Casting Might-Have-Beens Eila Mell,2015-01-24 Some acting careers are made by one great role and some fall into obscurity when one is declined. Would Al Pacino be the star he is today if Robert Redford had accepted the role of Michael Corleone in *The Godfather*? Imagine Tom Hanks rejecting Uma Thurman, saying that she acted like someone in a high school play when she auditioned to play opposite him in *The Bonfire of the Vanities*. Picture Danny Thomas as *The Godfather*, or Marilyn Monroe as Cleopatra. This reference work lists hundreds of such stories: actors who didn't get cast or who turned down certain parts. Each entry, organized alphabetically by film title, gives the character and actor cast, a list of other actors considered for that role, and the details of the casting decision. Information is drawn from extensive research and interviews. From *About Last Night* (which John Belushi turned down at his brother's urging) to *Zulu* (in which Michael Caine was not cast because he didn't look "Cockney" enough), this book lets you imagine how different your favorite films could have been.

The Audition Book Ed Hooks,1996 Shows you how to prepare for an audition in a variety of settings.

Casting Directors' Secrets Ginger Howard Friedman,2004 (Limelight). In *Casting Directors' Secrets*, casting directors from New York, Los Angeles, Toronto, and Vancouver offer insight in their own words into the do's and don'ts of the audition process and reveal the three biggest mistakes made by actors at this crucial stage. The book offers instruction in these areas and more: How to get the audition training and preparation, headshots and resume, finding an agent, auditioning for agents; audition/interview etiquette being late, canceling your appointment, waiting room do's and don'ts, staying focused, filling out the paperwork, behavior toward other actors; bad habits perfume and cologne, first impressions, don't look for the casting couch!, you and your ego, brown-nosing, tell the truth but not the whole truth; artistic preparation what your agent should tell you, working with sides, eye contact and the fourth wall, ice-cold readings; performing the audition rewriting the dialogue, false starts, losing your place, violence in audition scenes (don't make it too real!); growing as an actor taking risks, attending classes, maintaining the momentum; and more!

Audition , 2008

Audition Barbara Walters, 2008-05-06 #1 NATIONAL BESTSELLER • An inspiring and riveting memoir from the most important woman in the history of television journalism. “A delightful tale of the golden age of television.... Juicy behind-the-scenes details of the celebrities she’s interviewed, mixed in with stories of her own trials and tribulations.” —The Washington Post After more than fifty years of interviewing heads of state, world leaders, movie stars, criminals, murderers, inspirational figures, and celebrities of all kinds, Barbara Walters turns her gift for examination onto her own extraordinary life. Walters was the product of a turbulent childhood that featured a glamorous father who made and lost several fortunes as well as the companionship of a mentally challenged sister. Feelings of responsibility for her family played a large part in the choices she made as she grew up: the friendships she developed, the relationships she had, the marriages she tried to make work. Ultimately, thanks to her drive and a decent amount of luck, Walters made it to the top of a male-dominated industry. She was the first woman cohost of the Today show, the first female network news coanchor, the host and producer of countless top-rated Specials, the star of 20/20, and the creator and cohost of The View. She has not only interviewed the world’s most fascinating figures, she has become a part of their world. These are just a few of the names that play a key role in her life, career, and book: Yasir Arafat, Warren Beatty, Menachem Begin, George H. W. Bush, George W. Bush, Jimmy Carter, Fidel Castro, Hugo Chávez, Bill and Hillary Clinton, Roy Cohn, the Dalai Lama, Princess Diana, Katharine Hepburn, King Hussein, Angelina Jolie, Henry Kissinger, Monica Lewinsky, Richard Nixon, Rosie O’Donnell, Christopher Reeve, Anwar Sadat, John Wayne . . . the list goes on. Barbara Walters has spent a lifetime auditioning: for her bosses at the TV networks, for millions of viewers, for the most famous people in the world, and even for her own daughter, with whom she has had a difficult but ultimately quite wonderful and moving

relationship. This book, in some ways, is her final audition, as she fully opens up both her private and public lives. In doing so, she has given us a story that is heartbreaking and honest, surprising and fun, sometimes startling, and always fascinating.

Editor's Choice Linda Habjan,2006 Playbook/monologues.

The Actor's Audition David Black,1990-10-03 The audition is the first -- and most essential -- test of any actor's craft, one that is typically performed for a very tough audience, under conditions that are always less than perfect. This practical, hands-on guide by a veteran producer covers every aspect of the auditioning process: the monologue, the cold reading, the musical audition, and the interview. It shows actors how to see their performance through the eyes of prospective employers, how to sell themselves even before they step into character, and how to Interpret roles without outside direction.

Science and Engineering of Casting Solidification Doru Michael Stefanescu,2013-03-14 We come to know about the world in two distinctive ways: by direct perception and by application of rational reasoning which, in its highest form, is mathematical thinking. The belief that the underlying order of the world can be expressed in mathematical form lies at the very heart of science. In other words, we only know what we can describe through mathematical models. Casting of metals has evolved first as witchcraft, to gradually become an art, then a technology, and only recently a science. Many of the processes used in metal casting are still empirical in nature, but many others are deep-rooted in mathematics. In whatever form, casting of metals is an activity fundamental to the very existence of our world, as we know it today. Foundry reports indicate that solidification modeling is not only a cost-effective investment but also a major technical asset. It helps foundries move into markets with more complex and technically demanding work. The ability to predict internal soundness allows foundries to improve quality and deliveries, and provides the information required to make key manufacturing decisions based on accurate cost estimates before pattern construction even begins. The acceptance of computational modeling of solidification by the industry is a direct result of the gigantic strides made by solidification science in the last two decades.
