Multimedia Content and the Semantic Web Giorgos Stamou,Stefanos Kollias,2005-10-31 The emerging idea of the semantic web is based on the maximum automation of the complete knowledge lifecycle processes: knowledge representation, acquisition, adaptation, reasoning, sharing and use. Text-based based browsers involve a costly information-retrieval process: descriptions are inherently subjective and usage is often confined to the specific application domain for which the descriptions were created. Automatic extracted audiovisual features are, in general, more objective, domain-independent and can be native to the audiovisual content. This book seeks to draw together in one concise volume the findings of leading researchers from around the globe. The focus, in particular, is on the MPEG-7 and MPEG-21 standards that seek to consolidate and render effective the infrastructure for the delivery and management of multimedia content. Provides thorough coverage of all relevant topics, including structure identification in audiovisual documents, object-based video indexing, multimedia indexing and retrieval using natural language, speech and image processing methods Contains detailed advice on ontology representation and querying for realizing semantics-driven applications Includes cutting-edge information on multimedia content description in MPEG-7 and MPEG-21 Illustrates all theory with real-world case studies gleaned from state-of-the-art worldwide research. The contributors are pioneers in the fields of multimedia analysis and knowledge technologies This unified, comprehensive up-to-date resource will appeal to integrators, systems suppliers, managers and consultants in the area of knowledge management and information retrieval; particularly those concerned with the automation of the semantic web. The detailed, theory-based practical advice is also essential reading for postgraduates and researchers in these fields.

The Successful Virtual Classroom Darlene Christopher,Karen HYDER,2014-10-09 Designers and facilitators must adapt their programs and delivery styles to be effective in the new medium that is virtual training. Virtual training gives learning professionals unprecedented flexibility, making it possible to reach participants globally and unite physically dispersed teams. This book goes beyond introducing the technology, to offer trainers proven techniques tailored specifically to engage live online audiences. In *Successful Virtual Classroom*, you will learn how to: Make the most of virtual classroom features such as content and screen sharing, annotation tools, polls, and breakout rooms Weave chat responses into the discussion Compensate for the absence of body language Monitor feedback Engage individuals with different learning styles Encourage audience contribution Meet the unique needs of global participants Packed with easy-to-use tools, checklists, and worksheets--as well as case studies from?Oracle,?UPS, and more--the book introduces the PREP model for planning, rehearsing, executing, and then conducting a postmortem following the training event. Featuring icebreakers and interactive exercises designed for an online environment, *Successful Virtual Classroom* helps you create programs that truly drive learner engagement.

Media in the Digital Age John V. Pavlik,2008-05-12 Digital technologies have fundamentally altered the nature and function of media in our society, reinventing age-old practices of public communication and at times circumventing traditional media and challenging its privileged role as gatekeepers of news and entertainment. Some critics believe these technologies keep the public involved in an informed discourse on matters of public importance, but it isn't clear this is happening on a large scale. Propaganda disguised as news is flourishing, and though interaction with the digital domain teaches children valuable skills, it can also expose them to grave risks. John V. Pavlik critically examines our current digital innovations blogs, podcasting, peer-to-peer file sharing, on-demand entertainment, and the digitization of television, radio, and satellites and their positive and negative implications. He focuses on present developments, but he also peers into the future, foreseeing a media landscape dominated by a highly fragmented, though active audience, intense media competition, and scarce advertising dollars. By embracing new technologies, however, Pavlik shows how professional journalism and media can hold on to their role as a vital information lifeline and continue to operate as the tool of a successful democracy.

Transitioning to Virtual and Hybrid Events Ben Chodor,2020-09-09 Creating virtual events is not as simple as moving the same content online — learn how to immediately leverage virtual solutions for effective in-person online events As the global COVID-19 pandemic continues to have unprecedented impact on both the global economy and the whole of the world population, the need for effectively and efficiently connecting people and the right information has never been more urgent. Although the technology infrastructure currently exists, many organizations are scrambling to create virtual meetings and events to address important time-sensitive issues. *Transitioning to Virtual and Hybrid Events* explains everything an event host needs to know about going virtual, from understanding the new audience, to adapting content to the new medium, to marketing effectively, and much more. Author Ben Chodor, president of Intrado Digital Media, provides expert advice and real-world instructions for delivering engaging hybrid, virtual, and streaming events and webinars for companies of all sizes and across all industries. Packed with detailed tutorials, real-world case studies, illustrative examples, and highly useful checklists, this comprehensive resource provides step-by-step guidance on: Planning, creating, and implementing a digital event Choosing between a stream, a webcast, or a hybrid event Evaluating different technological solutions Producing compelling virtual content for a variety of scenarios Effectively promoting online events Meeting the needs of a diverse and global audience *Transitioning to Virtual and Hybrid Events* is an indispensable instruction manual for anyone tasked with enhancing their organization's continuity plans, enabling their employee base to work remotely, or creating any type of virtual solution to meet this urgent crisis.

DVD Studio Pro 1.5 for Macintosh Martin Sitter,2003 If you're an independent filmmaker, video professional, corporate trainer, or event videographer looking to create professional DVD-Video with Apple's DVD Studio Pro, you'll appreciate the practical format of *DVD Studio Pro 1.5 for Macintosh: Visual QuickPro Guide*. Each task is broken down into concise step-by-step instructions, illustrated with plenty of informative screenshots. All of the exciting features in DVD Studio Pro merit in-depth treatment: menu creation, chapter markers, scripting, MPEG encoding, asset organization, linking, and output formatting are all clearly explained. Plus, the book reveals previously undocumented DVD Studio Pro secrets, such as how to write advanced scripts using SPRMs and how to burn DVD-RW discs directly from within the software. *DVD Studio Pro 1.5 for Macintosh: Visual QuickPro Guide* picks up where the manual leaves off with complete coverage of AC-3 encoding, including tutorials on determining the dialog normalization value and compression profile for AC-3 audio streams. This handy *Visual QuickPro Guide* is a reference tool and a start-to-finish tutorial that will grow with you as you master one of the most powerful tools available for creating DVDs on the Mac.

Watercolor Is for Everyone Kateri Ewing,2020-08-18 *Watercolor Is for Everyone* guides you through 21 intuitive, process-based painting lessons that help you discover your own unique artist-within while creating works of beauty you will joyfully send out into the world to share. In this beautiful book, artist Kateri Ewing, author of *Look Closer*, *Draw Better*, guides you through a series of simple creative projects using a soulful, meditative, and reflective process. Whether you are picking up a paint brush for the first time or are an experienced artist, you will discover and deepen your creative potential through these exercises, because everyone can make art. Each project results in two art pieces, one to keep for yourself, and then another one, such as a postcard or mini painting, to share with someone else or send out into the world, to spread their color, creativity, and joy in new places. With *Watercolor Is for Everyone*, you

can learn how to build a daily practice and how to set intentions and create, even if you just have just 10 minutes a day. The projects draw inspiration from poetry, music, literature, and the natural world, and invite experimentation with a variety of sources, from tarot and oracle cards to rocks and feathers. You will pursue your personal passions through accessible projects as you build your artistic skills, confidence, and creativity.

Innovative Mobile and Internet Services in Ubiquitous Computing Leonard Barolli,Aneta Poniszewska-Maranda,Hyunhee Park,2020-06-09 This book presents the latest research findings, methods and development techniques, challenges and solutions concerning UPC from both theoretical and practical perspectives, with an emphasis on innovative, mobile and Internet services. With the proliferation of wireless technologies and electronic devices, there is a rapidly growing interest in Ubiquitous and Pervasive Computing (UPC), which makes it possible to create a human-oriented computing environment in which computer chips are embedded in everyday objects and interact with the physical world. Through UPC, people can go online even while moving around, thus enjoying nearly permanent access to their preferred services. Though it has the potential to revolutionize our lives, UPC also poses a number of new research challenges.

Virtual Learning Environments Martin Weller,2007-05 Virtual learning environments are widely spread in higher education, yet they are often under utilised by the institutions that employ them. This book addresses the need to move beyond thinking about the VLE simply in terms of the particular package that an institution has adopted, and viewing it as a significant educational technology that will shape much of the teaching and learning process in the coming years. Considering how virtual learning environments can be successfully deployed and used for effective teaching, it sets out a model for effective use, focussing on pedagogic application rather than a specific technology, and seeks to provide a bridge between pedagogical approaches and the tools educators have at their disposal. It contains essential advice for those choosing a VLE and encourages all those involved in the deployment of a VLEs to use them more productively in order to create engaging learning experiences.

Global Project Management Mr Jean Binder,2012-09-28 Ongoing research shows that whilst 90 per cent of large companies are conducting global projects to take advantage of distributed skills, around-the-clock operations and virtual team environments, less than one third of them have effective, established practices to help project managers and team members working over a distance. As a consequence, most organisations struggle to reach the required levels of quality and effectiveness from these projects because their methods and practices are not adapted to a global multi-cultural environment, where most communication is in writing and asynchronous. Global Project Management describes how to adapt your organisation and your projects to thrive in this environment. The book goes beyond the recommendations on collaborative tools, to suggest the development of best practices on cross-cultural team management and global communication, recommend organisational changes and project structures, and propose alternatives for the implementation of the new practices and methods. The text is filled with real-life examples and techniques and illustrates how to apply the recommendations as part of the successful management of any global project.

Recent Advances in Ambient Intelligence and Context-Aware Computing Curran, Kevin,2014-11-30 Modern devices, from phones and cars to houses and the appliances within them, are being designed with formidable computational power and expanded functionality. To be truly effective, these smart devices must effectively process data from their environment and experiences and make decisions based on that information. Recent Advances in Ambient Intelligence and Context-Aware Computing investigates the functionality of ubiquitous computational systems and how they may adapt to their environment to improve the quality of interaction for the end-user. This reference book will be of value to under- and post-graduate students, professionals, and researchers in networking, computer science, communications, and other information technology disciplines.
