Folk Religion in Japan Ichiro Hori,1974 Ichiro Hori's is the first book in Western literature to portray how Shinto, Buddhist, Confucian, and Taoist elements, as well as all manner of archaic magical beliefs and practices, are fused on the folk level. Folk religion, transmitted by the common people from generation to generation, has greatly conditioned the political, economic, and cultural development of Japan and continues to satisfy the emotional and religious needs of the people. Hori examines the organic relationship between the Japanese social structure—the family kinship system, village and community organizations—and folk religion. A glossary with Japanese characters is included in the index.

Affordable and Clean Energy Walter Leal Filho,Anabela Marisa Azul,Luciana Brandli,Amanda Lange Salvia,Tony Wall,2021-01-10 The problems related to the process of industrialisation such as biodiversity depletion, climate change and a worsening of health and living conditions, especially but not only in developing countries, intensify. Therefore, there is an increasing need to search for integrated solutions to make development more sustainable. The United Nations has acknowledged the problem and approved the “2030 Agenda for Sustainable Development”. On 1st January 2016, the 17 Sustainable Development Goals (SDGs) of the Agenda officially came into force. These goals cover the three dimensions of sustainable development: economic growth, social inclusion and environmental protection. The Encyclopedia of the UN Sustainable Development Goals comprehensively addresses the SDGs in an integrated way. The Encyclopedia encompasses 17 volumes, each one devoted to one of the 17 SDGs. This volume addresses SDG 7, namely Ensure access to affordable, reliable, sustainable and modern energy for all” and contains the description of a range of terms, which allow a better understanding and foster knowledge. Energy is crucial for achieving almost all others SDGs, from its role in the eradication of poverty through advancements in health, education, water supply and industrialization, to combating climate change. This book presents a set of papers on the state-of-the-art of knowledge and practices about energy sustainable, in terms of generation and demand energy, considering aspects of innovation, management, sources of energy, performance, society behavior, and infrastructure, among others. Concretely, the defined targets are: Ensure universal access to affordable, reliable and modern energy services Increase substantially the share of renewable energy in the global energy mix Double the global rate of improvement in energy efficiency Enhance international cooperation to facilitate access to clean energy research and technology, including renewable energy, energy efficiency and advanced and cleaner fossil-fuel technology, and promote investment in energy infrastructure and clean energy technology Expand infrastructure and upgrade technology for supplying modern and sustainable energy services for all in developing countries, in particular least developed countries, small island developing states and landlocked developing countries, in accordance with their respective programmes of support Editorial Board Md. Harem Years Huda Shaarawi, 2015-04-03 A firsthand account of the private world of a harem in colonial Cairo—by a groundbreaking Egyptian feminist who helped liberate countless women. In this compelling memoir, Shaarawi recalls her childhood and early adult life in the seclusion of an upper-class Egyptian household, including her marriage at age thirteen. Her subsequent separation from her husband gave her time for an extended formal education, as well as an unexpected taste of independence. Shaarawi's feminist activism grew, along with her involvement in Egypt's nationalist struggle, culminating in 1923 when she publicly removed her veil in a Cairo railroad station, a daring act of defiance. In this fascinating account of a true original feminist, readers are offered a glimpse into a world rarely seen by westerners, and insight into a woman who would not be kept as property or a second-class citizen.

Three-Dimensional Computer Vision Yoshiaki Shirai, 2012-12-06 The purpose of computer vision is to make computers capable of understanding environments from visual information. Computer vision

has been an interesting theme in the field of artificial intelligence. It involves a variety of intelligent information processing: both pattern processing for extraction of meaningful symbols from visual information and symbol processing for determining what the symbols represent. The term 3D computer vision is used if visual information has to be interpreted as three-dimensional scenes. 3D computer vision is more challenging because objects are seen from limited directions and some objects are occluded by others. In 1980, the author wrote a book Computer Vision in Japanese to introduce an interesting new approach to visual information processing developed so far. Since then computer vision has made remarkable progress: various rangefinders have become available, new methods have been developed to obtain 3D information, knowledge representation frameworks have been proposed, geometric models which were developed in CAD/CAM have been used for computer vision, and so on. The progress in computer vision technology has made it possible to understand more complex 3D scenes. There is an increasing demand for 3D computer vision. In factories, for example, automatic assembly and inspection can be realized with fewer constraints than conventional ones which employ two-dimensional computer vision.
