Moon-face and Other Stories Jack London, 1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways - robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of London's most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Robot Operating System (ROS) Anis Koubaa, 2021-07-17 This book is the sixth volume of the successful book series on Robot Operating System: The Complete Reference. The objective of the book is to provide the reader with comprehensive coverage of the Robot Operating Systems (ROS) and the latest trends and contributed systems. ROS is currently considered as the primary development framework for robotics applications. There are seven chapters

organized into three parts. Part I presents two chapters on the emerging ROS 2.0 framework; in particular, ROS 2.0 is becoming increasingly mature to be integrated into the industry. The first chapter from Amazon AWS deals with the challenges that ROS 2 developers will face as they transition their system to be commercial-grade. The second chapter deals with reactive programming for both ROS1 and ROS. In Part II, two chapters deal with advanced robotics, namely on the usage of robots in farms, and the second deals with platooning systems. Part III provides three chapters on ROS navigation. The first chapter deals with the use of deep learning for ROS navigation. The second chapter presents a detailed tuning guide on ROS navigation and the last chapter discusses SLAM for ROS applications. I believe that this book is a valuable companion for ROS users and developers to learn more ROS capabilities and features.

Affective Health and Masculinities in South Africa Hans Reihling, 2020-04-03
 Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Environmental Toxicity Testing K. Clive Thompson, Kirit Wadhia, Andreas P.

Loibner,2005-03-08 The rapid expansion of the world's population, combined with industrial progress, has made a significant impact on the world's ecosystems. Ecosystems related to the aquatic environment represent the primary concern, but the terrestrial environment is also a major challenge for the foreseeable future, in view of increasing demands on available land resources and the need for remediation and reclamation. This volume provides a working knowledge of monitoring issues for those who commission environmental toxicity tests or are required to use them. It discusses interpretation and application of the results, together with any caveats, and considers recent progress in the development of rapid and novel methods. Ecotoxicity is one of the hottest topics in contaminated land assessment. The volume is directed at industrial chemists, process engineers, analytical chemists, environmental consultants and ecologists - the non-experts who have a direct interest in ecotoxicity, rather than the ecotoxicologists.

The Engagement of Professional Services Barry Butcher,David Coker,1995

Primavera Mark A. Schoedl,2020-12-30 I did not become a serious writer until later in life. I simply could not find my way in the business worlds; so, writing and the visual arts arose from the ashes of despair. John Kouzmanoff, a retired elementary school teacher helped me through the

doldrums of my disparate existence. Over time, he talked about his life and the fears that held him back. Suddenly, I eased up on myself and those dreaded anxieties became less noticeable. John, however, passed away from kidney failure while vacationing in Salt Lake City. This man of 65 who once marched every single time Martin Luther King, Jr. came to Chicago, softly touches my heart whenever nothing seems to go right. Humility and love are all I ever need or to reach out (desire) for that matter. Rest in Peace John.

It shows how this often overlooked theory resolves the weirdness of Quantum Mechanics and the paradoxes of Relativity. The third edition contains a new solution to the measurement problem (the most controversial problem in physics today) and shows the quantum basis for Einstein's famous $E = mc^2$.
