Starting or Improving Your Business Ronald J. Plachno,2020-01-20 Starting or Improving Your Business is written to help those people just starting a business or who already in one and wish to improve it. It is based on my almost 50 years in industry, in large companies that I have worked for, and in small companies that I have started. While no book can guarantee that you can get rich, this book tries to mostly contain warnings of what to look for, how to plan, or what to avoid. No book ever covers anything, but it is my belief that this book covers some very important items for business that include both the very large businesses and the very tiny startups. There are just some of us that seem to have the word entrepreneur in our blood, regardless of how successful or not we become. There seems to be that challenge to business, to overcome the difficulties and then succeed, that seems not only good for us, but may also be fun at the same time. And even if we do just a bit, the satisfaction of trying something hard and accomplishing some of our goals makes some of us feel better about ourselves. And of course, our accomplishments may help others as well. The book includes some generalities that I have found along the way. And the book also includes some specific examples from the three large firms that I worked at, and also the more than 5 business startups that I attempted. Even if your business is different, some days it seems to me that there is often more the same than there is that is different, from business to business. That might explain the popularity of Small Business Associations, which at times, I was a part of. Whether or not you decide this book may have something important to you, if you are trying to start or improve a business, I do wish you the very best. I also wish that you also find some fun in doing that along the way.

The feedbacks so far received from few professors in information technology in Dallas, Texas, area strongly suggests the use of these books as a great fundamental and companion material for computer science students. Writing with a Word Processor William Zinsser,1983 As a reporter, humorist and critic, Zinsser tells the reader about his learning experience with the word processor along with the fears, setbacks and triumphs. He demystifies the word processor and describes how to master its different functions. He explains how revising and reshaping his work instantly on an electronic screen has changed his methods of writing, rewriting, editing and organizing; how it will save time and money and eventually replace the typewriter as the primary writing tool in offices; and how it can improve the writing skills of everyone who uses it.

Seven Steps to a Comprehensive Literature Review Anthony J. Onwuegbuzie,Rebecca Frels,2016-02-04 This dynamic guide to doing literature reviews demystifies the process in seven steps to show researchers how to produce a comprehensive literature review. Teaching techniques to bring systematic thoroughness and reflexivity to research, the authors show how to achieve a rich, ethical and reflexive review. What makes this book unique: Focuses on multimodal texts and settings such as observations, documents, social media, experts in the field and secondary data so that your review covers the full research environment Puts mixed methods at the centre of the process Shows you how to synthesize information thematically, rather than merely summarize the existing literature and findings Brings culture into the process to help you address bias and understand the role of knowledge interpretation, guiding you through Teaches the CORE of the literature review – Critical thinking, Organization, Reflections and Evaluation – and provides a guide for reflexivity at the end of each of the seven steps Visualizes the steps with roadmaps so you can track progress and self-evaluate as you learn the steps This book is the essential best practices guide for students and researchers, providing the understanding and tools to approach both the 'how' and 'why' of a rigorous, comprehensive, literature review.
