Rethinking Australia's Art History Susan Lowish,2018-05-30 This book aims to redefine Australia's earliest art history by chronicling for the first time the birth of the category Aboriginal art, tracing the term's use through published literature in the late eighteenth, nineteenth and early twentieth centuries. Susan Lowish reveals how the idea of Aboriginal art developed in the European imagination, manifested in early literature, and became a distinct classification with its own criteria and form. Part of the larger story of Aboriginal/European engagement, this book provides a new vision for an Australian art history reconciled with its colonial origins and in recognition of what came before the contemporary phenomena of Aboriginal art.

Integrative Arts Psychotherapy Claire Louise Vaculik,Gary Nash,2022-08-12 This book is a new addition to the art therapy literature setting out an integrative approach to using theory and the arts, which places clients at the centre of practice and supports collaboration across the therapeutic journey. The structural framework described enables different theories, contemporary research, and best-practice guidelines to be used to inform therapy, allowing the practitioner to work fluidly and rigorously in response to their clients' changing needs and therapeutic aims. Integrative arts psychotherapy brings therapeutic practice to life, as the use of the visual arts is enhanced by the possibilities offered for developing and deepening therapeutic work using sculpture/clay, drama/puppetry, poetry, sand play, music, and bodywork/movement. The work described in this book has grown from a British and European art therapy culture, community, and history – influenced by prominent American theorists. The book has been written for trainers, trainees, and practitioners of creative arts therapies, psychotherapy, and expressive arts therapies – nationally and worldwide. It may also be of interest to other professionals, or those in consultation with an art therapist, who want to understand what this type of art therapy can offer.

Teaching and Assessing Social Justice Art Education Karen Keifer-Boyd,Wanda B. Knight,Adetty Pérez de Miles,Cheri E. Ehrlich,Yen-Ju Lin,Ann Holt,2022-09-07 This incisive and wholly practical book offers a hands-on guide to developing and assessing social justice art education for K-12 art

educators by providing theoretically grounded, social justice art education assessment strategies. Recognizing the increased need to base the K-12 curriculum in social justice education, the authors ground the book in six social justice principles—conceptualized through art education—to help teachers assess and develop curriculum, design pedagogy, and foster social justice learning environments. From encouraging teachers to be upstanders to injustice to engaging in decolonial action, this book provides a thorough guide to facilitating and critiquing social justice art education and engaging in reflexive praxis as educators. Rich in examples and practical application, this book provides a clear pathway for art educators to connect social justice art education with real-life educational assessment expectations: 21st-century learning, literacy, social skills, teacher performance-based assessment, and National Core Art Standards, making this text an invaluable companion to art educators and facilitators alike

A Companion to Feminist Art Hilary Robinson, Maria Elena Buszek, 2019-10-22 Original essays offering fresh ideas and global perspectives on contemporary feminist art The term ‘feminist art’ is often misused when viewed as a codification within the discipline of Art History—a codification that includes restrictive definitions of geography, chronology, style, materials, influence, and other definitions inherent to Art Historical and museological classifications. Employing a different approach, *A Companion to Feminist Art* defines ‘art’ as a dynamic set of material and theoretical practices in the realm of culture, and ‘feminism’ as an equally dynamic set of activist and theoretical practices in the realm of politics. Feminist art, therefore, is not a simple classification of a type of art, but rather the space where feminist politics and the domain of art-making intersect. The Companion provides readers with an overview of the developments, concepts, trends, influences, and activities within the space of contemporary feminist art—in different locations, ways of making, and ways of thinking. Newly-commissioned essays focus on the recent history of and current discussions within feminist art. Diverse in scope and style, these contributions range from essays on the questions and challenges of large sectors of artists, such as configurations of feminism and gender in post-Cold War Europe, to more focused conversations with women artists on Afropean decoloniality. Ranging from discussions of essentialism and feminist aesthetics to examinations of political activism and curatorial practice, the Companion informs and questions readers, introduces new concepts and fresh perspectives, and illustrates just how much more there is to discover within the realm of feminist art. Addresses the intersection between feminist thinking and major theories that have influenced art theory Incorporates diverse voices from around the world to offer viewpoints on global feminisms from scholars who live and work in the regions about which they write Examines how feminist art intersects with considerations of collectivity, war, maternal relationships, desire, men, and relational aesthetics Explores the myriad ways in which the experience of inhabiting and perceiving aged, raced, and gendered bodies relates to feminist politics in the art world Discusses a range practices in feminism such as activism, language, education, and different ways of making art The intersection of feminist art-making and feminist politics are not merely components of a unified whole, they sometimes diverge and divide. *A Companion to Feminist Art* is an indispensable resource for artists, critics, scholars, curators, and anyone seeking greater strength on the subject through informed critique and debate.

Research Handbook on Art and Law Jani McCutcheon, Fiona McGaughey, 2020-01-31 Featuring international contributions from leading and emerging scholars, this innovative Research Handbook presents a panoramic view of how law sees visual art, and how visual art sees law. It resists the conventional approach to art and law as inherently dissonant – one a discipline preoccupied with rationality, certainty and objectivity; the other a creative enterprise ensconced in the imaginary and inviting multiple, unique and subjective interpretations. Blending these two distinct disciplines, this unique Research Handbook bridges the gap between art and law.

The Everyday Practice of Public Art Cameron Cartiere, Martin Zebracki, 2015-11-19 *The Everyday Practice of Public Art: Art, Space, and Social Inclusion* is a multidisciplinary anthology of analyses exploring the expansion of contemporary public art issues beyond the built environment. It follows the highly successful publication *The Practice of Public Art* (eds. Cartiere and Willis), and expands the analysis of the field with a broad perspective

which includes practicing artists, curators, activists, writers and educators from North America, Europe and Australia, who offer divergent perspectives on the many facets of the public art process. The collection examines the continual evolution of public art, moving beyond monuments and memorials to examine more fully the development of socially-engaged public art practice. Topics include constructing new models for developing and commissioning temporary and performance-based public artworks; understanding the challenges of a socially-engaged public art practice vs. social programming and policymaking; the social inclusiveness of public art; the radical developments in public art and social practice pedagogy; and unravelling the relationships between public artists and the communities they serve. The Everyday Practice of Public Art offers a diverse perspective on the increasingly complex nature of artistic practice in the public realm in the twenty-first century.

But why did the government get so involved with the arts in the first place? Musher addresses this question and many others by exploring the political and aesthetic concerns of the 1930s, as well as the range of responsesfrom politicians, intellectuals, artists, and taxpayersto the idea of active government involvement in the arts. In the process, she raises vital questions about the roles that the arts should play in contemporary society.

The Evolution of Contemporary Arts Markets Andrés Solimano, 2021-09-30 The Evolution of Contemporary Arts Markets looks at the historical evolution of the art market from the 15th century to the present day. Art is both an expression of human creativity and an object of economic value and financial refuge at times of economic turbulence. Historically, the art market evolved with the development of capitalism, finance and technical change, and art schools responded to social events such as wars, revolutions and waves of democratization. The author discusses the main features of modern art markets such as complexity in art valuation, globalism, segmentation, financialization, indivisibility, liquidity and provenance issues. The book studies the impact of wealth inequality and economic cycles and crises on the art market and features a chapter focusing specifically on the art market in China. This accessible publication is ideal for a broad, interdisciplinary audience including those involved in the economic and financial fields as well as art lovers, art market participants and social and cultural scholars.

A History of the Western Art Market Titia Hulst, 2017-09-19 This is the first sourcebook to trace the emergence and evolution of art markets in the Western economy, framing them within the larger narrative of the ascendancy of capitalist markets. Selected writings from across academic disciplines present compelling evidence of art's inherent commercial dimension and show how artists, dealers, and collectors have interacted over time, from the city-states of Quattrocento Italy to the high-stakes markets of postmillennial New York and Beijing. This approach casts a startling new light on the traditional concerns of art history and aesthetics, revealing much that is provocative, profound, and occasionally even comic. This volume's unique historical perspective makes it appropriate for use in college courses and postgraduate and professional programs, as well as for professionals working in art-related environments such as museums, galleries, and auction houses.
