A Returner's Magic Should Be Special, Vol. 1 ,2022-08-09 THE WORST CALAMITY HUMANKIND HAS EVER FACED... Shadow Realms have ravaged the earth and decimated almost everyone in their way. The survival of humanity hinges upon the success of just six mages, including analytic fighter Desir Herrman. The remaining heroes make one final stand to end the bloodshed...but to no avail. Desir closes his eyes on what should be the end of his life—only to open them and see the beginning of his school days?! Desir has returned thirteen years back to the past, where he’s been given another chance. A chance to see the loved ones he lost, a chance to meet his fellow warriors again, and a chance to save the world...!

Civil-Military Change in China Elites, Institutes, and Ideas after the 16th Party Congress Larry Wortzel,2004 In November 2002, the Chinese Communist Party held its 16th Congress and formally initiated a sweeping turnover of senior leaders in both the Party and the People's Liberation Army (PLA). The meeting heralded not merely a new set of personalities in positions of political and military power, but also the emergence of a new generation of leaders. Who are these individuals, and what does their rise mean for the future of China and its military? The group of China specialists who have written this book have applied their research talents, intelligence, and hands-on experience to clarify and explain the most important issues of the day in China. China obviously matters to the United States because of its size, its spectacular patterns of growth, its profound problems linked to rapid growth, and its military intentions. These specialists have avoided the diseases of bias, demagoguery, predispositions, and showmanship, which infect so many of the analyses of China. Rather, they have examined the facts and the trends to explain the divisions and cohesions in the Chinese leadership and their potential significance to the United States and the rest of the world. These annual conferences have a long continuity stretching back to the early 1990s. Hence, there is a common database for the books produced each year. The writers revisit major problems in China's development, particularly in the military sphere. They also examine how Chinese policies have evolved over the years, and how important the United States has been in influencing China's strategy. What, for instance, will the emerging leadership with its factious differences do about Taiwan and North Korea? The conference took place at the Carlisle Barracks in September 19- 21, 2003, and was sponsored by the American Enterprise Institute, the Heritage Foundation and the Army War College. The exchanges were frank, the atmosphere was filled with camaraderie and tension.

Figures of Resistance Richard H. Okada,1991-10-18 In this revisionist study of texts from the mid-Heian period in Japan, H. Richard Okada offers new readings of three well-known tales: The Tale of the Bamboo-cutter, The Tale of Ise, and The Tale of Genji. Okada contends that the cultural and gendered significance of these works has been distorted by previous commentaries and translations belonging to the larger patriarchal and colonialist discourse of Western civilization. He goes on to suggest that this universalist discourse, which silences the feminine aspects of these texts and subsumes their writing in misapplied Western canonical literary terms, is sanctioned and maintained by the discipline of Japanese literature. Okada develops a highly original and sophisticated reading strategy that demonstrates how readers might understand texts belonging to a different time and place without being complicit in their assimilation to categories derived from Western literary traditions. The author’s reading strategy is based on the texts’ own resistance to modes of analysis that employ such Western canonical terms as novel, lyric, and third-person narrative. Emphasis is also given to the distinctive cultural circles, as well as socio-political and genealogical circumstances that surrounded the emergence of the texts. Indispensable readings for specialists in literature, cultural studies, and Japanese literature and history, *Figures of Resistance* will also appeal to general readers interested in the problems and complexities of studying another culture.

Making Sense of Muslim Fundamentalisms Nimrod Hurvitz,Eli Alshech,2020-06-04 Studying Muslim fundamentalisms, this book compares key movements, examining their commonalities, differences, and intricate relations, as well as their achievements and failures. Muslim fundamentalisms have the sympathy of approximately half of the Muslim population in the world. Yet, they are divided among themselves and are in a constant state of controversy. The research dwells on the leading fundamentalist movements, such as the Muslim Brothers, Tablighi-Jama’at, al-Qaeda, and ISIS, and illustrates how differently they think about the West and its culture, democracy, and women’s presence in the public sphere. By identifying these trends, and studying them comparatively, the book enables the interested reader to make sense of the plethora of fundamentalist movements, which are otherwise lumped together by the media and are barely discernible for the reader. Whereas most studies of Muslim fundamentalism focus on organizational or militant actions that the movements perform, this study concentrates on their efforts to Islamize society through everyday life in a peaceful manner. Identifying the different strands of Muslim fundamentalisms, the book will be a key resource to a wide range of readers including researchers and students interested in politics, religious, Islamic and Middle Eastern Studies.

Shikitei Sanba and the Comic Tradition in Edo Fiction Robert W. Leutner,2020-10-26 The last decades of the eighteenth century gave rise to an explosion of literary activity in Edo (now Tokyo) that lasted until the mid-nineteenth century, with an army of writers producing prodigious quantities of fiction. This study traces the life and literary career of Shikitei Sanba (1776-1882), a writer in the mainstream of that generation, the author of more than one hundred works of fiction, many in comic veins. This book-length critical treatment of a major writer of gesaku(playful compositions) is a welcome breakthrough, since Samba's life, his era of literary activity, and the popular genres in which he worked have received scant treatment in English. Robert Leutner describes Sanba as a representative writer within a literary scene shifting from amateur to professional and becoming increasingly commercial. The text is enhanced by Leutner's translations of excerpts from Sanba's various writings and culminates in two long passages in original translations, fully annotated, of Ukiyoburo, The Bathhouse of the Floating World, one of Sanba's best-known works. In *The Men's Bath* and *The Women's Bath* readers will encounter an array of Edo types. Their informal conversations convey the qualities of humor, the sociological characteristics, and much of the flavor of life in Sanba's Edo.

The Purposes of Education John Hattie,Steen Nepper Larsen,2020-05-01 What are the purposes of education and what is the relationship between educational research and policy? Using the twin lenses of Visible Learning and

Part clash of cultures, part meeting of minds, always fascinating and illuminating, this intriguing book will inspire teachers, students, and parents at all levels of the educational system – from kindergarten through school to university. Conversations include: What are the purposes of education? Does educational data speak for itself? What is the role of the teacher? Is learning a visible phenomenon? Is it important to teach and learn specific subjects? What is the role of neuroscience research? What is the relationship between educational research and educational politics? What is the role of the state in education?

The History of Visual Magic in Computers Jon Peddie,2013-06-13 If you have ever looked at a fantastic adventure or science fiction movie, or an amazingly complex and rich computer game, or a TV commercial where cars or gas pumps or biscuits behaved liked people and wondered, “How do they do that?”, then you’ve experienced the magic of 3D worlds generated by a computer. 3D in computers began as a way to represent automotive designs and illustrate the construction of molecules. 3D graphics use evolved to visualizations of simulated data and artistic representations of imaginary worlds. In order to overcome the processing limitations of the computer, graphics had to exploit the characteristics of the eye and brain, and develop visual tricks to simulate realism. The goal is to create graphics images that will overcome the visual cues that cause disbelief and tell the viewer this is not real. Thousands of people over thousands of years have developed the building blocks and made the discoveries in mathematics and science to make such 3D magic possible, and The History of Visual Magic in Computers is dedicated to all of them and tells a little of their story. It traces the earliest understanding of 3D and then foundational mathematics to explain and construct 3D; from mechanical computers up to today’s tablets. Several of the amazing computer graphics algorithms and tricks came of periods where eruptions of new ideas and techniques seem to occur all at once. Applications emerged as the fundamentals of how to draw lines and create realistic images were better understood, leading to hardware 3D controllers that drive the display all the way to stereovision and virtual reality.

Kabuki Heroes on the Osaka Stage, 1780-1830 C. Andrew Gerstle,Timothy Clark,2005 The creation of celebrity and fame is a topic easily understandable in today's world of pop idol competitions and reality TV shows. This exhibition and catalogue will focus on a similar phenomenon of the late eighteenth and nineteenth centuries, when urban Osaka and Tokyo created superstar actors, and will show how this was a stimulus for the creation of theatre, visual arts and poetry. Visitors to the exhibition will be struck by a colourful and varied visual display through which actors were portrayed as legendary urban heroes. The dates of items included will range from about 1780 until the 1830s; but the core of the exhibition will cover the period 1800-1821, and focus on the fierce rivalry between the two Osaka Kabuki superstars, Arashi Kichisaburo II (Rikan I, 1769-1821) and Nakamura Utaemon III (Shikan I, 1778-1838). Books, surimono, single sheet actor prints and albums will highlight the different ways in which actors and performances were represented, and show how this was part of a complex strategy to create celebrity for the actors, poets and artists involved.

Women, Resistance and Revolution Sheila Rowbotham,2014-01-14 This classic book provides a historical overview of feminist strands among the modern revolutionary movements of Russia, China and the Third World. Sheila Rowbotham shows how women rose against the dual challenges of an unjust state system and social-sexual prejudice. Women, Resistance and Revolution is an invaluable historical study, as well as a trove of anecdote and example fit to inspire today’s generation of feminist thinkers and activists.

China's Leaders Cheng Li,2001 Who will govern China after Jiang Zemin? What path will its new leaders chart in the early years of the twenty-first century? Drawing upon a wealth of both quantitative and qualitative data on the so-called fourth generation of leaders_those who were young during the Cultural Revolution_Cheng Li shows that this group is more diversified than previous generations in formative experiences, political solidarity, ideological conviction, and occupational background. The author explores the contradictions between these emerging leaders and their non-elite peers who were barred from education during the Mao era and now often are unemployed and disenchanting. The book concludes with the intriguing notion that this generation of leaders may have a better understanding of its peersO concerns and therefore may make the regime more accountable to its people, thus contributing to, rather than opposing, democratic development.
