Introduction to Multimedia Systems Gaurav Bhatnagar, Shikha Mehta, Sugata Mitra, 2002 Introduction to Multimedia Systems is designed to be a general introduction to the broad field of multimedia... more specifically digital interactive multimedia. The editors have included topics such as the principles of multiple and media, including sound, two-dimensional and three-dimensional graphics, animation, and text. All of these elements are stitched together by the programmer, or multimedia designer, based on the conceptualization of the designer. In order to take full advantage of the potential for a wide array of multimedia applications it is important to have a broad understanding of the principles of various media. The person preparing a multimedia package, which may include such media as sound, computer graphics, and software, will most likely have a strong background in only one or perhaps none of the media to be used. Introduction to Multimedia Systems has been developed to be the first place to turn, both as an introductory textbook or as a professional reference for anyone diving into multimedia preparation. Multimedia is first and foremost a medium of communication. In order to take advantage of the nearly unlimited potential provided by digital environments a full survey of multimedia capabilities is covered in this book. Website Feature: Learning by doing! The editors currently use the book in combination with a wide array of sample software and weblinks for students to learn how to build by example. Each part of the book will have a direct link to a publicly accessible website that will maintain these available software tools. The weblinks will be updated as software versions advance, and most of the software involves demo or scaled down versions of commercially available multimedia design software/editing tools. This is a carefully written and edited book specifically designed to be a general introduction to the broad field of multimedia Covers all the general topics of multimedia namely the principles of 'multiple' and 'media', including sound, 2D and 3D graphics, animation and text
