Sound Reproduction Floyd E. Toole,2017-07-28 Sound Reproduction: The Acoustics and Psychoacoustics of Loudspeakers and Rooms, Third Edition explains the physical and perceptual processes that are involved in sound reproduction and demonstrates how to use the processes to create high-quality listening experiences in stereo and multichannel formats. Understanding the principles of sound production is necessary to achieve the goals of sound reproduction in spaces ranging from recording control rooms and home listening rooms to large cinemas. This revision brings new science-based perspectives on the performance of loudspeakers, room acoustics, measurements and equalization, all of which need to be appropriately used to ensure the accurate delivery of music and movie sound tracks from creators to listeners. The robust website (www.routledge.com/cw/toole) is the perfect companion to this necessary resource.

The Oxford Handbook of Sound and Image in Digital Media Carol Vernallis,Amy Herzog,John Richardson,2015-08 The Oxford Handbook of Sound and Image in Digital Media surveys the contemporary landscape of audiovisual media. Contributors to the volume look not only to changes brought by digital innovations, but to the complex social and technological past that informs, and is transformed by, new media. This collection is conceived as a series of dialogues and inquiries by leading scholars from both image- and sound-based disciplines. Chapters explore the history and the future of moving-image media across a range of formats including blockbuster films, video games, music videos, social media, digital visualization technologies, experimental film, documentaries, video art, pornography, immersive theater, and electronic music. Sound, music, and noise emerge within these studies as integral forces within shifting networks of representation. The essays in this collection span a range of disciplinary approaches (film studies, musicology, philosophy, cultural studies, the digital humanities) and subjects of study (Iranian documentaries, the Twilight franchise, military combat footage, and Lady Gaga videos). Thematic sections and direct exchanges among authors facilitate further engagement with the debates invoked by the text.

Concert Hall Acoustics Yoichi Ando,2012-12-06 The acoustic quality of a concert hall has frequently posed a mysterious puzzle, namely, what physical aspects of the sound field can produce superior sound for the listener. The author has been probing for more than a decade into the subjective qualities preferred for musical and speech sounds. The result of his extensive investigations - the discovery that four and only four independent parameters contribute effectively to good acoustics - is summarized in the present book. The capability of calculating acoustical quality at any seat in a proposed concert hall is a unique and quite useful aspect of Ando's design method. Alternative architectural schemes can be compared based on the number of seats which exceeds a previously accepted minimum standard of acoustical quality.

Getting Acquired: How I Built and Sold My SaaS Startup Andrew Gazdecki,2022-01-11 Andrew Gazdecki knows startups. He founded Bizness Apps as a broke, twenty-something entrepreneur and sold it to a private equity firm before the age of thirty-after going head-to-head with Apple over a blanket App Store policy that threatened to ruin him. He's been a growth consultant for several more multimillion-dollar startups. His companies have been featured in TechCrunch more than a dozen times. Now, he shares his remarkable story in Getting Acquired: How I Built and Sold My SaaS Startup. Follow Gazdecki's journey: starting a company at the age of twenty-one and hiring, then leading, over one hundred employees without any real work experience of his own. This honest, personal look behind the scenes reveals both his successes and his mistakes as he labored to build a compelling brand story and catalyze growth on a shoestring budget, almost lost everything, and finally sold the company for millions at the age of twenty-nine.

Our Voices Rebecca Kiddle,2018-05-15 Our Voices: Indigeneity and Architecture is an exciting advance in the field of architecture offering multiple indigenous perspectives on architecture and design theory and practice. Indigenous authors from Aotearoa NZ, Canada, Australia, and the USA explore the making and keeping of places and spaces which are informed by indigenous values and identities. The lack of publications to date offering an indigenous lens on the field of architecture belies the rich expertise found in indigenous communities in all four countries. This expertise is made richer by the fact that this indigenous expertise combines both architecture and design professional practice, that for the most part is informed by Western thought and practice, with a frame of reference that roots this architecture in the indigenous places in which it sits.
