**MacRieve** Kresley Cole,2013-07-02 In this pulse-pounding Immortals After Dark tale, #1 New York Times bestselling author Kresley Cole delves into the darkest mysteries and deepest passions of Clan MacRieve... A BEAST IN TORMENT Uilleam MacRieve believed he'd laid to rest the ghosts of his boyhood. But when a brutal torture revives those ancient agonies and destroys his Lykae instinct, the proud Scot craves the oblivion of death. Until he finds her—a young human so full of spirit and courage that she pulls him back from the brink. A BEAUTY IN CHAINS Seized for the auction block, Chloe Todd is forced to enter a terrifying new world of monsters and lore as a bound slave. When offered up to creatures of the dark, she fears she won't last the night. Until she's claimed by him—a wicked immortal with heartbreaking eyes, whose touch sets her blood on fire. A FULL MOON ON THE RISE With enemies circling, MacRieve spirits Chloe away to the isolated Highland keep of his youth. But once he takes her to his bed, his sensual mate becomes something more than human, evoking his savage past and testing his sanity. On the cusp of the full moon, can he conquer his worst nightmare to save Chloe...from himself?

*Prof. Mule* Darren Johnson,2019-01-21 Adjunct professor Craig Fortran has a problem. He must get a shipment of drugs to an alluring woman his wife doesn't know about. He's doing it for the money ... to help his wife. Because she's sinking, and they're broke, and he loves her. The drug runners call him Prof. Mule. His academic colleagues call him a lightweight. And now the cartel is angry. Prof. Mule is a fantastic caper; a story of love and transformation. Of drugs and tough guys. Of horrible backstabbing professors at a mediocre college. And it's a story about how everyone is pretending, and everyone is corrupt.

**Myocardial Viability** Vasken Dilsizian,2000-02-10 Despite remarkable advances in the understanding and management of impaired left ventricular function (LVF) and related coronary disease, the prevalence of heart failure in the U.S. and the resulting death rates have almost tripled in the past 3 decades. New understanding of the relationships between the myocardium and LVF demonstrate a direct correlation between myocardial viability and improved patient survival. Because of this, myocardial viability is now a major investigative area in contemporary cardiology, one that holds significant clinical and prognostic relevance. Authored by physicians of international renown, the book brings together various disciplines affecting myocardial viability, with five main sections providing an introduction and comprehensive review of: basic concepts and mechanisms; vascular biology and cellular physiology; advances in functional imaging; and perfusion, metabolism and cell membrane integrity. New concepts, such as stunning and hibernation, are clarified, and subsequent novel diagnostic and therapeutic strategies are described. New and sophisticated examination techniques are also presented, as well as advances in instrumentation and imaging techniques, which may result in improved use of resources and enhanced efficiency of health care delivery. This monograph will serve as a reference source for those interested in the field of myocardial viability, and hopefully improve understanding between investigators from various disciplines. Clinical cardiologists, physicians, and nurses in the field, as well as radiologists, vascular surgeons, reperfusionists, cellular biologists and physiologists, and students will all find material of interest in this book.

**Principles and Methods in Landscape Ecology** Almo Farina,2008-01-22 Landscape ecology is an integrative and multi-disciplinary science and Principles and Methods in Landscape Ecology reconciles the geological, botanical, zoological and human perspectives. In particular ,new paradigms and theories such as percolation, metapopulation, hierarchies, source-sink models have been integrated in this last edition with the recent theories on bio-complexity, information and cognitive sciences. Methods for studying landscape ecology are covered including spatial geometry models and remote sensing in order to create confidence toward techniques and approaches that require a high experience and long-time dedication.

Principles and Methods in Landscape Ecology is a textbook useful to present the landscape in a multi-vision perspective for undergraduate and graduate students of biology, ecology, geography, forestry, agronomy, landscape architecture and planning. Sociology, economics, history, archaeology, anthropology, ecological psychology are some sciences that can benefit of the holistic vision offered by this textbook.

Terrestrial Mammal Conservation: Global Evidence for the Effects of Interventions for Terrestrial Mammals Excluding Bats and Primates Nick A. Littlewood, Ricardo Rocha, Rebecca K. Smith, Philip A. Martin, Sarah L. Lockhart, Rebecca F. Schoonover, Elspeth Wilman, Andrew J. Bladon, Katie A. Sainsbury, Stuart Pimm, William J. Sutherland, 2020-11-30 Terrestrial Mammal Conservation provides a thorough summary of the available scientific evidence of what is known, or not known, about the effectiveness of all of the conservation actions for wild terrestrial mammals across the world (excluding bats and primates, which are covered in separate synopses). Actions are organized into categories based on the International Union for Conservation of Nature classifications of direct threats and conservation actions. Over the course of fifteen chapters, the authors consider interventions as wide ranging as creating uncultivated margins around fields, prescribed burning, setting hunting quotas and removing non-native mammals. This book is written in an accessible style and is designed to be an invaluable resource for anyone concerned with the practical conservation of terrestrial mammals. The authors consulted an international group of terrestrial mammal experts and conservationists to produce this synopsis. Funding was provided by the MAVA Foundation, Arcadia and National Geographic Big Cats Initiative. Terrestrial Mammal Conservation is the seventeenth publication in the Conservation Evidence Series, linked to the online resource [www.ConservationEvidence.com](http://www.ConservationEvidence.com). Conservation Evidence Synopses are designed to promote a more evidence-based approach to biodiversity conservation. Others in the series include Bat Conservation, Primate Conservation, Bird Conservation and Forest Conservation and more are in preparation. Expert assessment of the evidence summarised within synopses is provided online and within the annual publication What Works in Conservation.

Real-World Functional Programming Tomas Petricek, Jonathan Skeet, 2009-11-30 Functional programming languages like F#, Erlang, and Scala are attracting attention as an efficient way to handle the new requirements for programming multi-processor and high-availability applications. Microsoft's new F# is a true functional language and C# uses functional language features for LINQ and other recent advances. Real-World Functional Programming is a unique tutorial that explores the functional programming model through the F# and C# languages. The clearly presented ideas and examples teach readers how functional programming differs from other approaches. It explains how ideas look in F# - a functional language - as well as how they can be successfully used to solve programming problems in C#. Readers build on what they know about .NET and learn where a functional approach makes the most sense and how to apply it effectively in those cases. The reader should have a good working knowledge of C#. No prior exposure to F# or functional programming is required. Purchase of the print book comes with an offer of a free PDF, ePub, and Kindle eBook from Manning. Also available is all code from the book.

Tokyo Vice Jake Adelstein, 2009-10-13 NOW A MAX ORIGINAL SERIES. A riveting true-life tale of newspaper noir and Japanese organized crime from an American investigative journalist who pulls the curtain back on ... [an] element of Japanese society that few Westerners ever see (San Francisco Examiner). Jake Adelstein is the only American journalist ever to have been admitted to the insular Tokyo Metropolitan Police Press Club, where for twelve years he covered the dark side of Japan: extortion, murder, human trafficking, fiscal corruption, and of course, the yakuza. But when his final scoop exposed a scandal that reverberated all the way from the neon soaked streets of Tokyo to the polished Halls of the FBI and resulted in a death threat for him and his family, Adelstein decided to step down. Then, he fought back. In Tokyo Vice he delivers an unprecedented look at Japanese culture and searing memoir about his rise from cub reporter to seasoned journalist with a price on his head.

**The Countess Conspiracy** Courtney Milan, 2013-12-17 Sebastian Malheur is the most dangerous sort of rake: an educated one. When he's not

scandalizing ladies in the bedchamber, he's outraging proper society with his scientific theories. He's desired, reviled, acclaimed, and despised—and he laughs through it all. Violet Waterfield, the widowed Countess of Cambury, on the other hand, is entirely respectable, and she'd like to stay that way. But Violet has a secret that is beyond ruinous, one that ties her irrevocably to England's most infamous scoundrel: Sebastian's theories aren't his. They're hers. So when Sebastian threatens to dissolve their years-long conspiracy, she'll do anything to save their partnership...even if it means opening her vulnerable heart to the rake who could destroy it for good. Transforming Agriculture in Southern Africa Richard A. Sikora, Eugene R. Terry, Paul L.G. Vlek, Joyce Chitja, 2019-11-27 This book provides a synthesis of the key issues and challenges facing agriculture and food production in Southern Africa. Southern Africa is facing numerous challenges from diverse issues such as agricultural transformations, growing populations, urbanization and climate change. These challenges place great pressure on food security, agriculture, water availability and other natural resources, as well as impacting biodiversity. Drawing on case studies from Lesotho, Malawi, Mozambique, Namibia, South Africa, Swaziland, Tanzania, Zambia and Zimbabwe, the chapters in this book consider these challenges from an interdisciplinary perspective, covering key areas in constraints to production, the most important building blocks of good farming practices, and established and emerging technologies. This book will be a valuable support for informing new policies and processes aimed at improving food production and security and developing sustainable agriculture in Southern Africa. This informative volume will be key reading for those interested in agricultural science, African studies, rural studies, development studies and sustainability. It will also be a valuable resource for policymakers, governmental and nongovernmental organizations, and agricultural practitioners. **The Food Safety Information Handbook** Cynthia A. Roberts, 2001-07-30 Outbreaks of E. Coli and Salmonella from eating tainted meat or chicken and Mad Cow Disease have consumers and the media focused on food safety-related topics. This handbook aimed at students as well as consumers is an excellent starting point for locating both print and electronic resources with timely information about food safety issues, organizations and associations, and careers in the field.

*The Penguin Book of the Contemporary British Short Story* Philip Hensher, 2019-06-27 'Sometimes - not often - a book comes along that feels like Christmas. Philip Hensher's timely, but timeless, selection of the best short stories from the past 20 years is that kind of book. His introduction is as enriching as anything that has been published this year' Sunday Times A spectacular treasury of the best British short stories published in the last twenty years We are living in a particularly rich period for British short stories. Despite the relative lack of places in which they can be published, the challenge the medium represents has attracted a host of remarkable, subversive, entertaining and innovative writers. Philip Hensher, following the success of his definitive Penguin Book of British Short Stories, has scoured a vast trove of material and chosen thirty great stories for this new volume of works written between 1997 and the present day. Includes short stories by A.L. Kennedy, Tessa Hadley, Kazuo Ishiguro, Jackie Kay, Graham Swift, Jane Gardam, Ali Smith, Neil Gaiman, Martin Amis, China Miéville, Peter Hobbs, Thomas Morris, David Rose, David Szalay, Irvine Welsh, Lucy Caldwell, Rose Tremain, Helen Oyeyemi, Leone Ross, Helen Simpson, Zadie Smith, Will Self, Gerard Woodward, James Kelman, Lucy Wood, Hilary Mantel, Eley Williams, Sarah Hall, Mark Haddon and Helen Dunmore.

*Simplified Signs* John D.. Bonvillian, Nicole Kissane Lee, Tracy T. Dooley, Filip Loncke, Valerie Nelson-Metlay, 2021 Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages. It is the culmination of over twenty years of research and development by the authors. The Simplified Sign System has been developed and tested for ease of sign comprehension, memorization, and formation by limiting the complexity of the motor skills required to form each sign, and by ensuring that each sign visually resembles the meaning it conveys. Volume 1 outlines the research underpinning and informing the project, and places the Simplified Sign System in a wider context of sign usage, historically and by different populations. Volume 2 presents the lexicon of signs, totaling approximately 1000 signs, each with a clear illustration and a written description of how the sign is formed, as well as a memory aid that connects the sign visually to the meaning that it conveys. While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities, cerebral palsy, autism, or aphasia, it may also assist the communication needs of a wider audience - such as healthcare professionals, aid workers, military personnel, travellers or parents, and children who have not yet mastered spoken language. The system also has been shown to enhance learning for individuals studying a foreign language. Lucid and comprehensive, this work constitutes a valuable resource that will enhance the communicative interactions of many different people, and will be of great interest to researchers and educators alike. As with all Open Book publications, this entire book is available to read for free on the publisher's website. Printed and digital editions, together with supplementary digital material, can also be found at [www.openbookpublishers.com](http://www.openbookpublishers.com).
