⬚ *Distant Viewing* Taylor Arnold,Lauren Tilton,2023-10-17 A new theory and methodology for the application of computer vision methods to the computational analysis of collected, digitized visual materials, called "distant viewing." Distant Viewing: Computational Exploration of Digital Images presents a new theory and methodology for the computational analysis of digital images, offering a lively, constructive critique of computer vision that you can actually use. What does it mean to say that computer vision "understands" visual inputs? Annotations never capture a whole image. The way digital images convey information requires what researchers Taylor Arnold and Lauren Tilton call "distant viewing"—a play on the well-known term "distant reading" from computational literary analysis. Recognizing computer vision's limitations, Arnold and Tilton's spirited examination makes the technical exciting by applying distant viewing to the sitcoms

Bewitched and I Dream of Jeannie, movie posters and other popular forms of advertising, and Dorothea Lange's photography. In the tradition of visual culture studies and computer vision, Distant Viewing's interdisciplinary perspective encompasses film and media studies, visual semiotics, and the sciences to create a playful, accessible guide for an international audience working in digital humanities, data science, media studies, and visual culture studies.

⬜ 🄷Three River Valleys Called Home Vicki Holmes,2019-08-13 Sometimes people leave their home with the hopes of finding something better. Sometimes they are forced out and chased away. Philip Eamer and his wife, Catrina, experience both in this true story of immigrants searching for a place to call home. The Eamer family's story begins in 1755 as they leave the Rhine Valley for a better life in America. Once there, they move to the Mohawk River Valley in New York, where they build a home and raise 10 children. Despite the effects of the French Indian War, the Eamers flourish and happily find their lives intertwined with their neighbours and fellow immigrants for almost two decades. However, no family's story occurs in isolation, and eventually the Eamers find themselves at the mercy of the political and historic events of the American Revolution. Choosing to side with the Crown, they are forced to flee their home at the hands of neighbours and soldiers. What follows next is representative of many Loyalists' experiences. The Eamer family is forced to make a 370-km (230-mile) trek to Montreal, where they must live in a refugee camp for three years before finally being granted their own land in the St. Lawrence Valley for their loyalty to the King. Told by one of Philip and Catrina's descendants, Three River Valleys Called Home is historical fiction based on a real family and true events. Although some of the interactions and dialogue may be imagined, they are firmly planted in the harsh realities that many immigrants faced and pay tribute to the true grit of the settlers who built North America. While this book will have special meaning for the thousands of descendants of the Eamer family (and the other families who made up their community), their story will touch anyone with a history of immigration in their family tree.
