Hook Point Brendan Kane,2020-09-29 Hook Point: How to Stand Out in a 3-Second World, by out of the box thinker Brendan Kane, breaks down the most effective strategies to generate new opportunities, innovate and scale your business, and create a compelling brand--both online and off--so you can thrive in the new micro-attention world in which we live. A lot of people know who they are, what they do, and a few even know why they do it--but even when brands or individuals have clarity in these areas, they often struggle to grab a potential audience's attention for long enough to get them to learn about their attributes. Others have amazing products or services that fail to achieve great success because they don't know how to talk about what they do effectively. This is because digital and social media have reshaped our world into one of micro-attention. There are over sixty billion messages shared on digital platforms each day, and the average person is exposed to between four thousand to ten thousand ads a day. This bombardment of stimuli has changed the way we communicate and market content both online and off. In fact, research shows that you have less than three seconds to capture a person's attention. With such a short window of time, we need to hook audiences quickly, efficiently, and consistently if we want to successfully fuel brand awareness and growth. Luckily, Brendan Kane, an out of the box thinker and strategist who's built platforms for celebrities like Taylor Swift and Rhianna, and worked with Fortune 500 companies like Paramount, Viacom, and MTV has mastered the art of standing out. In Hook Point: How to Stand Out in a 3-Second World he reveals the power of hook points--a communication tool that helps marketers package their messages in a succinct, attention-grabbing way that leads to better opportunities both online and off. Whether you're promoting a brand, product, or service this book is the essential guide for making it in our three-second world.

Drawing Futures Bob Sheil,Frédéric Migayrou,Luke Pearson,Laura Allen,2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture.Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie.Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

The Ash Warriors C. R. Anderegg,2000 In November 1991 the American flag was lowered for the last time at Clark Air Base in the Philippines. This act brought to an end American military presence in the Philippines that extended back over 90 years. It also represented the final act in a drama that began with

the initial rumblings in April of that year of the Mount inatubo volcano, located about nine miles to the east of Clark. This book tells the remarkable story of the men and women of the Clark community and their ordeal in planning for and carrying out their evacuation from Clark in face of the impending volcanic activity. It documents the actions of those who remained on the base during the series of Mount Pinatubo' s eruptions, and the packing out of the base during the subsequent months. This is the story of the Ash Warriors, those Air Force men and women who carried out their mission in the face of an incredible series of natural disasters, including volcanic eruption, flood, typhoons, and earthquakes, all of which plagued Clark and the surrounding areas during June and July 1991.
