A-1 Auto Transport: Where Excellence Drives Every Mile A-1 Auto Transport, Tony Taylor, Joe Webster, In the vast landscape of vehicle transportation, A-1 Auto Transport stands as a beacon of reliability and excellence. Our story begins with humble roots, rooted in the vision of our founder, Tony Taylor, who sought to revolutionize the industry with exceptional service and unwavering dedication. Tony Taylor, a visionary entrepreneur with a passion for automobiles, founded A-1 Auto Transport in 1988. His vision was simple yet profound: to provide reliable and efficient vehicle transportation services that exceed customer expectations. With this vision in mind, Tony set out to build a company that would redefine the standards of the industry. In the early days, A-1 Auto Transport started as a small operation, with Tony personally overseeing every aspect of the business. From coordinating shipments to ensuring customer satisfaction, Tony's hands-on approach laid the foundation for the company's success. His commitment to integrity, professionalism, and customer-centricity set A-1 Auto Transport apart from the competition from the very beginning. As A-1 Auto Transport gained traction in the industry, our fleet began to expand, allowing us to serve a wider range of customers and destinations. From a single tow truck to a diverse fleet of carriers and trailers, our capacity for transportation grew alongside our reputation for excellence. Each new addition to our fleet represented a milestone in our journey, reflecting our commitment to continuous growth and innovation. Throughout the years, A-1 Auto Transport has achieved numerous milestones and accomplishments that have shaped our trajectory and solidified our position as a trusted name in the industry. From expanding our operations to new regions and territories to establishing a strong international presence, each milestone has been a testament to our unwavering commitment to quality and customer satisfaction. Today, as we reflect on our journey from humble beginnings to industry leader, we remain guided by the same principles and values that have defined us from the start. With Tony Taylor's vision as our compass, we continue to strive for excellence in everything we do, ensuring that every customer experience with A-1 Auto Transport is nothing short of exceptional. As we look towards the future, we are excited to continue our journey of growth, innovation, and service, setting new standards of excellence in the vehicle transportation industry.

8 Critical Things Your Auto Accident Attorney Won't Tell You Paul Samakow, 2009-07-10 I'm writing this book to educate you. I have been practicing law since 1980, almost 30 years now, and I have seen too many clients come to me with complaints about lawyers, hoping I was 'better' and asking if I would take their case. The two top complaints about lawyers are that they don't communicate with their clients and that they don't tell them what is going on. What I will tell you, and what I'd tell any lawyer, is that a lawyer must be 100%, totally honest with his clients, and he must tell them everything, before they need to know, so that they can make intelligent and informed decisions.

Auto Motives Karen Lucas, Evelyn Blumenberg, Rachel Weinberger, 2011-02-15 While the individual benefits of car-based travel continues to be recognized, the wider environmental and social cost of automobiles is also significant. The U.S. Experience with No-fault Automobile Insurance James M. Anderson, Paul Heaton, Stephen J. Carroll, 2010 No-fault automobile-insurance regimes were the culmination of decades of dissatisfaction with the use of the traditional tort system for compensating victims of automobile accidents. They promised quicker, fairer, less-contentious, and, it was hoped, less-expensive resolution of automobile-accident injuries. This monograph considers how these plans have fared. After reviewing the intellectual and political history of no-fault auto insurance, the monograph concludes that no-fault lost political popularity because of the perception that it did not deliver the promised consumer premium cost reductions. Analysis of data from a variety of sources confirms this view, demonstrating that premiums and claim costs have become substantially larger in no-fault states than in other states over time. These cost increases can be traced to a variety of factors, including growth in excess claiming in no-fault states and convergence between no-fault and tort states in litigation patterns and noneconomic-damage payments. However, the primary driver of no-fault's cost growth has been high medical costs. The extent to which these additional costs represent augmented utilization of medical services rather than cost shifting from the medical insurance system to the automobile insurance system remains unclear. --Back cover.

The Costs of Excess Medical Claims for Automobile Personal Injuries Stephen J. Carroll,Allan F. Abrahamse,Mary E. Vaiana,1995 The study concludes that 35-42 percent of claimed medical costs for automobile injuries are excess. In 1993, this excess claiming consumed approximately \$4 billion of health care resources, cost insurers \$9-\$13 billion in compensation for noneconomic losses and other costs, and may have cost consumers \$13-\$18 billion in auto insurance premiums.

The Effect of No-fault Automobile Insurance on Driver Behavior and Automobile Accidents in the United States David S. Loughran,2001 No-fault auto insurance opponents frequently argue that no-fault may ultimately lead to higher auto insurance costs by reducing drivers' incentives to drive carefully and thereby increasing the accident rate. The intuition behind this criticism of no-fault is simple: No-fault auto insurance lowers the cost of driving negligently by limiting first-party liability for the injuries suffered by third-parties in auto accidents. This book evaluates this criticism of no-fault by examining trends in fatal and non-fatal automobile accidents rates and rates of driver negligence in the United States between 1967 and 1989. Contrary to some earlier research, the author finds no evidence that the adoption of no-fault auto insurance between 1971 and 1976 in 16 states increased fatal accident rates in those states. This book also finds no correlation between the presence of no-fault auto insurance and a state's overall accident rate or rate of driver negligence.
