Potato Biology and Biotechnology Dick Vreugdenhil,John Bradshaw,Christiane Gebhardt,Francine Govers,Mark A. Taylor,Donald K.L. MacKerron,Heather A. Ross,2011-08-31 In the past 15-20 years major discoveries have been concluded on potato biology and biotechnology. Important new tools have been developed in the area of molecular genetics, and our understanding of potato physiology has been revolutionized due to amenability of the potato to genetic transformation. This technology has impacted our understanding of the molecular basis of plant-pathogen interaction and has also opened new opportunities for the use of the potato in a variety of non-food biotechnological purposes. This book covers the potato world market as it expands further into the new millennium. Authors stress the overriding need for stable yields to eliminate human hunger and poverty, while considering solutions to enhance global production and distribution. It comprehensively describes genetics and genetic resources, plant growth and development, response to the environment, tuber quality, pests and diseases, biotechnology and crop management. Potato Biology is the most valuable reference available for all professionals involved in the potato industry, plant biologists and agronomists. Offers an understanding of the social, economic and market factors that influence production and distribution Discusses developments and useful traits in transgenic biology and genetic engineering The first reference entirely devoted to understanding new advances in potato biology and biotechnology

**The Passing-on of Knowledge** Max Kreijn,2010-04-02 Assuming 'God' as in 'God will provide' is the biggest excuse used in the last two thousand years or more, Anthony Ramekin sets about using his extensive contacts in the art-world, which he has been part of for more than twenty five years, to facilitate the rise and rise of a brilliant young photographer, Dorian Grey, his lover . Soon he realizes that the knowledge he is passing on, comes in equal measurements to the wisdom, love and fast mind of someone so much younger than himself. As Oscar Wilde so famously said: 'I'm not young enough to know everything...' Scandal, sets off a useful precedent for the people's interest in imagery, which somehow strikes a chord deep in their hearts. This is, after all, a love story, set in some of the world's great cities and Grand Hotels. The 'Hotel de l'Europe' in Amsterdam, the 'Cloitre de St.Louis' in Avignon, the 'Grand Hotel Wagner' in Palermo, The 'Hotel des Bains' in Venice. Berlin, London, Cordoba in Southern Spain, Monreale in Sicily and Bangkok all pass by. 'Recognizing fresh talent is not an act of abuse, ' Anthony is heard to say at some press-conference, beleaguered by tabloid scribblers, 'but can be gentle and enrich everybody's life.' Soon Dorian is working on his second book of photographs, cataloguing first love between two under-aged boys, with two of Luchino Visconti's most famous films, 'The Leopard' and 'Death in Venice' as background. Again Anthony is facilitating this new love-affair, which takes on an integral part of the story. Soon they realize they have a worldwide best-seller on their hands.

Multiple Criteria Decision Aiding Constantin Zopounidis,2012 The changes in the technological and business environment have complicated the nature of the decision-making process in real-world problems, thus motivating the development of new operations research (OR) methodologies. The traditional OR context is usually based on a single objective approach using profit (cost) maximisation (minimisation) criteria. However, it is now widely acknowledged that such an approach overlooks additional factors which are also highly relevant in a decision-making context. This book presents the recent advances to the theory of multicriteria analysis, covering all its major aspects in a unique edited volume.
