Eiji Tsuburaya: Master of Monsters August

Ragone, 2007-11 Behind-the-scenes hero to anyone who's thrilled by giant monsters duking it out over Tokyo, Eiji Tsuburaya was the visual effects mastermind behind Godzilla, Ultraman, and numerous Japanese science fiction movies and TV shows beloved around the world. The first book on this legendary film figure in English, this highly visual biography details his fascinating life and career, featuring hundreds of film stills, posters, concept art, and delightful on-set photos of Tsuburaya prompting monsters to crush landmark buildings. A must-have for fans, this towering tribute also features profiles of Tsuburaya's film collaborators, details on his key films and shows (most available on DVD), and features on the enduring popularity of the characters he helped create.

Atlas of World War II Stephen Hyslop, 2018-10-18 Prelude to war, 1941: Blitzkrieg -- Prelude to war, 1943: war in the Pacific -- 1942-1944: breaking Hitler's grip -- 1944-1945: victory over Germany -- 1943-1945: defeating Japan.

War Stars Howard Bruce Franklin, 2008 In this new and expanded edition of an already classic work, H. Bruce Franklin brings the epic story of the superweapon and the American imagination into the ominous twenty-first century, demonstrating its continuing importance both to comprehending our current predicament and to finding ways to escape from it. Sweeping through two centuries of American culture and military history, Franklin traces the evolution of superweapons from Robert Fulton's eighteenth-century submarine through the strategic bomber, atomic bomb, and Star Wars to a twenty-first century dominated by weapons of mass destruction, real and imagined. Interweaving culture, science, technology, and history, he shows how and why the American pursuit of the ultimate defensive weapon -- guaranteed to end all war and bring universal triumph to American ideals -- has led our nation and the world into an epoch of terror and endless war.

109 East Palace Jennet Conant, 2007-11-01 From the bestselling author of *Tuxedo Park*, the extraordinary story of the thousands of people who were sequestered in a military facility in the desert for twenty-seven intense months under J. Robert Oppenheimer where the world's best scientists raced to invent the atomic bomb and win World War II. In 1943, J. Robert Oppenheimer, the brilliant, charismatic head of the Manhattan Project, recruited scientists to live as virtual prisoners of the U.S. government at Los Alamos, a barren mesa thirty-five miles outside Santa Fe, New Mexico. Thousands of men, women, and children spent the war years sequestered in this top-secret military facility. They lied to friends and family about where they were going and what they were doing, and then disappeared into the desert. Through the eyes of a young Santa Fe widow who was one of Oppenheimer's first recruits, we see how, for all his flaws, he developed into an inspiring leader and motivated all those involved in the Los Alamos project to make a supreme effort and achieve the unthinkable.

NICOMACHEAN ETHICS Aristotle, 2017-04-20 ♦ EVERY art and every inquiry, and similarly every action and pursuit, is thought to aim at some good; and for this reason the good has rightly been declared to be that at which all things aim. But a certain difference is found among ends; some are activities, others are products apart from the activities that produce them. Where there are ends apart from the actions, it is the nature of the products to be better than the activities. Now, as there are many actions, arts, and sciences, their ends also are many; the end of the medical art is health, that of shipbuilding a vessel, that of strategy victory, that of economics wealth. But where such arts fall under a single capacity- as bridle-making and the other arts concerned with the equipment of horses fall under the art of riding, and this and every military action under strategy, in the same way other arts fall under yet others- in all of these the ends of the master arts are to be preferred to all the subordinate ends; for it is for the sake of the

former that the latter are pursued. It makes no difference whether the activities themselves are the ends of the actions, or something else apart from the activities, as in the case of the sciences just mentioned. ♦

The Underdogs Tracey West, 2021-10-05 From the writer of the bestselling Dragon Masters series and the illustrator of the bestselling Diary of a Pug series comes a high-energy, illustrated chapter book series about four dogs who learn that being yourself is much more fun than being Best in Show. Welcome to the town of Barksdale, where the canine residents strive for perfection. Every shopkeeper claims to be the best groomer or sell the best biscuits. And at Barksdale Academy, the pressure is on every year for one pup to be named Best in Show. Nova, Duke, Harley, and Peanut have never won Best in Show... which is okay with them! But they have to work together to pass their Agility Exam, because either the whole pack passes or the whole pack fails. Nova has convinced her pals to train, but on her practice course, Duke is afraid to climb the high ramp, Harley keeps chasing squirrels, and Peanut can't make it through the hoops. Nova's not doing much better -- she's so excited she keeps knocking the whole course over! Will the pups make the grade, or are they doomed to be Underdogs forever? With black-and-white illustrations on every page and hilarious antics throughout, this series is perfect for readers who are just starting to read chapter books on their own, or for anyone who loves a good underdog story!

Fahrenheit 451 Ray Bradbury, 1968 A fireman in charge of burning books meets a revolutionary school teacher who dares to read. Depicts a future world in which all printed reading material is burned.

Hollywood Goes to War Colin Shindler, 2014-01-21 A historian's view of the relationship between American history and the American film industry, this book is a witty and perceptive account of Hollywood and its films in the years from the outbreak of the Second World War in Europe to the end of the war in Korea,

It describes how film makers and their industry were shaped by and responded to the strong political and social stimuli of wartime America. The author examines the recurring question of whether the movies were a reflection of the society in which they were produced, or whether by virtue of their undeniable propaganda power the films shaped that society. Combining evidence from literary, visual and oral sources, he covers a wide range of movies, emphasising in particular *Casablanca*, *Mrs Miniver*, *The Best Years of Our Lives* and *Since You Went Away*. In addition to placing the films in a social and political context, the author shows that Hollywood is a perfect example of the bone-headed way in which people behave when they are dealing with large amounts of money and power. Enjoyably nostalgic, this book will appeal to film enthusiasts as well as those interested in war and its effect on society.

Japanese (re)militarization and Asia Rajesh Kapoor, 2011
Notwithstanding the ongoing friction between pacifists and supporters of militarization, Japan has managed to build up its defence capabilities. This book explores how this process affects the rest of Asia.

The Geography of Injustice Barak Kushner, 2024-03-15
In *The Geography of Injustice*, Barak Kushner argues that the war crimes tribunals in East Asia formed and cemented national divides that persist into the present day. In 1946 the Allies convened the Tokyo Trial to prosecute Japanese wartime atrocities and Japan's empire. At its conclusion one of the judges voiced dissent, claiming that the justice found at Tokyo was only the sham employment of a legal process for the satisfaction of a thirst for revenge. War crimes tribunals, Kushner shows, allow for the

history of the defeated to be heard. In contemporary East Asia a fierce battle between memory and history has consolidated political camps across this debate. The Tokyo Trial courtroom, as well as the thousands of other war crimes tribunals opened in about fifty venues across Asia, were legal stages where prosecution and defense curated facts and evidence to craft their story about World War Two. These narratives and counter narratives form the basis of postwar memory concerning Japan's imperial aims across the region. The archival record and the interpretation of court testimony together shape a competing set of histories for public consumption. The Geography of Injustice offers compelling evidence that despite the passage of seven decades since the end of the war, East Asia is more divided than united by history.

Arming Mother Nature Jacob Darwin Hamblin, 2013-05-23

Hamblin argues that military planning for World War III essentially created catastrophic environmentalism: the idea that human activity might cause global natural disasters. This awareness, Hamblin shows, emerged out of dark ambitions, as governments poured funds into environmental science after World War II.

Gothiniad Surazeus Astarius, 2017-10 Gothiniad of Surazeus - Oracle of Gotha presents 150,792 lines of verse in 1,948 poems, lyrics, ballads, sonnets, dramatic monologues, eulogies, hymns, and epigrams written by Surazeus 1993 to 2000.

Emergency War Plan Sean M. Maloney, 2021-02 Emergency War Plan examines the theory and practice of American nuclear deterrence and its evolution during the Cold War. Previous examinations of nuclear strategy during this time have, for the most part, categorized American efforts as “massive retaliation” and “mutually assured destruction,” blunt instruments to be casually dismissed in favor of more flexible approaches or summed up in inflammatory and judgmental terms like “MAD.” These descriptors evolved into slogans, and any nuanced discussion of the efficacy of the actual strategies withered due to a variety of political and social factors. Drawing on newly released weapons effects information along with new information about Soviet capabilities as well as risky and covert espionage missions, Emergency War Plan provides a completely new examination of

American nuclear deterrence strategy during the first fifteen years of the Cold War, the first such study since the 1980s. Ultimately what emerges is a picture of a gargantuan and potentially devastating enterprise that was understood at the time by the public in only the vaguest terms but that was not as out of control as has been alleged and was more nuanced than previously understood.
