The Ghetto in Global History Wendy Z.

Goldman, Joe William Trotter, Jr., 2017-11-27 The Ghetto in Global History explores the stubborn tenacity of 'the ghetto' over time. As a concept, policy, and experience, the ghetto has served to maintain social, religious, and racial hierarchies over the past five centuries. Transnational in scope, this book allows readers to draw thought-provoking comparisons across time and space among ghettos that are not usually studied alongside one another. The volume is structured around four main case studies, covering the first ghettos created for Jews in early modern Europe, the Nazis' use of ghettos, the enclosure of African Americans in segregated areas in the United States, and the extreme segregation of blacks in South Africa. The contributors explore issues of discourse, power, and control; examine the internal structures of authority that prevailed; and document the lived experiences of ghetto inhabitants. By discussing ghettos as both tools of control and as sites of resistance, this book offers an unprecedented and fascinating range of interpretations of the meanings of the ghetto throughout history. It allows us to trace the circulation of the idea and practice over time and across continents, revealing new linkages between widely disparate settings. Geographically and chronologically wide-ranging, The Ghetto in Global History will prove indispensable reading for all those interested in the history of spatial segregation, power dynamics, and racial and religious relations across the globe.

Andreas Jedlitschka, Outi Salo, 2008-06-17 On behalf of the PROFES Organizing Committee, we are proud to present to you the proceedings of the 9th International Conference on Product-Focused Software Process Improvement (PROFES 2008) held in Frascati - Monteporzio Catone, Rome, Italy. Since 1999, PROFES has established itself as one of the recognized international process improvement conferences. The main theme of PROFES is professional software process improvement (SPI) motivated by product and service quality needs. Focussing on a product to be developed, PROFES 2008 addressed both quality engineering and management topics including processes, methods, techniques, tools, organizations, and enabling SPI. Both solutions found in practice and the relevant research results from academia were presented. Domains such as the automotive and

mobile applications industry are growing rapidly, resulting in a strong need for professional development and improvement. Nowadays, the majority of embedded software is developed in collaboration, and distribution of embedded software development continues to increase. Thus, PROFES 2008 addressed different development modes, roles in the value chain, stakeholders' viewpoints, collaborative development, as well as economic and quality aspects. Mobile development was included again as one of the themes. Since the beginning of the series of PROFES conferences, the purpose has been to bring to light the most recent findings and novel results in the area of process improvement, and to stimulate discussion among researchers, experienced professionals, and technology providers from around the world.
