Intelligent Systems and Applications Kohei Arai,2021-08-03 This book presents Proceedings of the 2021 Intelligent Systems Conference which is a remarkable collection of chapters covering a wider range of topics in areas of intelligent systems and artificial intelligence and their applications to the real world. The conference attracted a total of 496 submissions from many academic pioneering researchers, scientists, industrial engineers, and students from all around the world. These submissions underwent a double-blind peer-review process. Of the total submissions, 180 submissions have been selected to be included in these proceedings. As we witness exponential growth of computational intelligence in several directions and use of intelligent systems in everyday applications, this book is an ideal resource for reporting latest innovations and future of AI. The chapters include theory and application on all aspects of artificial intelligence, from classical to intelligent scope. We hope that readers find the book interesting and valuable; it provides the state-of-the-art intelligent methods and techniques for solving real-world problems along with a vision of the future research.

RFID for the Supply Chain and Operations Professional Pamela Zelbst,Victor E. Sower,2021-11-04 The intent of this book is to provide a sufficient discussion of RFID to enable readers with no prior knowledge to develop a basic understanding of the technology. RFID for the Supply Chain and Operations Professional discusses current applications and specific examples of RFID usage taken from a variety of industries. The appropriate coupling of RFID with other technologies such as global positioning systems (GPS), enterprise resource planning (ERP), IIoT technologies and robotics is discussed as well as an overview of the RFID implementation process. This book will help readers develop an understanding of the capability of the technology to increase an organization's customer responsiveness. In the third edition, the discussion and examples have been updated to reflect the rapid advancement in RFID technology. A new case study and new examples have been added along with updated discussions and projections about RFID technology.

Asset Management: Tools And Issues Frank J Fabozzi,Francesco A Fabozzi,Marcos Lopez De Prado,Stoyan V Stoyanov,2020-12-02 Long gone are the times when investors could make decisions based on intuition. Modern asset management draws on a wide-range of fields beyond financial theory: economics, financial accounting, econometrics/statistics, management science, operations research (optimization and Monte Carlo simulation), and more recently, data science (Big Data, machine learning, and artificial intelligence). The challenge in writing an institutional asset management book is that when tools from these different fields are applied in an investment strategy or an analytical framework for valuing securities, it is assumed that the reader is familiar with the fundamentals of these fields. Attempting to explain strategies and analytical concepts while also providing a primer on the tools from other fields is not the most effective way of describing the asset management process. Moreover, while an increasing number of investment models have been proposed in the asset management literature, there are challenges and issues in implementing these models. This book provides a description of the tools used in asset management as well as a more in-depth explanation of specialized topics and issues covered in the companion book, Fundamentals of Institutional Asset Management. The topics covered include the asset management business and its challenges, the basics of financial accounting, securitization technology, analytical tools (financial econometrics, Monte Carlo simulation, optimization models, and machine learning), alternative risk measures for asset allocation, securities finance, implementing quantitative research, quantitative equity strategies, transaction costs, multifactor models applied to equity and bond portfolio management, and backtesting methodologies. This pedagogic approach exposes the reader to the set of interdisciplinary tools that modern asset managers require in order to extract profits from data and processes.

Computerized Work Management Systems for Utility and Plant Operations Roopchan Lutchman,2003-11 This book shows how new computerized technologies can be used to create more cost-effective work management--and improved asset management.

Sams Pyotr Stilovsky,2020-11-30 All businesses and utilities face the challenge of how to keep their assets working at lowest whole life cost. That's why increasingly complex asset management systems implemented by expensive consultants have flourished. It doesn't have to be that way - you can achieve the results you need through following a series of simple logical steps and you can do it without costly outside help. That's the capability that SAMS, Simplified Asset Management Systems gives you and it is relevant to any industry. It presents a complete system for water facilities and then illustrates how the same procedures are easily adapted using highways and social housing as worked examples.

ITAMOrg® Hardware Asset Management Specialist Courseware Jan Øberg,2021-01-24 ITAMOrg® IT Hardware Asset Management Certifications is suitable for individuals wanting to demonstrate they have achieved sufficient understanding of how to apply and tailor the Hardware Asset Management practices. Hardware Asset Management (HAM) is important for every organization. Management and control of hardware influences the risk on most asset types such as Software, Cloud & Services and People and Information assets. E.g., if you are not in control of what hardware is in use it is not possible for you to control your software which will result in software license in-compliance and other risks. The Hardware Asset Management Specialist Certification brings participants IT Service Management best practices together with Hardware Asset Management best practices. This will help an organization to implement Hardware Asset Management lifecycle processes and showing how IT Service Management can support HAM lifecycles to be in control and support the other Asset types. The purpose of the ITAMOrg Hardware Asset Management Specialist (HAMS) course and certification is to provide knowledge on best practices and use of Hardware Asset Management (HAM) in the challenges that Hardware Asset Managers face on a daily basis. This certification is based on a practical approach to strengthen the participants understanding of how ISO 55000 and IT Service Management best practice relates to everyday use of HAM, Hardware standards, Hardware lifecycle control, control of retirement and disposal and organizational issues that saturates many businesses in today's digital world. This Courseware is suited for the ITAMOrg® 2020 HAM exam. There is also a sample exam added of the ITAMOrg® 2020 Hardware Asset Management in case the participant prefers to refresh its knowledge.
