Opening Doors to a Richer English Curriculum for Ages 6 to 9 (Opening Doors series) Verity Jones, Leah Crawford, Bob Cox, 2019-10-14 Opening Doors to a Richer English Curriculum for Ages 6 to 9 takes Bob Cox's award-winning 'Opening Doors' series into bold new territories, providing a treasury of techniques and strategies all carefully selected to support the design of a deeper, more creative and more expansive curriculum. Together with Leah Crawford and Verity Jones, Bob has compiled this rich resource to help teachers enhance their learners' engagement with challenging texts and develop their writing skills as budding wordsmiths. It includes 15 ready-to-use units of work covering a range of inspiring poetry and prose from across the literary tradition, complete with vivid illustrations by Victoria Cox. Bob, Leah and Verity's

innovative ideas on theory, best practice and how to cultivate a pioneering classroom spirit are all integrated into the lesson suggestions, which have been designed for both the teacher's and the learners' immediate benefit. Together they empower teachers to explore with their learners the scope and depth of literature capable of inspiring high standards and instilling a love of language in its many forms. Furthermore, they help teachers to lay down intricate curricular pathways that will prompt their pupils to better enjoy literature, read and analyse texts with a greater sense of curiosity, and write with more originality. The book includes a great range of texts both as the core of each unit and as link reading, incorporating some contemporary texts to show how past and present co-exist and how various literary styles can be taught using similar principles, all of which are open to further adaptation. The authors have also suggested key concepts around which the curriculum can be built, with the units providing examples with which you can work. All of the extracts and illustrations you will need in order to begin opening doors in your classroom are downloadable, and the book also includes a helpful glossary of key terms.

Fruit Blasterz from Outer Space Brooke Stauffer, 1993
Standing on the kitchen counter is the four-inch figure of Gregory's favorite cartoon character, and two other characters. On TV they are the Blasterz from Space, peace-loving warriors who protect the Earth from the evil Oxymorons. But this isn't TV, and these Blasterz are up to no good. They have their own evil plan for Earth, and unless Gregory can outsmart them and thousands more on the way, it may mean disaster!

Anatomy of Spirituality: Portrait of the Soul Chander Behl,2015-04-27 The domain of spirituality, separated from its theological overburden, believes in the existence of a spiritual self, presumed to be distinctly separate from the psychological self. The spiritual eternal self, also known as the soul or spirit (sometimes supported by an overarching Spirit), is asserted to be operating behind the ephemeral self. This book takes a contrarian stance; it argues that the premise of the soul concept is obtained through the magic of language, maintained through the marvel of the brain's biochemistry, and sustained through the mirage of the psychological juggernauts of the brain. The magic, the marvel and the mirage, together, bring about subtle shifts as the linguistic brain suppresses many psychological details, habitually applies mental templates such as inversions and dichotomies, and enhances its language by coining religious and spiritual metaphors. The consequence of these changes is that the usual flickering self begins to be impressed by itself, believing it is buttressed by something transcendental and eternal within: the soul or the spirit. The self, although indoctrinated during its formative years, also begins to assimilate and accept the opinion that the overwhelming weight of religious doctrines and dogmas, the overburden, signifies as the legitimate proof for the eternal soul.

Plant Animal Interactions Carlos M. Herrera, Olle Pellmyr, 2009-04-13 Interactions between plants and animals are incredibly diverse and complex and span terrestrial, atmospheric and aquatic environments. The last decade has seen the emergence of a vast quantity of data on the subject and there is now a perceived need among both teachers and undergraduate students for a new textbook that incorporates the numerous recent advances made in the field. The book is intended for use by advanced level undergraduate and beginning graduate students, taking related courses in wider ecology degree programmes. Very few books cover this subject and those that do are out of date.
