Cool Stuff Exploded Chris Woodford, 2011-07-18 The third installment of DK's Cool Stuff series will blow your mind. Cool Stuff Exploded is a super-cool technology book that deconstructs - or literally explodes - everyday objects so readers can see exactly how they work. See a piece-by-piece breakdown of cell phones, computers, cars, and more, and learn how each part works and how they all fit together as a whole. This unique look at the items we use every day brings science, technology, and wonder together, giving us all a great appreciation for how our twenty-first-century world works.

European Clocks and Watches in The Metropolitan Museum of Art Clare Vincent, Jan Hendrik Leopold, Elizabeth Sullivan, 2015-11-25 Among the world's greatest technological and imaginative achievements is the invention and development of the timepiece. Examining for the first time The Metropolitan Museum of Art's unparalleled collection of European clocks and watches created from the late Renaissance through the nineteenth century, this fascinating book enriches our understanding of the origins and evolution of these ingenious works. It showcases fifty-four clocks, watches, and other timekeeping devices, each represented with an in-depth description and new photography of the exterior and the inner mechanisms. Among these masterpieces is an ornate sixteenth-century celestial timepiece that accurately predicts the trajectory of the sun, moon, and stars; an eighteenth-century longcase clock by David Roentgen that shows the time in the ten most important cities of the day; and a nineteenth-century watch featuring a penetrating portrait of Czar Nicholas I of Russia. Created by the best craftsmen in Austria, England, Flanders, France, Germany, Italy, the Netherlands, and Switzerland, these magnificent timepieces have been selected for their remarkable beauty and design, as well as their sophisticated mechanics. Built upon decades of expert research, this publication is a long-overdue survey of these stunning visual and technological marvels.

Gravity Laurentiu Mihaescu, 2019-04-15 Here is an addendum to the Prime Theory trilogy, a new book that is in fact a collection of the most important articles I wrote to complete this new vision on physics. Gravity brings numerous clarifications and enhancements to my previous models of space, fields, particles and to the interactions described by the granular mechanics.

History of the 101st Airborne Division Colonel Robert E. Jones, 2010-05-17 The History of the 101st Airborne Division is the epic story of the Division from its activation in August 1942 through the completion of Operation Desert Storm in April 1991. The Division's progression through the sky took decades of hard work and tens of thousands of dedicated soldiers. In World War II, the 101st became the first American troops to set foot in occupied France, when, on 6 June

1944, its paratroopers dropped behind enemy lines, clearing the way for the 4th Infantry Division landing on Utah Beach. The Division would become famous for its work in Holland during Operation Market Garden, and for its successful defense of Bastogne, Belgium, during the Battle of the Bulge. In Vietnam, the “Screaming Eagles” engaged in battle from 1965 to 1972, when they began their evolution to Air Mobile by deploying by helicopter. In the Gulf War, the Division fired the first shots of Operation Desert Storm by destroying Iraqi radar sites, and during ground war of the operation, they made the longest and largest air assault in history. In every engagement and during the training periods in between, the 101st Airborne Division has honored the words of its first commander, General William C. Lee, that it has a “rendezvous with destiny.” This book is a fitting record of that history, and of the men who are proud to be called “Screaming Eagles.”

Boater's Bowditch: The Small Craft American Practical Navigator Richard Keith Hubbard, 2000-06-20 Emphasizing the visual and graphic techniques of navigation, Boater's Bowditch is a small-boat adaptation of the world's most trusted navigation reference, the U.S. government's American Practical Navigator (Bowditch for short). Now in handy paperback with hundreds of new diagrams and photographs, including a 16-page color insert, this book is a pleasure to use. It covers piloting, celestial navigation, marine weather, and all modern methods of electronic navigation, such as GPS and electronic charts. The Boater's Bowditch is an indispensable resource for beginning and advanced navigators, whether in sail- or powerboats, inshore or offshore.

The History of Clocks and Watches Kenneth F. Welch, 1972

Bill & Dave Michael Shawn Malone, 2007 The definitive history of Hewlett-Packard and its legendary founders, based on unprecedented access to private archives. This is the most authoritative version ever of the most famous start-up story in business history. In 1938, working out of a small garage in Palo Alto, California, two young Stanford graduates named Bill Hewlett and Dave Packard built their first product, an audio oscillator. It was the start not only of a legendary company but of an entire way of life in Silicon Valley'and, ultimately, our modern digital age. Others have written about the rise of Hewlett-Packard, including Packard himself in a bestselling memoir. But acclaimed journalist Michael S. Malone is the first to get the full story, based on unlimited and exclusive access to corporate and private archives, along with hundreds of employee interviews. Malone draws on his new material to show how some of the most influential products of our time were invented, and how a culture of innovation led HP to unparalleled success for decades. He also shows what was really behind the groundbreaking management philosophy'the HP Way'that put people ahead of products or profits. There have been attempts in recent years to discredit the HP Way as soft and outdated. But Malone argues that the HP Way was a hard-nosed business philosophy that combined simple objectives, trust in employees to make the right choices, and ruthless self-appraisal. It created an innovative and ferociously competitive company'arguably the world's greatest company. This business adventure story will be perfect for entrepreneurs, young managers, and students, not to mention the tens of thousands of current and former HP employees.

In the Eyes of the Dragon Yong Deng, 2000-01-01 Presenting new and invaluable Chinese perspectives on international relations in general and Beijing's foreign policy in particular, this work offers the first balanced and thoroughly researched analysis by Chinese scholars. Drawing on original Chinese sources and

interviews, *In the Eyes of the Dragon* explores Chinese views on sovereignty, national interest, security multilateralism, international human rights, nuclear nonproliferation, Taiwan, and the United States.

Challenging nuclearism Marianne Hanson,2022-05-31 *Challenging nuclearism* explores how a deliberate ‘normalisation’ of nuclear weapons has been constructed, why it has prevailed in international politics for over seventy years and why it is only now being questioned seriously. The book identifies how certain practices have enabled a small group of states to hold vast arsenals of these weapons of mass destruction and how the close control over nuclear decisions by a select group has meant that the humanitarian consequences of nuclear weapons have been disregarded for decades. The recent UN Treaty on the Prohibition of Nuclear Weapons will not bring about quick disarmament. It has been decried by the nuclear weapon states. But by rejecting nuclearism and providing a clear denunciation of nuclear weapons, it will challenge nuclear states in a way that has until now not been possible. *Challenging nuclearism* analyses the origins and repercussions of this pivotal moment in nuclear politics.
