Marketing Communications in the Pharmaceutical Industry Peter Holden,2018-04-19 Specialists drawn from industry, agency and academia explain the role of the various elements in the marketing communications process, and show how a reassessment of the marketing mix can result in a positive response to challenges imposed by a changing commercial environment. The pharmaceutical industry is often used as the model to illustrate proven techniques and creative innovation in marketing; although primarily intended for all those involved in the pharmaceutical, healthcare and allied industries, the book should be of interest to a much wider readership.

Start at the End Matt Wallaert,2019-06-11 Nudge meets Hooked in a practical approach to designing products and services that change behavior, from what we buy to how we work. Deciding what to create at modern companies often looks like an episode of Mad Men: people throw ideas around until one sounds sexy enough to execute and then they scale it to everyone. The result? Companies overspend on marketing to drive engagement with products and services that people don't want and won't help them be happier and healthier. Start at the End offers a new framework for design, grounded in behavioral science. Technology executive and behavioral scientist Matt Wallaert argues that the purpose of everything is behavior change. By starting with outcomes instead of processes, the most effective companies understand what people want to do and why they aren't already doing it, then build products and services to bridge the gap. Wallaert is a behavioral psychologist who has led product design at organizations ranging from startups like Clover Health to industry leaders such as Microsoft. Whether dissecting the success behind Uber's ridesharing service or Flamin' Hot Cheetos, he underscores with clarity and humor how this approach can improve the way we work and live. This is an essential roadmap for building products that matter--and changing behavior for the better.

Houston, We Have a Narrative Randy Olson,2015-09-15 Communicate more effectively about science-by taking a page from Hollywood and improving your storytelling skills. Ask a scientist about Hollywood, and you'll probably get eye rolls. But ask someone in Hollywood about science, and they'll see dollar signs: Moviemakers know that science can be the source of great stories, with all the drama and action that blockbusters require. That's a huge mistake, says Randy Olson: Hollywood has a lot to teach scientists about how to tell a story--and, ultimately, how to do science better. With *Houston, We Have a Narrative*, he lays out a stunningly simple method for turning the dull into the dramatic. Drawing on his unique background, which saw him leave his job as a working scientist to launch a career as a filmmaker, Olson first diagnoses the problem: When scientists tell us about their work, they pile one moment and one detail atop another moment and another detail--a stultifying procession of "and, and, and." What we need instead is an understanding of the basic elements of story, the narrative structures that our brains are all but hardwired to look for--which Olson boils down, brilliantly, to "And, But, Therefore," or ABT. At a stroke, the ABT approach introduces momentum ("And"), conflict ("But"), and resolution ("Therefore")--the fundamental building blocks of story. As Olson has shown by leading countless workshops worldwide, when scientists' eyes are opened to ABT, the effect is staggering: suddenly, they're not just talking about their work--they're telling stories about it. And audiences are captivated. Written with an uncommon verve and enthusiasm, and built on principles that are applicable to fields far beyond science, *Houston, We Have a Narrative* has the power to transform the way science is understood and appreciated, and ultimately how it's done.

The Writer Who Stayed William Zinsser, Adapted from Zinsser on Friday, The American Scholar's National Magazine Award-Winning Essay Series For nineteen months William Zinsser, author of the best-selling *On Writing Well* and many other books, wrote a weekly column for the website of the American Scholar magazine. This cornucopia was devoted mainly to culture and the arts, the craft of writing, and travels to remote places, along with the movies, American popular song, email, multitasking, baseball, Central Park, Tina Brown, Pauline Kael, Steve Martin, and other complications of modern life. Written with elegance and humor, these pieces are now collected in *The Writer Who Stayed*. If you value vintage journalism of an old-fashioned vividness and integrity please, please read this book.--Wall Street Journal Our 'endlessly supple' English language will, Zinsser says, 'do anything you ask it to do, if you treat it well. Try it and see.' Try him and see craftsmanship.--George F. Will Zinsser--who, with *On Writing Well*, taught a whole lot of us how to set down a clean English sentence--last year won a National Magazine Award for his Friday web columns in *The American Scholar*. They're now in a collection that's completely charming, impeccably polished, and Strunk-and-White-ishly brief. He's the youngest 90-year-old you'll read this week.--New York Magazine

Bottlenecks offers practical explanations and evidence based on the idea that human cognition did not begin with the digital age.” – John Dirks, UX Director and Partner, Blink UX “Bottlenecks brings together two very important aspects of user experience design: understanding users and translating this into business impact. A must-read for anyone who wants to learn both.” – Josh Lamar, Sr. UX Lead, Microsoft Outlook

Stand Firm Svend Brinkmann,2017-02-27 The pace of modern life is accelerating. To keep up, we must keep on moving and adapting – constantly striving for greater happiness and success. Or so we are told. But the demands of life in the fast lane come at a price: stress, fatigue and depression are at an all-time high, while our social interactions have become increasingly self-serving and opportunistic. How can we resist today's obsession with introspection and self-improvement? In this witty and bestselling book, Danish philosopher and psychologist Svend Brinkmann argues that we must not be afraid to reject the self-help mantra and 'stand firm'. The secret to a happier life lies not in finding your inner self but in coming to terms with yourself in order to coexist peacefully with others. By encouraging us to stand firm and get a foothold in life, this vibrant anti-self-help guide offers a compelling alternative to life coaching, positive thinking and the need always to say 'yes!'

Darwin's Worms Adam Phillips,1999 Adam Phillips has been called the 'psychotherapist of the floating world' and 'the closest thing we have to a philosopher of happiness'. In this extraordinary book he takes a look, via Freud and Darwin, at endings – at mortality, extinction and death. Darwin and Freud took God out of the big picture, leaving nothing between mankind and nature. Their ideas were met with righteous indignation. But today, whether or not we read Darwin and Freud, we speak a version of their languages. Most of us think of childhood and sexuality as sources of suffering, and we picture ourselves as animals struggling competitively for survival. Yet, as Adam Phillips argues, we are not merely trapped in a world of continuous loss. Taking as his examples Darwin's life-long fascination in lowly earthworms, and Freud's life-long antipathy to grubbing biographers, he unexpectedly finds much to celebrate. For both of these writers are interested, above all, in how destruction conserves life. They take their inspiration from fossils or from half-remembered dreams, and show how life is about what can be done with these humble remnants from the past. Darwin and Freud render ageing, accident and death integral, not alien, to our sense of ourselves. They teach us the art of transience.

Burning Down the House Charles Baxter,2013-07-16 Graywolf reissues one of its most successful essay collections with two new essays and a new foreword by Charles Baxter As much a rumination on the state of literature as a technical manual for aspiring writers, Burning Down the House has been enjoyed by readers and taught in classrooms for more than a decade. Readers are rewarded with thoughtful analysis, humorous one-liners, and plenty of brushfires that continue burning long after the book is closed.
