A World of Strangers Lyn H. Lofland, 1985 In traditional human societies, the stranger was a threat, to be disarmed at once by an act of force or by a ritual of hospitality. Under no conditions could a stranger be ignored or taken for granted. Yet in all great cities today, human beings seem to live out their entire lives in a world of strangers. How did it become possible for millions of people to do this? How is city life possible? The unique value of *A World of Strangers* lies in Lofland's expert use of rich historical and anthropological sources to answer these questions. She demonstrates that a potentially chaotic and meaningless world of strangers was transformed into a knowable and predictable world of strangers by the same mechanism humans always use to make their world livable: it was ordered. Lofland offers a brilliant analysis of the various devices used at different times in history to create social and psychological order in cities, concluding with an analysis of the contemporary city, in which the location of the encounter between strangers has come to replace personal appearance as a means of evaluating others. Lofland also describes how city people initially learn and then act upon the ordering principles dominant in their society. *A World of Strangers* is a wonderfully wise and readable account of how we have come to live as we do.

Social Work and Health Care in an Aging Society Barbara Berkman, 2003-06 Sixteen chapters by scholars of social work relate the well-being of older adults to social work practice and the current model of service delivery. Chapters concentrate on issues affecting the health of older adults (depression, dementia, abuse), services to specific populations (African American women, grandparents raising grandchildren, the developmentally disabled), and professional issues (home care, case management, standardized assessment). The implications for

training, research, and policy are highlighted. Annotation (c)2003 Book News, Inc., Portland, OR (booknews.com).

A Disturbance in Mirrors Pamela J. Annas, 1988-06-10 This new, uncluttered study of Sylvia Plath's poetry offers a calculated balance between feminist theory and the old heritage of the New Criticism. The apparent thematic peg here is Plath's fascination with mirrors in her life and in her work. . . . This is a very solid work; it is the most readable of the recent books on Plath, and, among the recent works this reviewer knows of, none is comparable. Choice Much of Sylvia Plath's poetry springs from her attempts to recognize and reconcile her own paradoxes: the ones she found inside herself and the ones she faced in the world in which she lived. Like the work of a number of twentieth-century women poets, her poetry can be characterized as a search not so much for definition of self as for redefinition of self. This penetrating study traces, through the internal dialectics that structure poems, the evolution of Plath's imagery, and examines the way the poems embody the tension between images of self and images of world. A developmental study of Plath's poetry, *A Disturbance in Mirrors* considers various aspects of her work: the social implications of mythic imagery in her early poems; the relationship between language, imagery, and sexual/social context in the poems of the middle period; the connections between aesthetic and biological creativity in a bureaucratic, depersonalized world; the internalized conflict of self and society within the poet; and Plath's attempts, metaphorically and within the poems, to narrate the possibilities for a transformed self reborn into a transformed world.

What Children Need Jane Waldfogel, 2010-03-15 What do children need to grow and develop? And how can their needs be met when parents work? Emphasizing the importance of parental choice, quality of care, and work opportunities, economist Jane Waldfogel guides readers through the maze of social science research evidence to offer comprehensive answers and a vision

for change.
