Communicating Process Architectures 2004 Ian East,J. Martin,P.H. Welch,2004 Communicating Process Architecture (CPA) describes an approach to system development that is process-oriented. It makes no great distinction between hardware and software. It has a major root in the theory of Communicating Sequential Processes (CSP). However, the underlying theory is not limited to CSP. The importance of mobility of both channel and process within a network sees integration with ideas from the δ -calculus. Other formalisms are also exploited, such as BSP and MPI. The focus is on sound methods for the engineering of significant concurrent systems, including those that are distributed (across the Internet or within a single chip) and/or software-scheduled on a single execution unit. Traditionally, at CPA, the emphasis has been on theory and practice - developing and applying tools based upon CSP and related theories to build high-integrity systems of significant size. In particular, interest focuses on achieving scalability and security against error. The development of Java, C, and C++, libraries to facilitate secure concurrent programming using 'mainstream' languages has allowed CPA to continue and proliferate. This work continues in support of the engineering of distributed applications. Recently, there has been greater reference to theory and its more direct application to programming systems and languages. In this volume the formal CSP is very well presented. The papers provide a healthy mixture of the academic and commercial, software and hardware, application and infrastructure, which reflects the nature of the discipline.

OpenVMS AXP Internals and Data Structures Ruth E. Goldenberg,Saro Saravanan,1994 This outstanding new book describes the internals and data structures of the OpenVMS AXP operating system 1.5 in vivid detail. Perhaps the most up-to-date description available for a commercial operating system, OpenVMS AXP Internals and Data Structures is an irreplaceable reference for operating system development engineers, operating system troubleshooting experts, systems programmers, consultants and customer support specialists. This book is essential for those interested in learning how OpenVMS AXP runs on the Alpha AXP family of processors. This information is equally applicable to the internals of any modern-day symmetric multi-processing operating system running on a RISC computer. Provides a detailed treatment of the key architectural features of Alpha AXP systems Explores concepts which are equally applicable to the Alpha AXP family of processors and the internals of any modern-day symmetric multi-processing operating system running on a RISC computer Devotes each of the 39 chapters to explaining its topics in case study format

Yearbook of Pediatric Endocrinology 2010 J.-C. Carel,Z. Hochberg,2010-09-13 The body of knowledge in most medical specialties is rapidly expanding, making it virtually impossible to follow all advances in clinical and basic sciences that are relevant to a given field. This is particularly true in pediatric endocrinology, at the cross-road of pediatrics, endocrinology, development and genetics. Providing abstracts of articles that report the year's breakthrough developments in the basic sciences and evidence-based new knowledge in clinical research and clinical practice that are relevant to the field, the Yearbook of Pediatric Endocrinology 2010 keeps busy clinicians and scientists, pediatric endocrinologists, and also pediatricians and endocrinologists informed on new advances. Twelve Associate Editors and their co-authors selected from several thousand papers those that brought the most meaningful new information, summarized them and provided comments to put them into perspective. The papers are classified into those that identify new genes involved in diseases, new hormones, concepts revised or re-centered, important observations for clinical practice, large-scale clinical trials, new mechanisms, new paradigms, important review articles, new fears and new hopes. Because the Yearbook is endorsed by the European Society for Paediatric Endocrinology (ESPE), its publication is linked to the annual meeting of the ESPE. The Yearbook of Pediatric Endocrinology 2010 covers the medical and scientific literature from June 2009 through May 2010.
