroplast ATP synthase, Chloroplast ATP Synthase from Green Microalgae, Subunit movements in H-ATPases from chloroplasts detected by single molecule FRET, Regulation and control of the chloroplast ATP synthase: mechanisms and impact on maintaining efficient photosynthesis and photoprotection, Regulation machineries of ATP synthase from phototroph, How do we understand the formation of delta-pH in photosynthesis?, Regulation of photosynthesis by cyclic electron transport around photosystem, and the Biogenesis regulation of chloroplast ATP synthase. Presents the most recent biological knowledge and advances on ATP Synthase in Photosynthetic Organisms Content covers innovations to biotechnological, aquacultural and chemical developments about ATP Synthase in Photosynthetic Organisms Written by the most experienced authors in the field

Social Change and Social Work Timo Harrikari,Pirkko-Liisa Rauhala,2016-04-01 Social Change and Social Work discusses and examines how social work is challenged by social, political and economic tendencies going on in current societies. The authors ask how social work as a discipline and practice is encountering global and local transformations. Divided into three parts, topics covered include the changing social work mandate throughout history; social work paradigms and theoretical considerations; phenomenological social work; practice research; and gender and generational research. Taken together, the chapters in this anthology provide an authoritative and up-to-date overview of current discussions within the European social work research community.

**PARENTAL ALIENATION** Demosthenes Lorandos,William Bernet,S. Richard Sauber,2013-12-01 Parental Alienation: The Handbook for Mental Health and Legal Professionals is the essential "how to" manual in this important and ever increasing area of behavioral science and law. Busy mental health professionals need a reference guide to aid them in developing data sources to support their positions in reports and testimony. They also need to know where to go to find the latest material on a topic. Having this material within arm's reach will avoid lengthy and time-consuming online research. For legal professionals who must ground their arguments in well thought out motions and repeated citations to case precedent, ready access to state or province specific legal citations spanning thirty-five years of parental alienation cases is provided here for the first time in one place. • Over 1000 Bibliographic Entries• 500 Cases Examined• 25 Sample Motions in MS Word Format\* \*Note: The eBook version contains the additional supplemental materials in PDF format only. It does not contain the MS Word formatted sample motions.

**Teacher Motivation** Paul W. Richardson,Stuart A. Karabenick,Helen M.G. Watt,2014-05-30 Teacher Motivation: Theory and Practice provides a much needed introduction to the current status and future directions of theory and research on teacher motivation. Although there is a robust literature covering the theory and research on student motivation, until recently there has been comparatively little attention paid to teachers. This volume draws together a decade of work from psychological theorists and researchers interested in what motivates people to choose teaching as a career, what motivates them as they work with students in classrooms, the impact of

intrinsic and extrinsic forces on career experiences, and how their motivational profiles vary at different stages of their career. With chapters from leading experts on the topic, this volume provides a critical resource not only for educational psychologists, but also for those working in related fields such as educational leadership, teacher development, policy makers and school psychology.

Classroom Behavior, Contexts, and Interventions Bryan G. Cook, Melody G. Tankersley, Timothy J. Landrum, 2012-09-13 Intended to be of interest to clinicians, teachers, researchers, graduate students, and others who work with students with learning and behavioral disabilities, this book focuses on identify and review issues and outcomes associated with behavioral concerns of students with learning and behavioral disabilities.

Handbook of Australian School Psychology Monica Thielking, Mark D. Terjesen, 2017-01-26 This handbook addresses the current state and practice of school psychology with a focus on standards unique to Australia, including historical, legal, ethical, practical, and training factors. It provides a compilation of the most current research-based practices as well as guidelines for evidence-based assessment and intervention for common conditions (e.g., autism, depression, learning disabilities) and for delivering appropriate services to targeted student populations (e.g., LGBT, gifted, medical issues). Chapters discuss the application of national and international school psychology practices within the Australian educational and psychological structure. The handbook also examines the lack of formal resources specific to Australia's culture and psychology systems, with its unique mix of metropolitan cities and the vast geographic landscape that spans regional and remote areas. It offers numerous case studies and innovative school mental health programs as well as recommendations for professional development and advocacy that are unique to Australian school psychology. Topics featured in this Handbook include: Evidence-based assessment and intervention for dyscalculia and mathematical disabilities. Identification and management of adolescent risk-taking behaviors and addictions. Understanding and responding to crisis and trauma in the school setting. Prevention and intervention for bullying in schools. Class and school-wide approaches to addressing behavioral and academic needs. The role of school psychologists in the digital age. Practical advice for school psychologists facing complex ethical dilemmas. The Handbook of Australian School Psychology is a must-have resource for researchers, scientist-practitioners, and graduate students in child and school psychology, social work, and related fields that address mental health services for children and adolescents.

**East Asia, Latin America, and the Decolonization of Transpacific Studies** Chiara Olivieri, Jordi Serrano-Muñoz, 2022-01-03 In this collective work, researchers from different disciplines reflect upon the challenges and opportunities of decolonizing transpacific studies through the lens of a few paradigmatic case-studies that deal with connections between East Asia and Latin America. The present book offers a productive problematization of the idea of the transpacific as a concept and a space that is not restricted to a single definition. We defend that the transpacific can instead promote an understanding of agents and experiences that share many common traits that have been generally overlooked by a hegemonic interpretation of knowledge and the relationship between regions. By fostering an environment that not only accepts a plurality of views but that actively looks to accommodate analogous, tangential, and even contradicting approaches to the study of our ideas, we seek a double objective. First, we hope to highlight precisely the richness within the idea of the transpacific, avoiding sticking to any particular conception to it while at the same time acknowledging and owning each of our points of enunciation. Our second objective is part of a constant struggle in the quest towards social and epistemic justice. By adopting this stance of plurality, we can fight against structures of knowledge production and

reproduction that willingly or unintentionally instill specific interpretations in ways that inculcate exclusivity. The goal of this book is opening up and expanding the debate regarding transpacific connections, examining the limits and promises of including these experiences within the conceptual paradigm of the Global South, and showcasing different ways of approaching decolonial research to the study of the relationship between East Asia and Latin America.

**Handbook of Motivation at School** Kathryn R. Wentzel, David B. Miele, 2016-02-19 The second edition of the Handbook of Motivation at School presents an integrated compilation of theory and research in the field. With chapters by leading experts, this book covers the major theoretical perspectives in the field as well as their application to instruction, learning, and social adjustment at school. Section I focuses on theoretical perspectives and major constructs, Section II on contextual and social influences on motivation, and Section III on new directions in the field. This new edition will have the same popular organizational structure with theories at the beginning. It will also include new chapters that cover motivation as it relates to identity, culture, test anxiety, mindfulness, neuroscience, parenting, metacognition, and regulatory focus.

**Research on Teacher Identity** Paul A. Schutz, Ji Hong, Dionne Cross Francis, 2018-07-11 Understanding teachers' professional identities and their development is key to unpacking teachers' professional lives, the quality of their instruction, their motivation and commitment to teach, and their career decision-making. This book features a number of scholars from around the world who represent a variety of disciplines, scientific paradigms, and inquiry methods in researching teacher identity. By bringing these chapters together, this volume initiates active scholarly conversations and extends the boundaries of teacher identity research and practice. This collection of chapters provides significant insight into teacher identity and will be essential reading for pre-service and in-service teachers, teacher educators, school administrators, professional developers, and policy makers at various levels.

**Secondary Endosymbioses** Yoshihisa Hirakawa, 2017-10-27 Secondary Endosymbioses, Volume 84, the latest release in the Advances in Botanical Research series, summarizes eight major groups possessing complex plastids, including heterokonts, dinoflagellates, apicomplexans, chromerids, haptophytes, cryptophytes, euglenophytes and chlorarachniophytes. Updates to this new volume include sections on the Evolution of secondary plastid-bearing organisms, Primary plastids of Archeplastida, Secondary plastids of heterokonts (diatoms), Secondary and tertiary plastids of dinoflagellates, Apicoplasts, Secondary plastids of chromerids, Secondary Plastids of haptophytes, Secondary Plastids of cryptophytes, Secondary Plastids of euglenids, and Secondary Plastids of chlorarachniophytes. Through an examination on how plastids evolved by multiple endosymbiotic events, this book discusses how diverse and abundant organisms harbor complex plastids. Presents the latest release in the Advances in Botanical Research series Ideal resource for post-graduates and researchers in the plant sciences, including botany, plant biochemistry, plant pathology and plant physiology Contains contributions from internationally recognized authorities in their respective fields

The Palgrave International Handbook of Women and Journalism Carolyn M. Byerly, 2016-01-12 Now in paperback for the first time, the Handbook is an academic adaptation of information contained in the Global Report on the Status of Women in News Media, a study commissioned by the International Women's Media Foundation. The book's editor was the principal investigator of the original study. This text draws together the most robust data from that original study, presenting it in 29 chapters on individual nations and three additional theoretical chapters. The book is the most expansive effort to date to consider women's standing in the journalism profession across the world. Contents organize nations in relation to their progress within newsrooms, with those most advanced in gender equality

representing diversity in terms of region and national development. Contributing authors are, in most cases, the original researchers for their respective nations in the Global Report study.

**What we learn and when we learn it: sensitive periods in development** Etienne De Villers-Sidani, Virginia

Penhune, 2014-11-21 The impact of training or experience is not the same at all points in development. Children who receive music lessons, or learn a second language before age 7-8 are more proficient as adults. Early exposure to drugs or trauma makes people more likely to become addicted or depressed later life. Rat pups exposed to specific frequencies from 9-13 days post-partum show expanded cortical representations of these frequencies. Young birds must hear and copy their native song within 1-2 months of birth or they may never learn it at all. These are examples of sensitive periods: developmental windows where maturation and specific experience interact to produce differential long-term effects on the brain and behavior. While still controversial, evidence for the existence of sensitive periods has grown, as has our understanding of the underlying mechanisms of brain plasticity. Behavioral evidence from studies of language, psychopathology or vision in humans has been complemented by evidence elucidating molecular, gene and hormonal mechanisms in animals. It has been proposed that sensitive periods can be both opened and closed by specific experience, and that there are multiple, overlapping sensitive periods that occur through-out development as functions come on line. It is also likely that experience-dependent behavioral or brain plasticity accrued during one sensitive period can serve as a scaffold on which later experience and plasticity can build. Based on current knowledge, there are a number of broad questions and challenges to be addressed in this domain, these include: generating new information about the neurobiological mediators of structural and functional changes; proposing models of brain development that will better predict when sensitive periods should occur and what functions are implicated; investigation of the interaction between experience during a sensitive period and pre-existing individual differences; and the relationship between experience during a sensitive period and on-going experience. The goal of this Research Topic is to bring together scientists in different fields whose work addresses these issues, including animal and human developmental neuroscience, language and cognitive development, education, developmental psychopathology and sensory neuroscience.

*Handbook of Positive Youth Development* Radosveta Dimitrova, Nora Wiium, 2021-10-22 This handbook examines positive youth development (PYD) in youth and emerging adults from an international perspective. It focuses on large and underrepresented cultural groups across six continents within a strengths-based conception of adolescence that considers all youth as having assets. The volume explores the ways in which developmental assets, when effectively harnessed, empower youth to transition into a productive and resourceful adulthood. The book focuses on PYD across vast geographical regions, including Europe, Asia, Africa, Middle East, Australia, New Zealand, North America, and Latin America as well as on strengths and resources for optimal well-being. The handbook addresses the positive development of young people across various cultural contexts to advance research, policy, and practice and inform interventions that foster continued thriving and reduce the chances of compromised youth development. It presents theoretical perspectives and supporting empirical findings to promote a more comprehensive understanding of PYD from an integrated, multidisciplinary, and multinational perspective.

Photosynthesis Under Fluctuating Light Michele Grieco, Fiamma Longoni, Stefano Santabarbara, Jeremy Harbinson, 2023-06-27

Photosynthesis is a fundamental process that drives almost all life on Earth, and is the motor of agriculture and food production. For several decades, its basic functioning has been investigated mainly at steady-state, under constant illumination. This approach was necessary to understand the basic mechanisms underlying the light reactions and carbon assimilation. However, this condition does not reflect the natural environment, where plants experience changes in both the intensity and spectrum of irradiance in a wide range of time scales, spanning from seconds to several hours. In recent years, it has become clear that the processes allowing the photosynthetic apparatus to adapt to changes in irradiance are of paramount importance to plant fitness and productivity. Therefore, increased research effort has been directed towards studying the regulation of photosynthetic activity under fluctuating light, i.e. upon the variation of light intensity or light spectrum. This is important for understanding how photosynthetic organisms cope with natural environmental conditions. Fluctuating light itself constitutes a potentially stressful condition, because, depending on the scale of the fluctuation, it can transiently generate extreme redox and transthylakoid potentials, and forces the photosynthetic machinery to be re-adjusted. Not surprisingly, plants have evolved several mechanisms allowing a prompt response to these normal environmental events. In natural environments, photosynthetic organisms often have to cope with fluctuating light while experiencing other kinds of stress, such as heat, nutrient deficiency, drought, and pathogen attacks. Therefore, the study of combined stresses is essential for understanding the acclimation to realistic environmental conditions.

**Diatoms** Joseph Seckbach, Richard Gordon, 2019-07-11 The aim of this new book series (Diatoms: Biology and Applications) is to provide a comprehensive and reliable source of information on diatom biology and applications. The first book of the series, *Diatoms Fundamentals & Applications*, is wide ranging, starting with the contributions of amateurs and the beauty of diatoms, to details of how their shells are made, how they bend light to their advantage and ours, and major aspects of their biochemistry (photosynthesis and iron metabolism). The book then delves into the ecology of diatoms living in a wide range of habitats, and look at those few that can kill or harm us. The book concludes with a wide range of applications of diatoms, in forensics, manufacturing, medicine, biofuel and agriculture. The contributors are leading international experts on diatoms. This book is for a wide audience researchers, academics, students, and teachers of biology and related disciplines, written to both act as an introduction to diatoms and to present some of the most advanced research on them.

**Rethinking the Space for Religion** Catharina Raudvere, Krzysztof Stala, Trine Stauning Willert, 2015-01-01 A broad discussion about how history and religion contribute to identity politics in contemporary Europe, this book provides case studies exemplifying how public intellectuals and academics have taken an active part in the construction of recent and traditional pasts. Instead of repeating the simplistic explanation as a return of religion, this volume focuses on public platforms and agents and their use of religion as a political and cultural argument. Filled with previously unpublished data gathered from texts, interviews, field observations, artifacts, and material culture, this record challenges stereotypical images of East and Southeast Europe.
