A Sacred Covenant Mary Elizabeth O'Brien,2008 A Sacred Covenant: The Spiritual Ministry of Nursing focuses on the nurse's personal spiritual needs. Grounded in biblical passages taken from both Old and New Testament scripture, it provides a broad spiritual foundation. Each chapter begins with a scripturally oriented nursing meditation and ends with a biblically themed nurse's prayer. Anecdotes from practicing nurses are woven throughout each chapter to illustrate the spiritual themes.

Dream Time with Children Brenda Mallon, 2001-12-15 Brenda Mallon's latest book on dreams and dreaming provides a valuable and positive insight into the dreams of children. She has - through sensitivity, empathy and respect - won the trust of the children she has spoken to, and they have in turn shared their dreams with her. Brenda Mallon has written a book that will be a valuable resource to parents as well as professionals working with children. She has provided an excellent book list for children on the subject of sleep and dreams and there is a very comprehensive bibliography. I would recommend this book, both for the subject material and the manner in which it is presented.' - Rostrum 'This is an enjoyable read by an author who has already written widely about children and grief (Helping children manage loss). Although the book is not directly about bereavement, it will be most helpful to parents who are trying to help children disturbed by their dreams and it includes many wonderful quotations from youngsters on the subject such as They are pictures in my pillow and We dream to rewind our memory. The great strength of this book, however, is that the author gives adults many practical and useful ways for helping children when troubled. She is clear that dreams are real, powerful and a part of our lives, whether we remember them or not. We can support our children by paying attention to their dreams and not dismissing them or brushing them aside because they are uncomfortable.' - The Compassionate Friends Newsletter UK 'An excellent book to help adults understand the fears and insecurities that can cause children to dream. Brenda Mallon, prominent in the field of dream research for more than 20 years, hopes her book will enable those who care for and work with children to realise that children's

deepest anxieties signal to us through dreams. There are chapters on nightmare taming and the impact of illness, as well as ideas on how to set up a dream sharing group. This is a helpful way to let children talk about their dreams and understand why they have them.' - The Teacher 'Dream Time with Children is short, easy and fun to read, with enough introductory information that any parent, even a complete novice, could use it to begin dream sharing with children. At the same time, the most experienced dream worker will find much of interest here. A wonderful introduction to the world of children's dreams.' - Richard A. Russo, Dream Time: the magazine of the Association for the Study of Dreams 'A fascinating and readable book. Using vivid examples, Brenda Mallon explains how and why children dream, and makes connections with universal dream themes and symbols. She subscribes to Jung's theory of multiple layers in dreams. Practical guidance is given on how to help children express their dreams individually or in a group. She analyses Harry Potter's dark dreams, alerting us to the signals being sent out by nightmares, which can denote fear of separation, abandonment or attack. But she ends by reminding us how uplifting and creative dreaming can be.' - Community Care Children may not understand where their dreams come from especially when they experience terrifying nightmares that stop them being able to sleep, and frighten them when they are awake. What can an adult do to help them overcome their nightmares? How do you know what is 'normal' dreaming for their age and development? Accessible and fun to use, this guide gives a step-by-step account of how to understand and interpret children's dreams. Illustrated with practical exercises it also contains interesting facts about the cultural and spiritual significance of dreams. Dream Time with Children even includes an analysis of Harry Potter's dreams - as well as a fascinating look at dreams real children have experienced.

A Body of Practical Divinity John Gill, 2006

Psychotherapy Pearls Fred M. Levin, Meyer S. Gunther, 2004-01-13 *Psychotherapy Pearls* began as a personal project to capture as many of the clinical insights as possible from the careers of its two authors, Fred Levin and Meyer Gunther. Such wisdom accumulates piecemeal only from the continued intensive experience of working each day with patients who are suffering from a vast array of difficulties: narcissistic deficits, depressions, anxiety and phobic disorders, learning disabilities, attention deficit/hyperactivity disorder, bipolar illness (so-called manic depressive disorder), Alzheimer's disease and other dementing illnesses, mourning and melancholia, and so forth. The only way to learn about specific people is to become immersed in their psyche: to care with and about them, over long periods of time, and only then can one learn to respect the dignity and power of individuals as they patiently find enduring solutions to their problems. To be part of this intensity is a great privilege, as well as a responsibility. Out of respect for those we have worked with, both colleagues and patients, and in order to make things a bit easier for those who wish to improve their knowledge of psychotherapy theory and technique, we have worked diligently to state our hard won insights clearly for students of all levels of experience and sophistication. One unique feature of *Psychotherapy Pearls* is that we cover both technique and psychopathology in one book. Most textbooks tackle one or the other, but we believe this is wasteful, since it makes most sense to us to consider technique in close proximity to our discussions of the very illnesses and problems for which our technique is designed to address. Moreover, in considering technique we center our

thinking about common sense psychology which most readers have been thinking about, whether they realize it or not, from the beginning of their lives, but without ever pulling these bits of insight together into a body of knowledge or theory as such. For example, our book begins with the following subjects: feelings, beginning therapy, listening, empathy, idealization, paying attention, free association, therapeutic relationship, referrals, patient selection, diagnosis, calming down, transference, resistance, defense, working through, and so forth. It is not possible to cover everything in any book on a single subject. But we try hard not to leave out essentials, or correlated matters. For example, we cover not only suicidal, but homicidal impulses; biological as well as psychological illnesses; theoretical issues and practical matters. In the latter category, we consider such matters as how to decide when and whom to refer patients to and whom and when to accept patients into treatment, how to keep one's patient records, and how best to manage such things as vacation absences, billings, and even how to plan for the possible death of the therapist (i.e. how to help the patient deal with our absence, whether brief or permanent). We have taken the time to personally create the index for our book, because we believe that only the author's involved can generate the proper subject headings, or know where important ideas appear in the text. This should make our book more user friendly than many other books where the index is generated simply on the basis of some computer program for doing so, without the sensitivity of the authors being involved in the process. The reader may appreciate that each of the subject chapters have been discussed at length after they were composed by the authors, as we reviewed each word of our text, and debated with each other our conclusions, nuances, and wording. Often these debates lasted into the evening, and intense feelings were aroused on both sides. But our goal in this process was always finding a common denominator which we could better explicate for the reader, without doing

any injustice to the complexity and even beauty of the questions being asked. The mind and brain are complex beyond belief
