Get Good with Money Tiffany the Budgetnista Aliche,2021-03-30 NEW YORK TIMES, WALL STREET JOURNAL, AND USA TODAY BESTSELLER • A ten-step plan for finding peace, safety, and harmony with your money—no matter how big or small your goals and no matter how rocky the market might be—by the inspiring and savvy “Budgetnista.” “No matter where you stand in your money journey, Get Good with Money has a lesson or two for you!”—Erin Lowry, bestselling author of the Broke Millennial series Tiffany Aliche was a successful pre-school teacher with a healthy nest egg when a recession and advice from a shady advisor put her out of a job and into a huge financial hole. As she began to chart the path to her own financial rescue, the outline of her ten-step formula for attaining both financial security and peace of mind began to take shape. These principles have now helped more than one million women worldwide save and pay off millions in debt, and begin planning for a richer life. Revealing this practical ten-step process for the first time in its entirety, Get Good with Money introduces the powerful concept of building wealth through financial wholeness: a realistic, achievable, and energizing alternative to get-rich-quick and over-complicated money management systems. With helpful checklists, worksheets, a tool kit of resources, and advanced advice from experts who Tiffany herself relies on (her “Budgetnista Boosters”), Get Good with Money gets crystal clear on the short-term actions that lead to long-term goals, including: • A simple technique to determine your baseline or “noodle budget,” examine and systemize your expenses, and lay out a plan that allows you to say yes to your dreams. • An assessment tool that helps you understand whether you have a “don't make enough” problem or a “spend too much” issue—as well as ways to fix both. • Best practices for saving for a rainy day (aka job loss), a big-ticket item (a house, a trip, a car), and money that can be invested for your future. • Detailed advice and action steps for taking charge of your credit score, maximizing bill-paying automation, savings and investing, and calculating your life, disability, and property insurance needs. • Ways to protect your beneficiaries' future, and ensure that your financial wishes will stand the test of time. An invaluable guide to cultivating good financial habits and making your money work for you, Get Good with Money will help you build a solid foundation for your life (and legacy) that’s rich in every way.

Lions' Commentary on UNIX 6th Edition with Source Code John Lions,1996-01-01 For the past 20 years, UNIX insiders have cherished and zealously guarded pirated photocopies of this manuscript, a hacker trophy of sorts. Now legal (and legible) copies are available. An international who's who of UNIX wizards, including Dennis Ritchie, have contributed essays extolling the merits and importance of this underground classic.

Silicon Photonics II David J. Lockwood,Lorenzo Pavesi,2010-10-13 This book is volume II of a series of books on silicon photonics. It gives a fascinating picture of the state-of-the-art in silicon photonics from a component perspective. It presents a perspective on what can be expected in the near future. It is formed from a selected number of reviews authored by world leaders in the field, and is written from both academic and industrial viewpoints. An in-depth discussion of the route towards fully integrated silicon photonics is presented. This book will be useful not only to physicists, chemists, materials scientists, and engineers but also to graduate students who are interested in the fields of micro- and nanophotonics and optoelectronics.

Aquaphotomics for Bio-diagnostics in Dairy Roumiana Tsenkova,Jelena Muncan,2021-11-15 This book is the result of more than 20 years of experience in working with near-infrared spectroscopy for raw milk analysis. The totality of this work presents extensive possibilities for milk spectral measurements that can be carried out in dairy. Moving beyond the standard milk components such as fat, protein, or lactose, this book presents near-infrared spectroscopy as a method that can also be used in disease diagnostics. The measurements and experimental results presented here are all based on the utilization of usually neglected near-infrared regions—regions with strong absorbance of water. The author has found the water – light interaction discussed to be an immensely rich source of information, not only on milk composition but also on the physiological status of the animals involved. A special section of the book is dedicated to exploration of potential interfering factors that may influence the analysis and contribute to the robustness of the models. The research described in this book served as a basis for the development of the novel discipline aquaphotomics and is of interest to anyone working in this field.
