Literature Review on Health and Fatigue Issues Associated with Commercial Motor Vehicle Driver Hours of Work ,2005 TRB's Commercial Truck and Bus Safety Synthesis Program (CTBSSP) Synthesis 9: Literature Review on Health and Fatigue Issues Associated with Commercial

Motor Vehicle Driver Hours of Work examines literature relevant to health and fatigue issues associated with commercial vehicle driver hours of service. This literature review was specifically requested by the Federal Motor Carrier Safety Administration (FMCSA) to provide information related to its Hours of Service regulations issued in January 2004. The report contains a general literature review of the health issues from 1975 to the present, and fatigue issues from January 2004 to present, associated with commercial vehicle driver hours of service. The report also contains a literature review of references that were cited in response to a related FMCSA January 2005 Notice of Proposed Rulemaking. Strictly a literature review, the report does not contain any conclusions or recommendations.

Exploring Airport Employee Commute and Parking Strategies Diane M. Ricard,2012

Airport employees are vital to the operation of an airport. They staff the airport on a daily basis from well before the first flight operation until after the last flight operation, which at many airports is 24 hours a day, 365 days a year. Airport employees generate a significant number of vehicle trips to and from the airport each day, which impacts air quality, airport traffic conditions, and traffic in the communities surrounding the airport and on the freeway system. The purpose of this report was to determine what is known about airport employee commute patterns and commute modes, what

programs are being offered to airport employees by the airport operator or a transportation management association (TMA) to provide them with alternatives to the drive alone commute to work, how progress is being monitored, what is known about the effectiveness of airport employee commute options (ECO) programs, what the challenges are for the providers of such programs, and to research some ECO programs offered by non-airport employers for program elements that may have applicability in the airport environment. This report was accomplished through a literature search of airport employee commute programs, commute programs offered by non-airport employers that may have applicability in the airport environment, and through interviews with four U.S. and one U.K. airport operators (of 16 airports and 3 TMAs identified, 84 percent interviewed) that offer comprehensive airport ECO programs. Each of the five case studies provides an example of how ECO strategies are applied in the airport environment.
