*Shadow Mate* Jen L Grey,2020-12 One little party turned my world upside down. After I challenged the Blood Council's four shifter heirs at a college party, the last thing I expected was to receive a full scholarship and an admittance letter from the exclusive Wolf Moon Academy. Despite never desiring to be an alpha, this was an opportunity of a lifetime... or so I thought. I soon learned that there was more behind my admission to the Academy than my education. I was there to be a lesson to the heirs -- in particular, the sexiest and strongest one, Liam Hale. As if that wasn't bad enough, it turns out that he is my true mate. A fact that should be treasured, but he makes it clear that we will never be together. However, things aren't always what they seem, and we all have secrets- some bigger than others. When the truth comes out it'll either set me free or set me up for disaster. If you can't get enough of books by K.F. Breene, Kelly St. Claire, Annette Marie, Shannon Mayer, Leia Stone, Jaymin Eve, and Laura Thalassa, then you'll love this paranormal romance. *Shiftless* Aimee Easterling,2016-02-20 Terra is shiftless --- a werewolf uncomfortable in her own animal skin. A decade after learning to squash her wolf and flee the repressive village where she grew up, the packless ache still gnaws at Terra's insides. But despite her yearnings, she struggles against being reeled back into her old life. To Terra's dismay, her father and half a dozen of his henchmen finally ambush her and demand her return. Yet they do offer one way out --- hunt down her nephew Keith, teach him to shift, and bring the youngster back into the fold in her place. Problem upon problem piles up as Terra strives to do her father's bidding. The female shifter has hidden from her wolf for so long that she finds herself unable to change back into canine form, and she also realizes that her nephew is too good-natured to survive for a minute walking in his grandfather's footsteps. Plus, there's an alpha standing in her way who's equal parts enticing and terrifying. Will Terra be able to relearn her werewolf abilities --- and overcome her morals --- before her father steals away her hard-earned independence? And as that tantalizing alpha reels her in closer and closer, the question becomes --- does she really want to stay away? Don't miss the first book in a series that has been described as a good choice for Patricia Briggs fans. I apply my Briggs Test (is it on par with Briggs) to these novels. I'm happy to report that Shiftless clearly passes that test. --- The Mysterious Amazon Customer If you are a fan of Patricia Briggs, I think you are going to start collecting Aimee Easterling. --- Chris B. Romantic urban fantasy at its finest --- txdoc This isn't an instant smell and mate type shifter romance.... This is the type of book for someone who enjoys wolf shifters, pack dynamics, a strong female lead, and the ability of that female to move on with her life and mature into who she was meant to be. --- Dan's Wife Exquisite worldbuilding underpins this tale a a young woman coming to grips with her werewolf nature, her self-chosen exile from her pack, and her new relationship with Wolf, the Alpha of another, much less traditional, wolf pack. --- Carla M. If you like urban fantasy, you cannot beat Aimee Easterling --- Inquirer

*American Buffalo* Steven Rinella,2008-12-02 From the host of the Travel Channel's "The Wild Within." A hunt for the American buffalo--an adventurous, fascinating examination of an animal that has haunted the American imagination. In 2005, Steven Rinella won a lottery permit to hunt for a wild buffalo, or American bison, in the Alaskan wilderness. Despite the odds--there's only a 2 percent chance of drawing the permit, and fewer than 20 percent of those hunters are successful--Rinella managed to kill a buffalo on a snow-covered mountainside and then raft the meat back to civilization while being trailed by grizzly bears and suffering from hypothermia. Throughout these adventures, Rinella found himself contemplating his own place among the 14,000 years' worth of buffalo hunters in North America, as well as the buffalo's place in the American experience. At the time of the Revolutionary War, North America was home to approximately 40 million buffalo, the largest herd of big mammals on the planet, but by the mid-1890s only a few hundred remained. Now that the buffalo is on the verge of a dramatic ecological recovery across the West, Americans are faced with the challenge of how, and if, we can dare to share our land with a beast that is the embodiment of the American wilderness. American Buffalo is a narrative tale of Rinella's hunt. But beyond that, it is the story of the many ways in which the buffalo has shaped our national identity. Rinella takes us across the continent in search of the buffalo's past, present, and future: to the Bering Land Bridge, where scientists search for buffalo bones amid artifacts of the New World's earliest human inhabitants; to buffalo jumps where Native Americans once ran buffalo over cliffs by the thousands; to the Detroit Carbon works, a "bone charcoal" plant that made fortunes in the late 1800s by turning millions of tons of buffalo bones into bone meal, black dye, and fine china; and even to an abattoir turned fashion mecca in Manhattan's Meatpacking District, where a depressed buffalo named Black Diamond met his fate after serving as the model for the American nickel. Rinella's erudition and exuberance, combined with his gift for storytelling, make him the perfect guide for a book that combines outdoor adventure with a quirky blend of facts and observations about history, biology, and the natural world. Both a captivating narrative and a book of environmental and historical significance, American Buffalo tells us as much about ourselves as Americans as it does about the creature who perhaps best of all embodies the American ethos.

Reinforcement Learning, second edition Richard S. Sutton,Andrew G. Barto,2018-11-13 The significantly expanded and updated new edition of a widely used text on reinforcement learning, one of the most active research areas in artificial intelligence. Reinforcement learning, one of the most active research areas in artificial intelligence, is a computational approach to learning whereby an agent tries to maximize the total amount of reward it receives while interacting with a complex, uncertain environment. In Reinforcement Learning, Richard Sutton and Andrew Barto provide a clear and simple account of the field's key ideas and algorithms. This second edition has been significantly expanded and updated, presenting new topics and updating coverage of other topics. Like the first edition, this second edition focuses on core online learning algorithms, with the more mathematical material set off in shaded boxes. Part I covers as much of reinforcement learning as possible without going beyond the tabular case for which exact solutions can be found. Many algorithms presented in this part are new to the second edition, including UCB, Expected Sarsa, and Double Learning. Part II extends these ideas to function approximation, with new sections on such topics as artificial neural networks and the Fourier basis, and offers expanded treatment of off-policy learning and policy-gradient methods. Part III has new chapters on reinforcement learning's relationships to psychology and neuroscience, as well as an updated case-studies chapter including AlphaGo and AlphaGo Zero, Atari game playing, and IBM Watson's wagering strategy. The final chapter discusses the future societal impacts of reinforcement learning.

The Girl in Red Christina Henry,2019-06-18 From the national bestselling author of Alice comes a postapocalyptic take on the perennial classic Little Red Riding Hood...about a woman who isn't as defenseless as she seems. It's not safe for anyone alone in the woods. There are predators that come out at night: critters and coyotes, snakes and wolves. But the woman in the red jacket has no choice. Not since the Crisis came, decimated the population, and sent those who survived fleeing into quarantine camps that serve as breeding grounds for death, destruction, and disease. She is just a woman trying not to get killed in a world that doesn't look anything like the one she grew up in, the one that was perfectly sane and normal and boring until three months ago. There are worse threats in the woods than the things that stalk their prey at night. Sometimes, there are men. Men with dark desires, weak wills, and evil intents. Men in uniform with classified information, deadly secrets, and unforgiving orders. And sometimes, just sometimes, there's something worse than all of the horrible people and vicious beasts combined.

Red doesn't like to think of herself as a killer, but she isn't about to let herself get eaten up just because she is a woman alone in the woods....

*Our Principal's in His Underwear!* Stephanie Calmenson,2019-01-08 A unique principal named Mr. Bundy runs PS 88 in this silly, fun-to-read Aladdin QUIX chapter book that's perfect for emerging readers! Mr. Bundy gets a brand-new outfit...but he's the only one in PS 88 that thinks it's spectacular! In this clever twist on The Emperor's New Clothes, acclaimed author Stephanie Calmenson turns a beloved fairy tale on its ear with the silly (mis)adventures of Mr. Bundy!

**The Fourth Industrial Revolution** Klaus Schwab,2017-01-03 World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

*Our Principal Is a Frog!* Stephanie Calmenson,2018-05-08 A uniquely green principal named Mr. Bundy runs PS 88 in this funny fairy tale take-off that launches Aladdin QUIX, a new line of fun-to-read short chapter books that are perfect for emerging readers! When Marty Q. Marvel the magician accidentally turns Mr. Bundy into a frog, the students of PS 88 don't know what to do. It's not always easy having a slimy, green-skinned amphibian for a principal, especially when Mr. Bundy starts playing leapfrog in the gym, swimming in the kindergarten sink, and eating the students' bug collections! Will Mr. Bundy ever be his old self again?

**The Book of Magic** Alice Hoffman,2021-10-12 Master storyteller Alice Hoffman brings us the conclusion of the Practical Magic series in a spellbinding and enchanting final Owens novel brimming with lyric beauty and vivid characters. The Owens family has been cursed in matters of love for over three-hundred years but all of that is about to change. The novel begins in a library, the best place for a story to be conjured, when beloved aunt Jet Owens hears the deathwatch beetle and knows she has only seven days to live. Jet is not the only one in danger—the curse is already at work. A frantic attempt to save a young man's life spurs three generations of the Owens women, and one long-lost brother, to use their unusual gifts to break the curse as they travel from Paris to London to the English countryside where their ancestor Maria Owens first practiced the Unnamed Art. The younger generation discovers secrets that have been hidden from them in matters of both magic and love by Sally, their fiercely protective mother. As Kylie Owens uncovers the truth about who she is and what her own dark powers are, her aunt Franny comes to understand that she is ready to sacrifice everything for her family, and Sally Owens realizes that she is willing to give up everything for love. The Book of Magic is a breathtaking conclusion that celebrates mothers and daughters, sisters and brothers, and anyone who has ever been in love.

**Wolf Rampant Trilogy** Aimee Eaterling,2017-01-07 Meet Terra Wilder, a shiftless shifter uncomfortable in her own animal skin. Throw in a healthy helping of Wolfie Young, a bloodling alpha who's more wolf than man. Mix with a dash of Terra's controlling father and Wolfie's sadistic brother. Then fold in a heaping handful of unconventional outcasts. The result is a unique werewolf world that has been described as a good choice for Patricia Briggs fans. This compilation contains the full text of Shiftless, Pack Princess, and Alpha Ascendant.

**Combinatorial Methods for Chemical and Biological Sensors** Radislav A. Potyrailo,Vladimir M. Mirsky,2009-03-21  
Chemical sensors are in high demand for applications as varied as water pollution detection, medical diagnostics, and battlefield air analysis. Designing the next generation of sensors requires an interdisciplinary approach. The book provides a critical analysis of new opportunities in sensor materials research that have been opened up with the use of combinatorial and high-throughput technologies, with emphasis on experimental techniques. For a view of component selection with a more computational perspective, readers may refer to the complementary volume of Integrated Analytical Systems edited by M. Ryan et al., entitled “Computational Methods for Sensor Material Selection”.
