The Bug Light Room Gregg McManus,2020-11-22 With so much apparent alien activity and presence on our planet, what would happen if an American actually took a swing at a UFO and landed a punch? Who in Washington would take that call? What would such a government agency look like? How would it function in such a crisis? How would the aliens respond? This is the nexus of this novel. This disaster occurs in Indiana's Hoosier National Forest two weeks before a close Presidential election. The incumbent President tries to keep a lid on the events that start erupting in southern Indiana in the wake of the UFO's destruction. The aliens pursue the wannabe militia-men Jimmie Hatter and his buddy Brian Spangle who inadvertently destroyed an alien space craft. But so does a super-secret U.S. agency called ORA (Office of Retrieval and Analysis). The frantic search for the perpetrators is punctuated by explosions, firestorms and mysterious deaths the President and ORA seek to keep under wraps two weeks before the election. At the same time Indiana's Governor Kasson of the opposite party senses a cover-up revolving around the mysterious and frightening happenings in his state and tries to unmask them to benefit his own re-election and elevate his standing by bringing down the President. In this riveting narrative, the author connects the dots regarding phenomenon reported by Americans for decades but denied by authorities. The narrative evokes some unsettling possibilities about the presence of aliens, strange creatures and what may be the real reasons behind the alien presence on earth. In the mayhem of events in this novel, will these secrets be revealed? Will the President be re-elected? Will Governor Kasson triumph? How prepared are we for the alien challenge? And what happens to our hapless, inadvertent protagonists Jimmie and Brian; two sympathetic, deplorable roofers who just wanted to defend the country, but must flee for their lives.

IJER Vol 10-N2 International Journal of Educational Reform,2001-05-09 The mission of the International Journal of Educational Reform (IJER) is to keep readers up-to-date with worldwide developments in education reform by providing scholarly information and practical analysis from recognized international authorities. Attack of the New B Movies Justin Wigard,Mitch Ploskonka,2023-04-14 Since its inception in 1992, the Sci-Fi Channel (later rebranded as SYFY) has aired more than 500 network-produced or commissioned films. Campy and prolific, the network churned out one low-budget film after another, finally finding its zenith in the 2013 release of Sharknado. With unpretentious charm and a hearty helping of commodified nostalgia, the Sharknado franchise briefly ruled the cultural consciousness and temporarily transformed SYFY's original films from cult fringe to appointment television. Naturally, the network followed up with a steady stream of sequels and spin-offs, including Lavalantula and its sequel, 2 Lava 2 Lantula! This collection of essays is the first to devote critical attention to SYFY's original film canon, both pre- and post-Sharknado. In addition to unpacking the cultural, historical and critical underpinnings of the monsters at the heart of SYFY's classic creature features, the contributors offer a variety of approaches to understanding and interrogating these films within the broader contexts of ecocriticism, monster theory, post-9/11 criticism, and neocolonialism. Providing a further entry point for future scholarship, an appendix details a thorough filmography of SYFY's original films from 1992 to 2022.
