*100 Words To Make You Sound Smart* American Heritage Dictionaries,2006-10-04 Find the right words to make a point, seal the deal, or just keep folks listening! Chosen by the editors of the American Heritage Dictionaries, these words can help anyone who wants to be a more compelling communicator—as a worker, consumer, advocate, friend, dinner companion, or even romantic prospect. The book includes a colorful variety of words, including handy words of just one syllable (such as glib) and words derived from the names of famous people (such as Freudian slip and Machiavellian). There are expressions from popular culture (Catch-22) and words that date back to classical civilization (spartan and stoic). Each word is clearly defined and shown in context with quotations from magazines, newspapers, broadcast media, movies, and television. For many words, quotations from distinguished authors and speakers are also given and word histories are explained. *100 Words to Make You Sound Smart* provides an enjoyable way to communicate more effectively, distinctively, and articulately.

**The Fundamentals of Figure Drawing** Barrington Barber,2017-06-13 The ability to draw the human form accurately and competently is a primary goal for many aspiring artists, despite the current trend in the art establishment away from figurative subjects. The book is intended for anyone who wants to discover every aspect of what for centuries was regarded as the real test of an artist's mettle. Renowned teacher and artist Barrington Barber begins his exploration with anatomy, an understanding which is vital if the artist is to handle form and translate what he sees into a believable representation of life. He goes on to look at the whole figure: clothed, drawn from life, in action and in detail. Supported by sections on composition, styles and a step-by-step guide to a final composition, he has once again achieved a brilliantly inspirational art book. Comprehensive, easy to follow and packed with over 300 of Barrington Barber's illustrations, *The Fundamentals of Figure Drawing* is a must for artists of all abilities.

E-Business Essentials Nick Bontis,2004-09-01 This special issue of QJEC marks the final instalment of the journal. The QJEC has had a long-standing history of international scholarship focused on the emerging field of electronic commerce with a broad, interdisciplinary approach. It has established the field's intellectual foundation with state-of-the-art research from business, computer science, engineering, law, psychology, and sociology. This particular issue focuses on an eclectic group of papers that are international in scope with authors from Canada, Australia, France, Germany, South Africa and Italy. The papers range in topics from valuing dot com companies, to mobile health and portals, to supply chain management.

*The Stoic Tradition from Antiquity to the Early Middle Ages* Marcia L. Colish,1990-01-01 Volume one, Stoicism in classical Latin literature (09327-3), approaches its subject from the standpoint of intellectual history, examining how Stoicism was used by Roman thinkers, for what purposes, and how they correlated it with their other sources. Volume two, Stoicism in Christian Latin thought through the sixth century, (09328-1), focuses on how a particular Latin Christian author used Stoic ideas, to what ends, and how they were associated in his mind with the other doctrines he had to work with. **Emotions in Ancient and Medieval Philosophy** Professor of Theological Ethics and the Philosophy of Religion Simo Knuuttila, Simo Knuuttila, 2004 The first part of the book covers the theories of the emotions of Plato and Aristotle and later ancient views from Stoicism to Neoplatonism (Ch. 1) and their reception and transformation by early Christian thinkers from Clement and Origen to Gregory of Nyssa, Cassian and Augustine (Ch. 2). The basic ancient alternatives were the compositional theories of Plato and Aristotle and their followers and the Stoic judgement theory. These were associated with different conceptions of philosophical therapy. Ancient theories were employed in early Christian discussions of sin, Christian love, mystical union, and other forms of spiritual experience. The most influential theological themes were the monastic idea of supernaturally caused feelings and Augustine's analysis of the relations between the emotions and the will. The first part of Ch. 3 deals with the twelfth-century reception of ancient themes through monastic, theological, medical, and philosophical literature. The subject of the second part is the theory of emotions in Avicenna's faculty psychology, which, to a great extent, dominated the philosophical discussion of emotions in early thirteenth century. This approach was combined with Aristotelian ideas in later thirteenth century, particularly in Thomas Aquinas' extensive taxonomical theory. The increasing interest in psychological voluntarism led many Franciscan authors to abandon the traditional view that emotions belong only to the lower psychosomatic level. John Duns Scotus, William Ockham and their followers argued that there are also emotions of the will. Chapter 4 is about these new issues introduced in early fourteenth-century discussions, with some remarks on their influence on early modern thought.

*Sports Cardiology Casebook* Antonio Pelliccia, 2009-07-21 Comparatively little is known about the risk of sudden death associated with exercise in young competitive athletes, and whether the benefits of sports activity outweigh the hazards of exercise-related fatal events is a clinical dilemma. This is only a small part of the story, however, as there are considerable effects of exercise whether it be at a competitive level or on a 'leisure' level on patients of all ages. This in itself is of massive importance to the cardiac patient population as exercise is a key component of effective recovery and recommended as central in the prevention of much cardiac disease.

**Guidance of Young Children** Marian Marion, 2015 Written in a conversational style, yet solidly grounded in child development theory and research, *Guidance of Young Children*, 9/e focuses on positive and developmentally appropriate child guidance, while encouraging reflection, opportunities for applying knowledge, and the ability to make intentional and wise child guidance decisions. Based on the author's belief that adults need to have realistic expectations of children, the book emphasizes understanding young children's development, using a developmentally appropriate approach to guidance, and thinking critically in making wise guidance decisions. Invigorate learning with the Enhanced Pearson eText The Enhanced Pearson eText provides a rich, interactive learning environment designed to improve student mastery of content with the following multimedia features: Embedded video links in each chapter illustrate key concepts and strategies. (See pages 198, 212, and 280 for examples.) Questions for Reflection provoke students to think about past experiences, their thoughts about appropriate practice, or feelings about a situation. (See pages 43, 79, and 212 for examples.) Focus on Practice boxes are video-based learning experiences with questions that help students to deepen their understanding of theory and practice. (See pages 26, 81, and 189 for examples.) NAEYC Standards and Key Elements that pertain to each chapter are embedded in the eText so students can connect these standards to their practice. *Environmental Justice and Sustainability in the Former Soviet Union* Julian Agyeman, Yelena Ogneva-Himmelberger, 2009 An examination of the awareness of environmental and social justice issues in the former Soviet republics--from the Western-style democracies of the Baltic region to the totalitarian regimes of Central Asia--and the resulting activism in those states. The legacy of environmental catastrophe in the states of the former Soviet Union includes desertification, pollution, and the toxic aftermath of industrial accidents, the most notorious of which was the Chernobyl disaster of 1986. This book examines the development of environmental activism in Russia and the former Soviet republics in response to these problems and its effect on policy and planning. It also shows that because of increasing economic, ethnic, and social inequality in the former Soviet states, debates over environmental justice are beginning to come to the fore. The book explores the varying environmental, social, political, and economic circumstances of these countries--which range from the Western-style democracies of the Baltic states to the totalitarian regimes of Central Asia--and how they affect the ecological, environmental, and public health. Among the topics covered are environmentalism in Russia (including the progressive nature of its laws on environmental protection, which are undermined by overburdened and underpaid law enforcement); the effect of oil wealth on Azerbaijan and Kazakhstan; the role of nationalism in Latvian environmentalism; the struggle of Russia's indigenous peoples for environmental justice; public participation in Estonia's environmental movement; and lack of access to natural capital in Tajikistan. *Environmental Justice and Sustainability in the Former Soviet Union* makes clear that although fragile transition economies, varying degrees of democratization, and a focus on national security can stymie progress toward just sustainability, the diverse states of the former Soviet Union are making some progress toward green and environmental justice issues.
