**Animal Wife** Lara Ehrlich, 2020-09-08 In this award-winning debut collection, fifteen magical realism stories portray girls and women searching for an escape from their everyday lives. "In villages where women bore most of the weight of a constricted life, witches flew by night on broomsticks," said Italo Calvino of the way imagination bridges the gap between everyday existence and an idealized alternative . . . The fifteen stories of *Animal Wife* are unified by girls and women who cross this threshold seeking liberation from family responsibilities, from societal expectations, from their own minds. A girl born with feathers undertakes a quest for the mother who abandoned her. An indecisive woman drinks Foresight, only to become stymied by the futures branching before her. A proofreader cultivates a cage-fighting alter ego. A woman becomes psychologically trapped in her car. A girl acts on her desire for a childhood friend as a monster draws closer to the shore. A widow invites a bear to hibernate in her den . . . *Animal Wife* was selected as the winner of the Red Hen Fiction Award by New York Times– bestselling author Ann Hood, who says, "From the first sentence *Animal Wife* grabbed me and never let go. Sensual and intelligent, with gorgeous prose, it made me dizzy with its exploration and illumination of the inner and outer lives of girls and women." Praise for *Animal Wife* "Whimsy and fantasy meet the way things really turn out in stories from a strong new voice." —Kirkus Reviews "Strange, funny, fearsome, *Animal Wife* is a gorgeous book, weird in its very bones." —Elizabeth McCracken, author of *Bowlaway: A Novel* "Lara Ehrlich has written a collection of stories that allow for escapism." —F(r)iction "I was particularly intrigued by the way Lara beautifully portrays the inner struggle between wildness and domesticity, the surreal elements of each story lending a mythical complexity to these conflicts. Really lovely and thought-provoking. Perfect for fans of Aimee Bender, Karen Russell, and Angela Carter." —Joy Baglio, founder of Pioneer Valley Writer's Workshop

*Learning by Doing* James Bessen, 2015-01-01 Technology is constantly changing our world, leading to more efficient production. In the past, technological advancements dramatically increased wages, but during the last three decades, the median wage has remained stagnant. Many of today's machines have taken over the work of humans, destroying old jobs while increasing profits for business owners and raising the possibility of ever-widening economic inequality. Author James Bessen argues that avoiding this fate will require unique policies to develop the knowledge and skills necessary to implement the rapidly evolving technologies. At present this technical knowledge is mostly unstandardized and difficult to acquire, learned through job experience rather than in classrooms. Nor do current labor markets generally provide strong incentives for learning on the job. Basing his analysis on intensive research into economic history as well as today's labor markets, the author explores why the benefits of technology take years, sometimes decades, to emerge. Although the right policies can hasten this process, policy has moved in the wrong direction in recent decades, protecting politically influential interests to the detriment of emerging technologies and broadly shared prosperity.
