Content-Based Audio Classification and Retrieval for Audiovisual Data Parsing Tong Zhang,C.C. Jay Kuo,2013-03-09 Content-Based Audio Classification and Retrieval for Audiovisual Data Parsing is an up-to-date overview of audio and video content analysis. Included is extensive treatment of audiovisual data segmentation, indexing and retrieval based on multimodal media content analysis, and content-based management of audio data. In addition to the commonly studied audio types such as speech and music, the authors have included hybrid types of sounds that contain more than one kind of audio component such as speech or environmental sound with music in the background. Emphasis is also placed on semantic-level identification and classification of environmental sounds. The authors introduce a new generic audio retrieval system on top of the audio archiving schemes. Both theoretical analysis and implementation issues are presented. The developing MPEG-7 standards are explored. Content-Based Audio Classification and Retrieval for Audiovisual Data Parsing will be especially useful to researchers and graduate level students designing and developing fully functional audiovisual systems for audio/video content parsing of multimedia streams.

Audionarratology Jarmila Mildorf,Till Kinzel,2016-04-25 Audionarratology is a new 'postclassical' narratology that explores interfaces of sound, voice, music and narrative in different media and across disciplinary boundaries. Drawing on sound studies and transmedial narratology, audionarratology combines concepts from both while also offering fresh insights. Sound studies investigate sound in its various manifestations from disciplinary angles as varied as anthropology, history, sociology, acoustics, articulatory phonetics, musicology or sound psychology. Still, a specifically narrative focus is often missing. Narratology has broadened its scope to look at narratives from transdisciplinary and transmedial perspectives. However, there is a bias towards visual or audio-visual media such as comics and graphic novels, film, TV, hyperfiction and pictorial art. The aim of this book is to foreground the oral and aural sides of storytelling, asking how sound, voice and music support narrative structure or even assume narrative functions in their own right. It brings together cutting-edge research on forms of sound narration hitherto neglected in narratology: radio plays, audiobooks, audio guides, mobile phone theatre, performance poetry, concept albums, digital stories, computer games, songs.

The Perfect Sound Garrett Hongo,2022-02-22 A poet's audio obsession, from collecting his earliest vinyl to his quest for the ideal vacuum tubes. A captivating book that "ingeniously mixes personal memoir with cultural history and offers us an indispensable guide for the search of acoustic truth" (Yunte Huang, author of Charlie Chan). Garrett Hongo's passion for audio dates back to the Empire 398 turntable his father paired with a Dynakit tube amplifier in their modest tract home in Los Angeles in the early 1960s. But his adult quest begins in the CD-changer era, as he seeks out speakers and amps both powerful and refined enough to honor the top notes of the greatest opera sopranos. In recounting this search, he describes a journey of identity where meaning, fulfillment, and even liberation were often most available to him through music and its astonishingly varied delivery systems. Hongo writes about the sound of surf being his first music as a kid in Hawai'i, about doo-wop and soul reaching out to him while growing up among Black and Asian classmates in L.A., about Rilke and Joni Mitchell as the twin poets of his adolescence, and about feeling the pulse of John Coltrane's jazz and the rhythmic chords of Billy Joel's piano from his car radio while driving the freeways as a young man trying to become a poet. Journeying further, he visits devoted collectors of decades-old audio gear as well as designers of the latest tube equipment, listens to sublime arias performed at La Scala, hears a ghostly lute at the grave of English Romantic poet John Keats in Rome, drinks in wisdom from blues musicians and a diversity of poetic elders while turning his ear toward the memory-rich strains of the music that has shaped him: Hawaiian steel guitar and canefield songs; Bach and the Band; Mingus, Puccini, and Duke Ellington. And in the decades-long process of perfecting his stereo setup, Hongo also discovers his own now-celebrated poetic voice.

Audio Distortion: Journeys End Riley Morgan,Mike Fontenot,2020-03-05 Fame... Bright lights... Screaming fans... Life in the 'fast lane'... Seems even the strongest and best prepared eventually fall victim to them. Having found their way back to music and their friendships, each member of Audio Distortion develops their own ways of dealing with 'being famous' and 'living in the spotlight' for six years. This is the story of how our five accidental superstars find ways to balance 'famous' and 'normal' in their daily lives. It's also the story of how Audio Distortion comes to an end... Well... sorta...

Sound Streams Andrew J Bottomley,2020-06-01 In talking about contemporary media, we often use a language of newness, applying words like "revolution" and "disruption." Yet, the emergence of new sound media technologies and content—from the earliest internet radio broadcasts to the development of algorithmic music services and the origins of podcasting—are not a disruption, but a continuation of the century-long history of radio. Today's most innovative media makers are reintroducing forms of audio storytelling from radio's past. Sound Streams is the first book to historicize radio-internet convergence from the early '90s through the present, demonstrating how so-called new media represent an evolutionary shift that is nevertheless historically consistent with earlier modes of broadcasting. Various iterations of internet radio, from streaming audio to podcasting, are all new radio practices rather than each being a separate new medium: radio is any sound media that is purposefully crafted to be heard by an audience. Rather than a particular set of technologies or textual conventions, web-based broadcasting combines unique practices and features and ideas from radio history. In addition, there exists a distinctive conversationality and reflexivity to radio talk, including a propensity for personal stories and emotional disclosure, that suits networked digital media culture. What media convergence has done is extend and intensify radio's logics of connectivity and sharing; sonically mediated personal expression intended for public consideration abounds in online media networks. Sound Streams marks a significant contribution to digital media and internet studies. Its mix of cultural history, industry research, and genre and formal analysis, especially of contemporary audio storytelling, will appeal to media scholars, radio and podcast practitioners, audio journalism students, and dedicated podcast fans.

Lowering the Boom Jay Beck,2023-12-11 As the first collection of new work on sound and cinema in over a decade, Lowering the Boom addresses the expanding field of

film sound theory and its significance in rethinking historical models of film analysis. The contributors consider the ways in which musical expression, scoring, voice-over narration, and ambient noise affect identity formation and subjectivity. Lowering the Boom also analyzes how shifting modulation of the spoken word in cinema results in variations in audience interpretation. Introducing new methods of thinking about the interaction of sound and music in films, this volume also details avant-garde film sound, which is characterized by a distinct break from the narratively based sound practices of mainstream cinema. This interdisciplinary, global approach to the theory and history of film sound opens the eyes and ears of film scholars, practitioners, and students to film's true audio-visual nature. Contributors are Jay Beck, John Belton, Clark Farmer, Paul Grainge, Tony Grajeda, David T. Johnson, Anahid Kassabian, David Laderman, James Lastra, Arnt Maasø, Matthew Malsky, Barry Mauer, Robert Miklitsch, Nancy Newman, Melissa Ragona, Petr Szczepanik, Paul Théberge, and Debra White-Stanley.

Audio-Vision: Sound on Screen Michel Chion, 2019-04-02 Michel Chion's landmark Audio-Vision has exerted significant influence on our understanding of sound-image relations since its original publication in 1994. Chion argues that sound film qualitatively produces a new form of perception. Sound in audiovisual media does not merely complement images. Instead, the two channels together engage audio-vision, a special mode of perception that transforms both seeing and hearing. We don't see images and hear sounds separately—we audio-view a trans-sensory whole. In this updated and expanded edition, Chion considers many additional examples from recent world cinema and formulates new questions for the contemporary media environment. He takes into account the evolving role of audio-vision in different theatrical environments, considering its significance for music videos, video art, commercial television, and the internet, as well as conventional cinema. Chion explores how multitrack digital sound enables astonishing detail, extending the space of the action and changing practices of scene construction. He demonstrates that speech is central to film and television and shows why "audio-logo-visual" is a more accurate term than "audiovisual." Audio-Vision shows us that sound is driving the creation of a sensory cinema. This edition includes a glossary of terms, a chronology of several hundred significant films, and the original foreword by sound designer, editor, and Oscar honoree Walter Murch.

Sound and Vision Simon Frith, Andrew Goodwin, Lawrence Grossberg, 2005-12-01 Sound and Vision is the first significant collection of new and classic texts on video and brings together some of the leading international cultural and music critics writing today. Addressing one of the most controversial forms of popular culture in the contemporary world, Sound and Vision confronts easy interpretations of music video - as promotional vehicles, filmic images and postmodern culture - to offer a new and bold understanding of its place in pop music, television and the media industries. The book acknowledges the history of the commercial status of pop music as a whole, as well as its complex relations with other media. Sound and Vision will be an essential text for students of popular music and popular culture.

Radio's New Wave Jason Loviglio, Michele Hilmes, 2013-06-19 Radio's New Wave explores the evolution of audio media and sound scholarship in the digital age. Extending and updating the focus of their widely acclaimed 2001 book The Radio Reader, Hilmes and Loviglio gather together innovative work by both established and rising scholars to explore the ways that radio has transformed in the digital environment. Contributors explore what sound looks like on screens, how digital listening moves us, new forms of sonic expression, radio's convergence with mobile media, and the creative activities of old and new audiences. Even radio's history has been altered by research made possible by digital and global convergence. Together, these twelve concise chapters chart the dissolution of radio's boundaries and its expansion to include a wide-ranging universe of sound, visuals, tactile interfaces, and cultural roles, as radio rides the digital wave into its second century.

The Speed of Sound Thomas Dolby, 2016-10-11 Thomas Dolby, the composer, performer, and tech pioneer, examines his life and career.

Sound in the Age of Mechanical Reproduction David Suisman, Susan Strasser, 2011-10-11 During the twentieth century sound underwent a dramatic transformation as new technologies and social practices challenged conventional aural experience. As a result, sound functioned as a means to exert social, cultural, and political power in unprecedented and unexpected ways. The fleeting nature of sound has long made it a difficult topic for historical study, but innovative scholars have recently begun to analyze the sonic traces of the past using innovative approaches. Sound in the Age of Mechanical Reproduction investigates sound as part of the social construction of historical experience and as an element of the sensory relationship people have to the world, showing how hearing and listening can inform people's feelings, ideas, decisions, and actions. The essays in Sound in the Age of Mechanical Reproduction uncover the varying dimensions of sound in twentieth-century history. Together they connect a host of disparate concerns, from issues of gender and technology to contests over intellectual property and government regulation. Topics covered range from debates over listening practices and good citizenship in the 1930s, to Tokyo Rose and Axis radio propaganda during World War II, to CB-radio culture on the freeways of Los Angeles in the 1970s. These and other studies reveal the contingent nature of aural experience and demonstrate how a better grasp of the culture of sound can enhance our understanding of the past.

Sound as Popular Culture Jens Gerrit Papenburg, Holger Schulze, 2016-03-11 Scholars consider sound and its concepts, taking as their premise the idea that popular culture can be analyzed in an innovative way through sound. The wide-ranging texts in this book take as their premise the idea that sound is a subject through which popular culture can be analyzed in an innovative way. From an infant's gurgles over a baby monitor to the roar of the crowd in a stadium to the sub-bass frequencies produced by sound systems in the disco era, sound—not necessarily aestheticized as music—is inextricably part of the many domains of popular culture. Expanding the view taken by many scholars of cultural studies, the contributors consider cultural practices concerning sound not merely as semiotic or signifying processes but as material, physical, perceptual, and sensory processes that integrate a multitude of cultural traditions and forms of knowledge. The chapters discuss conceptual issues as well as terminologies and research methods; analyze historical and contemporary case studies of listening in various sound cultures; and consider the ways contemporary practices of sound generation are applied in the diverse fields in which sounds are produced, mastered, distorted, processed, or enhanced. The chapters are not only about sound; they offer a study through sound—echoes from the past, resonances of the present, and the contradictions and discontinuities that suggest the future. Sound Michel Chion,2015-12-11 First published in French in 1998, revised in 2010, and appearing here in English for the first time, Michel Chion's *Sound* addresses the philosophical, interpretive, and practical questions that inform our encounters with sound. Chion considers how cultural institutions privilege some sounds above others and how spurious distinctions between noise and sound guide the ways we hear and value certain sounds. He critiques the tenacious tendency to understand sounds in relation to their sources and advocates acousmatic listening—listening without visual access to a sound's cause—to disentangle ourselves from auditory habits and prejudices. Yet sound can no more be reduced to mere perceptual phenomena than encapsulated in the sciences of acoustics and physiology. As Chion reminds us and explores in depth, a wide range of linguistic, sensory, cultural, institutional, and media- and technologically-specific factors interact with and shape sonic experiences. Interrogating these interactions, Chion stimulates us to think about how we might open our ears to new sounds, become more nuanced and informed listeners, and more fully understand the links between how we hear and what we do.

The Sound of Pictures Andrew Ford,2011-02 The *Sound of Pictures* is an illuminating journey through the soundtracks of more than 400 films. How do filmmakers play with sound? And how does that affect the way we watch their movies? Whether pop or classical, sweeping or sparse, music plays a crucial role in our cinematic experience. Other sounds can be even more evocative: the sounds of nature, of cities and of voices. In *The Sound of Pictures*, Andrew Ford listens to the movies. He speaks to acclaimed directors and composers, discovering radically different views about how much music to use and when. And he explores some of cinema's most curious sonic moments. How did Alfred Hitchcock use music to plant clues in his films? Why do some ?mix-tape? soundtracks work brilliantly and others fall flat? How do classics from *A Clockwork Orange* to *The Godfather*, *Cinema Paradiso* to *High Noon*, use music and sound effects to enhance what we see on screen? Whether you're a film-buff or a music lover, *The Sound of Pictures* will enrich your experience of the movies.

Anatomy of Sound Jacob Smith,Neil Verma,2016-06-28 This collection examines the work of Norman Corwin—one of the most important, yet understudied, media authors of all time—as a critical lens to view the history of multimedia authorship and sound production. Known as the “poet laureate” of radio, Corwin is most famous for his radio dramas, which reached millions of listeners around the world and contributed to radio's success as a mass media form in the 1930s and 1940s. But Corwin was also a pioneer in other fields, including cinema, theater, TV, and journalism. In each of these areas, he had a distinctive approach to “soundwork,” relying on inventive prerecorded and live-in-real-time atmospheric effects in the studio, among other aesthetic techniques. Exploring the range of Corwin's work—from his World War II-era poetry and his special projects for the United Nations to his path-breaking writing for film and television—and its influence on media today, these essays underscore the political and social impact of Corwin's oeuvre and cement his reputation as a key writer in the history of many sound media.

The Last Seat in the House John Kane (Professor of media arts),2020 Known as the Father of Festival Sound, Bill Hanley (b. 1937) made his indelible mark as a sound engineer at the 1969 Woodstock Music and Arts Fair. Hanley is credited with creating the sound of Woodstock, which literally made the massive festival possible. Stories of his on-the-fly solutions resonate as legend among festivalgoers, music lovers, and sound engineers. Since the 1950s his passion for audio has changed the way audiences listen to and technicians approach quality live concert sound. John Kane examines Hanley's echoing impact on the entire field of sound engineering, that crucial but often-overlooked carrier wave of contemporary music. Hanley's innovations founded the sound reinforcement industry and launched a new area of technology, rich with clarity and intelligibility. By the early seventies the post-Woodstock festival mass gathering movement collapsed. The music industry shifted, and new sound companies surfaced. After huge financial losses and facing stiff competition, Hanley lost his hold on a business he helped create. By studying both his history during the festivals and his independent business ventures, Kane seeks to present an honest portrayal of Hanley and his acumen and contributions. Since 2011, Kane conducted extensive research, including over one hundred interviews with music legends from the production and performance side of the industry. These carefully selected respondents witnessed Hanley's expertise at various events and venues like Lyndon B. Johnson's second inauguration, the Newport Folk/Jazz Festivals, the Beatles' final tour of 1966, the Fillmore East, Madison Square Garden, and more. *The Last Seat in the House* will intrigue and inform anyone who cares about the modern music industry--

Film Sound in Italy A. Sisto,2014-03-13 A critical engagement with cinema in Italy, this book examines the national archive of film based on sound and listening using a holistic audio-visual approach. Sisto shifts the sensory paradigm of film history and analysis from the optical to the sonic, demonstrating how this translates into a shift of canonical narratives and interpretations.
