Digital and Social Media Marketing Nripendra P. Rana,Emma L. Slade,Ganesh P. Sahu,Hatice Kizgin,Nitish Singh,Bidit Dey,Anabel Gutierrez,Yogesh K. Dwivedi,2019-11-11 This book examines issues and implications of digital and social media marketing for emerging markets. These markets necessitate substantial adaptations of developed theories and approaches employed in the Western world. The book investigates problems specific to emerging markets, while identifying new theoretical constructs and practical applications of digital marketing. It addresses topics such as electronic word of mouth (eWOM), demographic differences in digital marketing, mobile marketing, search engine advertising, among others. A radical increase in both temporal and geographical reach is empowering consumers to exert influence on brands, products, and services. Information and Communication Technologies (ICTs) and digital media are having a significant impact on the way people communicate and fulfil their socio-economic, emotional and material needs. These technologies are also being harnessed by businesses for various purposes including distribution and selling of goods, retailing of consumer services, customer relationship management, and influencing consumer behaviour by employing digital marketing practices. This book considers this, as it examines the practice and research related to digital and social media marketing.

Intellectual Privilege Tom W. Bell,2014-04-14 A consensus has recently emerged among academics and policymakers that US copyright law has fallen out of balance. Lawmakers have responded by taking up proposals to reform the Copyright Act. But how should they proceed? This book offers a new and insightful view of copyright, marking the path toward a world less encumbered by legal restrictions and yet richer in art, music, and other expressive works. Two opposing viewpoints have driven the debate over copyright policy. One side questions copyright for the same reasons it questions all restraints on freedoms of expression, and dismisses copyright, like other forms of property, as a mere plaything of political forces. The opposing side regards copyrights as property rights that deserve—like rights in houses, cars, and other forms of property—the fullest protection of the law. Each of these viewpoints defends important truths. Both fail, however, to capture the

essence of copyright. In *Intellectual Privilege*, Tom W. Bell reveals copyright as a statutory privilege that threatens our natural and constitutional rights. From this fresh perspective come fresh solutions to copyright's problems. Published by the Mercatus Center at George Mason University.

The Challenge of Crime in a Free Society United States. President's Commission on Law Enforcement and Administration of Justice, 1967 This report of the President's Commission on Law Enforcement and Administration of Justice -- established by President Lyndon Johnson on July 23, 1965 -- addresses the causes of crime and delinquency and recommends how to prevent crime and delinquency and improve law enforcement and the administration of criminal justice. In developing its findings and recommendations, the Commission held three national conferences, conducted five national surveys, held hundreds of meetings, and interviewed tens of thousands of individuals. Separate chapters of this report discuss crime in America, juvenile delinquency, the police, the courts, corrections, organized crime, narcotics and drug abuse, drunkenness offenses, gun control, science and technology, and research as an instrument for reform. Significant data were generated by the Commission's National Survey of Criminal Victims, the first of its kind conducted on such a scope. The survey found that not only do Americans experience far more crime than they report to the police, but they talk about crime and the reports of crime engender such fear among citizens that the basic quality of life of many Americans has eroded. The core conclusion of the Commission, however, is that a significant reduction in crime can be achieved if the Commission's recommendations (some 200) are implemented. The recommendations call for a cooperative attack on crime by the Federal Government, the States, the counties, the cities, civic organizations, religious institutions, business groups, and individual citizens. They propose basic changes in the operations of police, schools, prosecutors, employment agencies, defenders, social workers, prisons, housing authorities,

and probation and parole officers.

Let's All Learn How to Fish... To Sustain Long-Term Economic Growth Michael S. Falk, Today's economic growth challenges will become greater in the future because of the world's aging population, fertility trends and current levels, and current entitlement policies. Those challenges could be overcome, however, with thoughtful public policies and a culture that fosters responsibility and appreciation. This book reconsiders what makes us "healthy, wealthy, and wise." It focuses on how we might reimagine health care, retirement, and education policies to usher in a new ERA (from Entitlement to Responsibility with Appreciation) of sustainable long-term economic growth.
