High Seas Buffer Bruce A. Elleman,2012 it ensured that friction over the Taiwan Strait did not escalate into a full-blown war. In fact, the Taiwan Patrol Force did its job so well that virtually nothing has been written about it. U.S. Navy ships acted both as a buffer between the two antagonists and as a trip wire in case of aggression. The force fulfilled the latter function twice in the 1950s -- during the first (1954-55) and second (1958) Taiwan Strait crises --

Russia's Military Modernisation: An Assessment The International Institute for Strategic Studies (IISS),2020-09-29 This new IISS Strategic Dossier examines the recent development of Moscow's armed forces and military capabilities. It analyses the aspirations underpinning Russia's military reform programme and its successes as well as its failures. The book also provides insights into Russia's operational use of its armed forces, including in the intervention in Syria, the goals and results of recent state armament programmes, and the trajectory of future developments. This full-colour volume includes more than 50 graphics, maps and charts and over 70 images, and contains chapters on: Russia's armed forces since the end of the Cold War Strategic forces Ground forces Naval forces Aerospace forces Russia's approach to military decision-making and joint operations Economics and industry At a time when Russia's relations with many of its neighbours are increasingly strained, and amid renewed concern about the risk of an armed clash, this dossier is essential reading for understanding the state, capabilities and future of Russia's armed forces.

Rebuilding the Royal Navy D. K. Brown,George Moore,2012-07-30 This design history of post-war British warship development, based on both declassified documentation and personal experience, is the fourth and final volume in the author's masterly account of development of Royal Navy's ships from the 1850s to the Falklands War. In this volume the author covers the period in which he himself worked as a Naval Constructor, while this personal knowledge is augmented by George Moore's in-depth archival research on recently declassified material. The RN fleet in 1945 was old and worn out, while new threats and technologies, and post-war austerity called for new solutions. How designers responded to these unprecedented challenges is the central theme of this book. It covers the ambitious plans for the conversion or replacement of the bigger ships; looks at all the new construction, from aircraft carriers, through destroyers and frigates, to submarines (including nuclear and strategic), to minesweepers and small craft. The authors pay particular attention to the innovations introduced, and analyses the impact of the Falklands War. At the start of the twenty-first century the Royal Navy is still a powerful and potent force with new and a number of innovative classes, both surface and sub-surface, coming on stream. This book offers a fascinating insight into how the post-war fleet developed and adapted to the changing role of the Navy.

The Sublime Quran ,2007 This is the first translation of the Quran by an American woman. It is a universal and inclusive translation with the hope that Islam will be better understood in the West. She also challenges the use of the word to beat in 4: 34 as meaning to go away which is how the Prophet of Islam understood the word as it has historically justified violence against and abuse of Muslim women. This interpretation must change, she says, and revert to the way the Prophet understood it.

The Myriad Challenges of Peace Bill Rawling,Canada. Canadian Forces Medical Services,2004 This publication forms a narrative of how health care was organized, practised, and supported within Canada's fighting services from the first day of peace following World War II to the military operations of the end of the century. It focusses not only on what medical practitioners did, but on

how they were recruited, trained, deployed, and supplied. Topics covered include operations in the Korean War & peacekeeping; medical research; personnel issues; infrastructure; logistics; treatment of casualties; field hospitals; search & rescue operations; and treating victims of natural disasters. Includes index.

Darkhouse Karina Halle,2013-09-24 Perry Palomino is not what you would call 'ordinary'. For one thing, there's her past which she likes to pretend never happened, and then there's the fact that she sees ghosts. Luckily for her, that all comes in handy when she stumbles across Dex Foray, an eccentric producer for an upcoming webcast on ghost hunters. Even though the show's budget is non-existent and Dex himself is a maddening enigma, Perry is instantly drawn into a world that both threatens her life and seduces her with a sense of importance. Her uncle's haunted lighthouse provides the perfect catalyst and backdrop for a horrific mystery that unravels the threads of Perry's fragile sanity and causes her to fall for a man, who, like the most dangerous of ghosts, may not be all that he seems.

The Gulf Military Balance Anthony H. Cordesman,Bryan Gold,2014-03-12 The United States faces major challenges in dealing with Iran, the threat of terrorism, and the tide of political instability in the Arabian Peninsula. The presence of some of the world's largest reserves of oil and natural gas, vital shipping lanes, and Shia populations throughout the region have made the peninsula the focal point of US and Iranian strategic competition.

Etymological Dictionary of Proto-Celtic Ranko Matasović,2009 This is the first etymological dictionary of Proto-Celtic to be published after a hundred years, synthesizing the work of several generations of Celtic scholars. It contains a reconstructed lexicon of Proto-Celtic with ca. 1500 entries. The principal lemmata are alphabetically arranged words reconstructed for Proto-Celtic. Each lemma contains the reflexes of the Proto-Celtic words in the individual Celtic languages, the Proto-Indo-European (PIE) roots from which they developed, as well as the cognate forms from other Indo-European languages. The focus is on the development of forms from PIE to Proto-Celtic, but histories of individual words are explained in detail, and each lemma is accompanied by an extensive bibliography. The introduction contains an overview of the phonological developments from PIE to Proto-Celtic, and the volume includes an appendix treating the probable loanwords from unknown non-IE substrates in Proto-Celtic.

On Schacht's Origins of Muhammadan Jurisprudence Muḥammad Muṣṭafā A'zamī, Joseph Schacht, 1985 This in-depth study presents a detailed analysis and critique of the classic Western work on the origins of Islamic law, Schacht's *Origins of Muhammadan Jurisprudence*. Azami's work examines the sources used by Schacht to develop his thesis on the relation of Islamic law to the Qur'an, and exposes fundamental flaws in Schacht's methodology that led to the conclusions unsupported by the texts examined. This book is an important contribution to Islamic legal studies from an Islamic perspective.

You Cannot Surge Trust Gary E. Weir, Sandra J. Doyle, U. S. Naval History & Heritage Command, 2013-10 From the foreword: As our nation and our Navy shift their focus away from the land wars in Iraq and Afghanistan that have so dominated our internal conversations for more than a decade and pivot toward the Asia-Pacific region, it is most appropriate that this study, *You Cannot Surge Trust*, should make its appearance. The assembled authors, under the assured editorial hand of Sandra Doyle, bring forward a series of episodes that demonstrate the evolving and increasingly important nature of maritime coalition operations around the world. Beginning with a look at maritime interception operations in the Arabian Gulf during Operations Desert Shield and Desert Storm, this work moves forward through the post-Cold War era to include recent operations in the Middle East and central Asia. Written from a multinational point of view, the analysis suggests that nations, even superpowers, are increasingly dependent upon each other for support during major combat operations and that only by frequent consultation, exercises, cooperation in technology development, and understanding of force structure capabilities will future maritime coalitions be successful. This study also advances a larger argument regarding the relevance of naval and maritime history in defense policy development. The challenges faced by coalition forces during the 1991 to 2005 period are not so different from what confronted those who sailed before. The crews of Continental Navy ships during the American Revolution had difficulty keeping up with French ships owing to differences in the size of the respective fleets and individual ship design. During World Wars I and II the U.S. and Royal navies consistently had to overcome problems inherent in differences in classification and communications. Lastly, in the increasingly geopolitical complexities of modern warfare, illustrated by our experiences operating alongside allies in Korea and Vietnam, history reveals that the different rules of engagement under which nations exercise their forces can cause conflicts within a partnership—even as the partners prosecute a conflict. Each of these issues has been raised before, each is examined within *You Cannot Surge Trust*, and each will raise its head again in some future hostility.
