Textual Transformations in Children's Literature Benjamin Lefebvre,2013 This book offers new critical approaches for the study of adaptations, abridgments, translations, parodies, and mash-ups that occur internationally in contemporary children's culture. It follows recent shifts in adaptation studies that call for a move beyond fidelity criticism, a paradigm that measures the success of an adaptation by the level of fidelity to the original text, toward a methodology that considers the adaptation to be always already in conversation with the adapted text. This book visits children's literature and culture in order to consider the generic, pedagogical, and ideological underpinnings that drive both the process and the product. Focusing on novels as well as folktales, films, graphic novels, and anime, the authors consider the challenges inherent in transforming the work of authors such as William Shakespeare, Charles Perrault, L.M. Montgomery, Laura Ingalls Wilder, and A.A. Milne into new forms that are palatable for later audiences particularly when—for perceived ideological or political reasons—the textual transformation is not only unavoidable but entirely necessary. Contributors consider the challenges inherent in transforming stories and characters from one type of text to another, across genres, languages, and time, offering a range of new models that will inform future scholarship.

How to Change Katy Milkman,2022 'Game-changing. Katy Milkman shows in this book that we can all be a super human' Angela Duckworth, bestselling author of Grit How to Change is a powerful, groundbreaking blueprint to help you - and anyone you manage, teach or coach - to achieve personal and professional goals, from the master of human nature and behaviour change and Choiceology podcast host Professor Katy Milkman. Award-winning Wharton Professor Katy Milkman has devoted her career to the study of behaviour change. An engineer by training, she approaches all challenges as problems to be solved and, with this mind-set, has drilled into the roadblocks that prevent us from achieving our goals and breaking unwanted behaviours. The key to lasting change, she argues, is not to set ever more audacious goals or to foster good habits but to get your strategy right. In How to Change Milkman identifies seven human impulses, or 'problems', that commonly sabotage our attempts to make positive personal and professional change. Then, crucially, instead of getting you to do battle with these impulses she shows you how to harness them and use these as driving forces to help instil new, positive behaviours - better, faster and more efficiently than you could imagine. Drawing her own original research, countless engaging case studies and practical tools throughout to help you put her ideas into action, Milkman reveals a proven, inspiring path that can take you - once and for all - from where you are today to where you want to be.
