Automate the Boring Stuff with Python, 2nd Edition Al Sweigart,2019-11-12 Learn how to code while you write programs that effortlessly perform useful feats of automation! The second edition of this international fan favorite includes a brand-new chapter on input validation, Gmail and Google Sheets automations, tips for updating CSV files, and more. If you've ever spent hours renaming files or updating spreadsheet cells, you know how tedious tasks like these can be. But what if you could have your computer do them for you? Automate the Boring Stuff with Python, 2nd Edition teaches even the technically uninclined how to write programs that do in minutes what would take hours to do by hand—no prior coding experience required! This new, fully revised edition of Al Sweigart's bestselling Pythonic classic, Automate the Boring Stuff with Python, covers all the basics of Python 3 while exploring its rich library of modules for performing specific tasks, like scraping data off the Web, filling out forms, renaming files, organizing folders, sending email responses, and merging, splitting, or encrypting PDFs. There's also a brand-new chapter on input validation, tutorials on automating Gmail and Google Sheets, tips on automatically updating CSV files, and other recent feats of automations that improve your efficiency. Detailed, step-by-step instructions walk you through each program, allowing you to create useful tools as you build out your programming skills, and updated practice projects at the end of each chapter challenge you to improve those programs and use your newfound skills to automate similar tasks. Boring tasks no longer have to take to get through—and neither does learning Python!

Digital Cinematography David Stump, ASC,2021-11-19 Today's successful cinematographer must be equal parts artist, technician, and business-person. The cinematographer needs to master the arts of lighting, composition, framing and other aesthetic considerations, as well as the technology of digital cameras, recorders, and workflows, and must know how to choose the right tools (within their budget) to get the job done. David Stump's Digital Cinematography focuses on the tools and technology of the trade, looking at how digital cameras work, the ramifications of choosing one camera versus another, and how those choices help creative cinematographers to tell a story. This book empowers the reader to correctly choose the appropriate camera and workflow for their project from today's incredibly varied options, as well as understand the ins and outs of implementing those options. Veteran ASC cinematographer David Stump has updated this edition with the latest technology for cameras, lenses, and recorders, as well as included a new section on future cinematographic trends. Ideal for advanced cinematography students as well as working professionals looking for a resource to stay on top of the latest trends, this book is a must read.

Survival Guide for Scientists Ad Lagendijk,2008 During the course of Dutch physicist and Spinoza Prize-winner Ad Lagendijk's long and influential career, he has published more than 300 articles, supervised over thirty doctoral dissertations, and given countless presentations and conference addresses. Over the years, his incisive consultations, tips, and rules for scientific study have proven themselves so beneficial to the emerging young scientists under his watch that he has been inundated with requests for a written version. Aimed primarily at undergraduate, graduate, and postdoctoral students in the natural sciences, Survival Guide for Scientists presents Lagendijk's practical how-to advice on essential topics such as the foundations for writing scientific texts, presenting data and research information, and writing and reading collegial e-mails. Each section is organized by a collection of short rules, outlined and numbered in a logical order as self-explanatory pieces of information—allowing the reader the freedom to study any number of them in any desired order. These concrete guidelines are all supplemented by an extensive index that forms a reference text of its own, with easy navigation—securing a place for the Survival Guide for Scientists on the shelves of scientific scholars and students alike.
