Life Cycle Assessment Aiduan Borrior,Mairi J Black,Onesmus Mwabonje,2021-03-19 Life cycle assessment (LCA) is an established methodology used to quantify the environmental impacts of products, processes and services. Circular economy (CE) thinking is conceptual way of considering the impacts of consuming resources. By taking a closed loop approach, CE provides a framework for influencing behaviours and practices to minimise this impact. Development of the circular economy is a crucial component in the progression towards future sustainability. This book provides a robust systematic approach to the circular economy concept, using the established methodology of LCA. Including chapters on circular economic thinking, the use of LCA as a metric and linking LCA to the wider circular economy, this book utilises case studies to illustrate the approaches to LCA. With contributions from researchers worldwide, Life Cycle Assessment provides a practical, global guide for those who wish to use LCA as a research tool or to inform policy, process, and product improvement.

Ethnicity and Kinship in North American and European Literatures Silvia Schiltermandl,Klaus Rieser,2021-03-17 This edited collection applies kinship as an analytical concept to better understand the affective economies, discursive practices, and aesthetic dimensions through which cultural narratives of belonging establish a sense of intimacy and affiliation. In North American and European ethnic literatures, kinship has several social functions: negotiating diasporic belonging in and outside of the perimeters of bloodlines and genealogy; positioning queer-feminist interventions to counter ethno-nationalist narratives of belonging; challenging liberal sentimentalist narratives, such as those grafted onto the bodies of transnational adoptees; re-formulating cultural heterogeneity through interracial and interethnic kinship constellations outside either post-racial assumptions about colorblindness or celebrations of racial and ethnic pluralism. In all of these cases, kinship features as a common theme through which contemporary authors attend to challenges of conscribing individuals into inclusive, counter-hegemonic cultural narratives of belonging.

Sustainable Intensification Jules N. Pretty,Stella Williams,Camilla Toulmin,2012-06-25 Continued population growth, rapidly changing consumption patterns and the impacts of climate change and environmental degradation are driving limited resources of food, energy, water and materials towards critical thresholds worldwide. These pressures are likely to be substantial across Africa, where countries will have to find innovative ways to boost crop and livestock production to avoid becoming more reliant on imports and food aid. Sustainable agricultural intensification - producing more output from the same area of land while reducing the negative environmental impacts - represents a solution for millions of African farmers. This volume presents the lessons learned from 40 sustainable agricultural intensification programmes in 20 countries across Africa, commissioned as part of the UK Government's Foresight project. Through detailed case studies, the authors of each chapter examine how to develop productive and sustainable agricultural systems and how to scale up these systems to reach many more millions of people in the future. Themes covered include crop improvements, agroforestry and soil conservation, conservation agriculture, integrated pest management, horticulture, livestock and fodder crops, aquaculture, and novel policies and partnerships.

Raquel Raquel Welch,2010 Since her entree to the Hollywood scene in the 1960s, Raquel Welch has been a symbol of glamour and sex appeal whose honesty, high energy, and self-deprecating sense of humor are greatly admired by all her fans. She has won a Golden Globe for her role in *The Three Musketeers*, starred in many films, including *One Million Years, B.C.*, which featured her classic iconic image of a cavewoman clad in a fur bikini, and played the role of a transsexual opposite Mae West in the cult favorite *Myra Breckenridge*. Whether refusing to change her name to Debbie--because producers considered "raquel" too ethnic--or to lie about her age, even to the detriment of her career, she has evolved elegantly over time into a true champion for women who defy traditional aging. In *Raquel: Beyond the Cleavage*, Raquel opens up about her internal struggles to age gracefully in the often-harsh spotlight of Hollywood and to make peace with the sometimes uncomfortable mantle of "sex symbol," at the same time dispensing precious tips to all women about staying young in mind and body. She discloses the challenges of hitting forty and suffering all the ensuing stereotypes; how to cope with fifty, menopause, and shifting gears; and continuing into your sixties, sometimes with the challenges of dating and decisions about cosmetic surgery, all the while laying bare her own experiences of aging and maintaining and successful acting career. The book reveal the secrets of diet, exercise, and healthy living--including her early devotion to yoga and fitness--that she devised over the years, as well as the hair, makeup, and dressing tips that have allowed her to remain effortlessly beautiful into her late sixties. While her book will be a must-have for every woman in the baby boomer generation, her warm, often comically irreverent voice and her priceless advice, based on decades of experience in one of the toughest arenas for women, will have wide appeal. Raquel Welch remains one of the most vital and enduring female icons of her day.

Integrating Science and Policy Roger E Kasperson,2012-08-06 As progress towards a greater knowledge in sustainability science continues, the question of how better to integrate scientific progress with actual decisions made by practitioners remains paramount. This book aims to help close the gap between science and practice. Based on a two year collaborative project between Harvard and Clark Universities, the book takes as its focus the vulnerability and resilience of people around the world to the effects of environmental change, a mature area of research in which one might expect the gap between science and policy/practice to have been extensively bridged. The book presents analysis of past studies, interviews conducted with the producers and users of scientific knowledge, and case studies performed by leading scholars across a spectrum of international settings and political systems. Crucially, the authors identify new directions and tools for closing the gap between science and policy across a range of situations and societies. The result is an illuminating collection of studies and analyses that suggest to researchers, students, practitioners, and policy-makers alike how best to ensure that high quality environmental research informs good environmental policy and practice.

ACKNOWLEDGEMENTS The editors and authors are grateful to Lu Ann Pacenka, who formatted the text of the book. The editors also wish to express their appreciation to Bill Clark and Nancy Dickson of Harvard University, who commissioned and provided oversight for the preparation of the volume. Both editors and authors wish to express their appreciation to the David and Lucile Packard Foundation for providing funds to support the project. Finally, the editors are grateful for the continuing support of the George Perkins Marsh Institute at Clark University. Published with Science in Society

Tomorrow's Promise Sandra Brown,2017-05-25 I met a man, a wonderful man. He kissed me, touched me like no other man ever has. I think I've fallen in love. What am I going to do about it? That's the dilemma confronting Keely Preston upon meeting dashing Congressman Dax Devereaux. The attraction between them was like a lightning strike - hot and unexpected. But also terribly inconvenient. Keely is in Washington D.C. to appeal to a congressional committee on behalf of families of soldiers Missing In Action. Serving on that committee is Dax. Both are under close scrutiny. What has sparked between them is difficult to keep secret. After twelve years of living in limbo, married but alone, Keely is reawakened to desire by Dax's passion. But he also touches her heart, where she has preserved the sweet memory of her husband. One love represents her past; another her future. Will clinging to one mean having to sacrifice the other?

Microplastic in the Environment: Pattern and Process Michael S. Bank,2021-10-09 This open access book examines global plastic pollution, an issue that has become a critical societal challenge with implications for environmental and public health. This volume provides a comprehensive, holistic analysis on the plastic cycle and its subsequent effects on biota, food security, and human exposure. Importantly, global environmental change and its associated, systems-level processes, including atmospheric deposition, ecosystem complexity, UV exposure, wind patterns, water stratification, ocean circulation, etc., are all important direct and indirect factors governing the fate, transport and biotic and abiotic processing of plastic particles across ecosystem types. Furthermore, the distribution of plastic in the ocean is not independent of terrestrial ecosystem dynamics, since much of the plastic in marine ecosystems originates from land and should therefore be evaluated in the context of the larger plastic cycle. Changes in species size, distribution, habitat, and food web complexity, due to global environmental change, will likely alter trophic transfer dynamics and the ecological effects of nano- and microplastics. The fate and transport dynamics of plastic particles are influenced by their size, form, shape, polymer type, additives, and overall ecosystem conditions. In addition to the risks that plastics pose to the total environment, the potential impacts on human health and exposure routes, including seafood consumption, and air and drinking water need to be assessed in a comprehensive and quantitative manner. Here I present a holistic and interdisciplinary book volume designed to advance the understanding of plastic cycling in the environment with an emphasis on sources, fate and transport, ecotoxicology, climate change effects, food security, microbiology, sustainability, human exposure and public policy.

Media Policy for the Digital Age ,2005 Traditionally, the Netherlands has enjoyed status as a test market for new media. But in the past decade, such innovations have been severely hampered by questions about the future of public broadcasting. This issue has led to abundant political grandstanding, but little in the way of definitive policymaking. In February 2005, the Scientific Council for Government Policy published a report with practical policy suggestions. Media Policy for the Digital Age summarizes the Council’s recommendations, giving readers outside the Netherlands insight into the issues at stake and possible solutions, as well as a concise analysis that tackles the challenges of making robust media policy for the twenty-first century.

Alternative Living Alex Strohl,2018-03-07 The 'Alternate Living' book looks to offer a glimpse into the lives of people on the periphery of society, whether nestled high up in the mountains far from paved roads and running water, or tucked away down an unforgiving Arctic fjord accessible only by boat.
