Personalizing Asthma Management for the Clinician Stanley J. Szeffler, Fernando Holguin, Michael E Wechsler, 2017-09-22

Personalized medicine is a rapidly emerging area in health care, and asthma management lends itself particularly well to this new development. This practical resource by Dr. Stanley J. Szeffler helps you navigate the many asthma medication options available to your patients, as well as providing insights into those which may be introduced within the next several years. Features a wealth of information on available asthma medications, including new immunomodulators, new responses to treatment, and new treatment strategies at all levels of asthma care. Prepares you to meet your patients' needs regarding asthma exacerbation prevention and asthma prevention. Consolidates today's available information and guidance in this timely area into one convenient resource.

Severe Asthma Kian Fan Chung, Elliot Israel, Peter G. Gibson, 2019-06-01 Severe asthma is a form of asthma that responds poorly to currently available medication, and its patients represent those with greatest unmet needs. In the last 10 years, substantial progress has been made in terms of understanding some of the mechanisms that drive severe asthma; there have also been concomitant advances in the recognition of specific molecular phenotypes. This ERS Monograph covers all aspects of severe asthma – epidemiology, diagnosis, mechanisms, treatment and management – but has a particular focus on recent understanding of mechanistic heterogeneity based on an analytic approach using various 'omics platforms applied to clinically well-defined asthma cohorts. How these advances have led to improved management targets is also emphasised. This book brings together the clinical and scientific expertise of those from around the world who are collaborating to solve the problem of severe asthma.

Airway Remodeling Peter Howarth, John William Wilson, Jean Bousquet, Sabina Rak, Romain Pauwels, 2001 This landmark volume discusses the characteristics and impact of the remodeling process on airway function and clinical disease expression within the airway in asthma, covering pharmacological therapies and possible future targets relevant to regulating the remodeling process. Emphasizes the importance of treating underlying airway inflammation and the relevance of structural alterations to the airway wall, including glandular increases, enhanced collagen deposition within the submucosa, increased vasculature, smooth hypertrophy, and hyperplasias! Tracing the development and maintenance of bronchial hyperresponsiveness, decline in lung function, and loss of reversibility evident in chronic asthma, Airway Remodeling describes the contribution of inflammatory cells in the development of airway structural changes examines how pharmaceutical agents act and whether existing treatments modify or prevent remodeling in chronically inflamed asthmatic airways considers whether neural pathways initiate as well as contribute to the airway inflammatory cascade that leads to remodeling reviews the action of cytokines and growth factors on ASM signaling outlines novel approaches to regulating smooth muscle growth clarifies whether permanent ventilatory incapacity in asthma is caused by the uncoupling of the airway and the role of the lung parenchyma details high-resolution computerized tomography scan to measure the internal size of the airway at baseline, during challenge, or after bronchodilatation and more! Improving lung function and quality of life by reducing the need for emergency care, hospital admissions, and systemic steroid administration, Airway Remodeling is a superb reference for pulmonologists and respiratory system specialists; physiologists; pneumologists; allergists; pharmacologists; molecular, cellular, and lung biologists; and graduate and medical school students in these disciplines.

The Health Consequences of Involuntary Exposure to Tobacco Smoke ,2006 This Surgeon General's report returns to the topic of the health effects of involuntary exposure to tobacco smoke. The last comprehensive review of this evidence by the Department of Health and Human Services (DHHS) was in the 1986 Surgeon General's report, The Health Consequences of Involuntary Smoking, published 20 years ago this year. This new report updates the evidence of the harmful effects of involuntary exposure to tobacco smoke. This large body of research findings is captured in an accompanying dynamic database that profiles key epidemiologic findings, and allows the evidence on health effects of exposure to tobacco smoke to be synthesized and updated (following the format of the 2004 report, The Health Consequences of Smoking). The database enables users to explore the data and studies supporting the conclusions in the report. The database is available on the Web site of the Centers for Disease Control and Prevention (CDC) at <http://www.cdc.gov/tobacco>.

Decision Modelling for Health Economic Evaluation Andrew Briggs, Mark Sculpher, Karl Claxton, 2006-08-17 In financially constrained health systems across the world, increasing emphasis is being placed on the ability to demonstrate that health care interventions are not only effective, but also cost-effective. This book deals with decision modelling techniques that can be used to estimate the value for money of various interventions including medical devices, surgical procedures, diagnostic technologies, and pharmaceuticals. Particular emphasis is placed on the importance of the appropriate representation of uncertainty in the evaluative process and the implication this uncertainty has for decision making and the need for future research. This highly practical guide takes the reader through the key principles and approaches of modelling techniques. It begins with the basics of constructing different forms of the model, the population of the model with input parameter estimates, analysis of the results, and progression to the holistic view of models as a valuable tool for informing future research exercises. Case studies and exercises are supported with online templates and solutions. This book will help analysts understand the contribution of decision-analytic modelling to the evaluation of health care programmes. ABOUT THE SERIES: Economic evaluation of health interventions is a growing specialist field, and this series of practical handbooks will tackle, in-depth, topics superficially addressed in more general health economics books. Each volume will include illustrative material, case histories and worked examples to encourage the reader to apply the methods discussed, with supporting material provided online. This series is aimed at health economists in academia, the pharmaceutical industry and the health sector, those on advanced health economics courses, and health researchers in associated fields.

Promoting Treatment Adherence William T. O'Donohue, Eric R. Levensky, 2006-07-07 In Nazi Germany, the cult of celebrity was the embodiment of Hitler's style of cultural governance. Hitler's rise to power owed much to the creation of his own celebrity, and the country's greatest stars, whether they were actors, writers, or musicians, could be one of only two things. If they were compliant, they were lauded and awarded status symbols for the regime; but if they resisted or were simply Jewish they were traitors to be interned and murdered. This fascinating analysis offers a shocking portrait of a Hitler shaped by aspirations to Hollywood-style fame, of the correlation between art and ambition, of films used as weapons, and of sexual predilections. The Fuhrer believed he was an artist, not a politician, and in his Germany politics and culture became one. His celebrity was cultivated and nurtured by Joseph Goebbels, Germany's supreme head of culture. Hitler and Goebbels enjoyed the company of beautiful female film stars, and Goebbels had his own casting couch. In Germany's version of Hollywood there were scandals, starlets, secret agents, premieres, and party politics. The Third Reich would launch filmmaker and actress Leni Riefenstahl to prominence by making her its own glorifying documentarian,

most famously in The Triumph of the Will, the innovative propaganda film starring Hitler and widely considered to be one of the greatest movies ever made. It is no coincidence that Eva Braun, Hitler s longtime partner and wife for the two days leading up to their joint suicide, was a photographer, and in fact shot most of the surviving photographs and film footage of her lover. This book reveals previously unpublished information about the Hitler film, which Goebbels envisaged as the greatest story ever told, although it was ultimately trumped by the dictator s own, real-life Wagnerian finale.

Asthma Treatment D. Olivieri,P.J. Barnes,S.S. Hurd,Giancarlo C. Folco,2013-11-11 From the 19-29 May 1991 the NATO ASI Course PAsthma Treatment: A P Multidisciplinary Approach was held in Erice, on the rocky North West Coast of Sicily, facing the ancient Phoenician shore of the African Continent. Sixty NATO sponsored participants arriving from many different European Countries - Nato members and non - attended the course. Qualified researchers from Europe and the United States held extensive lectures, short meetings and small informal group discussions. Erice is a magical place which draws together people from different backgrounds and cultures under her Mediterrean charm, recreating the ancient Greek openair discussion atmosphere. And so, during the 10 days gathering, the extensive willingness of the senior investigators and the laudable enthusiasm of the younger participants was stimulated. All of the most recent findings in the biology and the pharmacology of Asthma were discussed, initially behind closed doors, to be unhurriedly continued along the alley ways of the Cittadella della Scienza , in Erice's small restaurants, and on her deserted beaches. The texts collected here are testimony to the high quality of the investigators contributions as well as their far reaching interests. I think that a Director of such a Course would be adequatly satisfied by merely considering the enthusiasm and high level involvement of every participant. He could not have been more satisfied after having considered the proceedings summerizing the scientific content of the meeting.

Irwin and Rippe's Intensive Care Medicine Richard S. Irwin,James M. Rippe,2008 Thoroughly updated for its Sixth Edition, this classic reference remains an unsurpassed source of definitive, practical guidance on adult patient care in the ICU. It provides encyclopedic, multidisciplinary coverage of both medical and surgical intensive care and includes a how-to atlas of procedures and a new section on noninvasive monitoring.
