*DIY Media* Michele Knobel, Colin Lankshear, 2010 Schools remain notorious for co-opting digital technologies to «business as usual» approaches to teaching new literacies. *DIY Media* addresses this issue head-on, and describes expansive and creative practices of digital literacy that are increasingly influential and popular in contexts beyond the school, and whose educational potential is not yet being tapped to any significant degree in classrooms. This book is very much concerned with engaging students in do-it-yourself digitally mediated meaning-making practices. As such, it is organized around three broad areas of digital media: moving media, still media, and audio media. Specific DIY media practices addressed in the chapters include machinima, anime music videos, digital photography, podcasting, and music remixing. Each chapter opens with an overview of a specific DIY media practice, includes a practical how-to tutorial section, and closes with suggested applications for classroom settings. This collection will appeal not only to educators, but to anyone invested in better understanding - and perhaps participating in - the significant shift towards everyday people producing their own digital media.

**Pop Music: Technology and Creativity - Trevor Horn and the Digital Revolution** Timothy Warner, 2018-01-18 This title was first published in 2003. This highly original and accessible book draws on the author's personal experience as a musician, producer and teacher of popular music to discuss the ways in which audio technology and musical creativity in pop music are inextricably bound together. This relationship, the book argues, is exemplified by the work of Trevor Horn, who is widely acknowledged as the most important, innovative and successful British pop record producer of the early 1980s. In the first part of the book, Timothy Warner presents a

definition of pop as distinct from rock music, and goes on to consider the ways technological developments, such as the transition from analogue to digital, transform working practices and, as a result, impact on the creative process of producing pop.

This book, like the previous edition, takes the wisdom of some of the best shooters and empowers you to create visually stunning images with low budget cinema cameras. It includes six all new case studies, as well as updated examples from short films and documentaries. This book contains the essential tools to make you a better visual storyteller. **FEATURES** An examination of the creative and technical choices filmmakers face—everything from why we move cameras to shooting flat in order to widen the dynamic range of cameras Case studies from documentary filmmakers, news shooters, fiction makers, a visual anthropologist, and recent film school graduates An updated list of gear for low-budget filmmakers, including a section on what to look for in the gear you need to shoot and edit your projects
