A Companion to the Cantos of Ezra Pound Carroll Franklin Terrell,Ezra Pound,1980-01-01 The Companion is a major contribution to the literary evaluation of Pound's great, but often bewildering and abstruse work, The Cantos. Available in a one-volume paperback edition for the first time, the Companion brings together in conveniently numbered glosses for each canto the most pertinent details from the vast body of work on the Cantos during the last thirty years. The Companion contains 10,421 separate glosses that include translations from eight languages, identification of all proper names and works, Pound's literary and historical allusions, and other exotica, with exegeses based upon Pound's sources. Also included is a supplementary bibliography of works on Pound, newly updated, and an alphabetized index to The Cantos,

The Challenges of Catastrophe Risk Management: Empirical Analyses in the CAT Bond Market Tobias Götze,2021-03-22 Due to the increasing relevance of natural catastrophes as a significant global source of risk and the capacity constraints in primary insurance and reinsurance markets, CAT bonds have become an important instrument to manage catastrophe risks by transferring them to the capital market. In three empirical studies, this dissertation examines the challenges related to catastrophe risk management with CAT bonds. First, the factors that influence the substitution of traditional reinsurance by CAT bonds are identified. These factors consist of the insured risk layer and the extends of reinsurer default risk, basis risk, and asymmetric information. Second, the accessibility of the CAT bond market for (re)insurance companies is analyzed and the results exhibit the existence of barriers to market entry in the form of higher premiums being paid by less reputable and financially weaker CAT bond sponsors. The third empirical study shows that CAT bond sponsors are susceptible to moral hazard, but also that moral hazard can be successfully prevented by sufficient loss retention or by the use of non-indemnity CAT bonds. Altogether, this dissertation contributes to improving the understanding of the CAT bond market and the challenges of catastrophe risk management using CAT bonds.

Atlas of Lymphoscintigraphy and Sentinel Node Mapping Giuliano Mariani,Sergi Vidal-Sicart,Renato A. Valdés Olmos,2020-07-29 The main goal of the second edition of this book is to update the content on the rapidly growing field of lymphoscintigraphy, a radionuclide-based imaging procedure that provides information on the functional status of the lymphatic system. Although the technique was originally introduced to identify the cause of peripheral edema (i.e., blockage of the venous or lymphatic circulation), more recent and widespread applications include radioguided biopsy of the sentinel lymph node in patients with solid cancers. This procedure is crucial for the adequate planning of oncologic surgery in a growing number of cancers, most notably breast cancer, cutaneous melanoma, head and neck cancers, penile cancer, and cervical cancer. The book focuses on the latest advances in lymphoscintigraphy techniques, including both novel tracers recently approved for clinical use (especially in the field of sentinel lymph node mapping) and the expanding role of hybrid imaging with SPECT/CT - and in sentinel node detection using hybrid tracers (radiolabeled and fluorescent) for dual-signature guidance. Each chapter addresses the clinical application of lymphoscintigraphy in different anatomic areas or disease conditions. After an introductory section concerning the pathophysiology of the specific site/disease, the clinical relevance and impact of lymphoscintigraphy is demonstrated by a collection of richly illustrated teaching cases describing the lymphoscintigraphic patterns most commonly observed, as well as anatomic variants and technical pitfalls. Emphasis is placed on tomographic multimodality imaging. The book gathers contributions by experts in nuclear oncology, who have revised their chapters by updating the didactic material and adding clinical cases. Regarding sentinel lymph node biopsy in particular, a major distinction of this text is the incorporation of the staging guidelines of the American Joint Committee on Cancer (8th edition) into the didactic material.
