*CD-ROM Technology* Catherine Mambretti,1998-01-01 The maturity of cd-rom technology now shows a dramatic change in the way librarians and teachers do their jobs. Among their biggest challenges are deciding on equipment requirements and managing the disk collection. This manual is an understandable step-by-step guide to making the most of cd-rom technology in schools and libraries--from the acquisition of workstations to purchasing and installing disks. Part 1 gives the nuts and bolts on designing your cd-rom system and developing acquisition strategies. Such topics as hardware requirements, furniture, financial planning, selection criteria, compatibility between systems, copyright issues, and licensing are covered here. Part 2 is a practical guide to managing the cd-rom system, including details on installation of the titles, maintaining hardware and software, and troubleshooting the system. Technical information is provided in Part 3, with information on such matters as configuring the workstations and installing cd-rom titles when the vendor-supplied program fails, and solving common problems associated with dos, Windows, and Macintosh systems.

**Translation and Web Searching** Vanessa Enríquez Raído,2013-11-07 The book presents a comprehensive study of various cognitive and affective aspects of web searching for translation problem solving. Research into the use of the web as an external aid of consultation has frequently occupied a secondary position in the investigation of translation processes. The book aims to bridge

this gap in the literature. Beginning with a detailed survey of previous studies of these processes, it then focuses on web search behaviors using qualitative and quantitative analysis that presents a multifaceted overview of translation-oriented web searching. The book concludes by addressing the implications for the teaching of and research into translators' web searching skills. With regard to teaching, the book's didactic discussions will make it a valuable tool for both translator trainers and translation students wanting to familiarize themselves with the intricacies of Web searching and to reflect upon the pedagogical implications of the study for acquiring online information literacy in translator training.

**Parallel and Distributed Processing and Applications - ISPA 2005 Workshops** Guihai Chen, 2005-10-26 This book constitutes the refereed joint proceedings of eight international workshops held in conjunction with the Third International Symposium on Parallel and Distributed Processing and Applications, ISPA 2005, held in Nanjing, China in November 2005 (see LNCS 3758). The 71 revised full papers presented were carefully reviewed and selected from 323 submissions. The papers of the eight workshops are very specific and contribute to enlarging the spectrum of the more general topics treated in the ISPA 2005 main conference. Topics addressed are applications and economics of peer-to-peer systems (AEPP 2005), advanced storage technology and autonomic distributed data (ASTD 2005), bioinformatics (BIOS 2005), grid computing in china (GCIC 2005), information assurance in distributed systems (IADS 2005), mobile ad-hoc and ubiquitous sensor networks (MASN 2005), service grid computing and applications (SGCA 2005), and Web information systems and applications (WISA 2005).

**Pro Silverlight 4 in C#** Matthew MacDonald,2011-01-26 Silverlight 4 is Microsoft's cross-browser technology for creating rich user experiences on the Web. Like its predecessor, Silverlight 3, it rides atop the .NET framework for maximum ease of use and coding efficiency. The new technology carries forward much of the work that has been done before and augments it in many important respects, including support for H.264 video, major improvements to the graphics engine (including true 3D

rendering), and much richer data-binding options for interfacing with other applications. Pro Silverlight 4 in C# is an invaluable reference for professional developers wanting to discover the features of Silverlight 4. Author Matthew MacDonald's expert advice guides you through creating rich media applications using Silverlight in the environment you're most productive in—no matter what the target platform. As you learn about the features that put Silverlight in direct competition with Adobe Flash, such as rich support for 2D and 3D drawing, animations, and media playback, you'll experience the plumbing of .NET and the design model of WPF through Silverlight—all of the same .NET technology that developers use to design next-generation Windows applications. Matthew MacDonald provides a comprehensive tutorial written from professional developer to professional developer, complete with full-color graphics and screenshots.
