The AUTO UNION-DKW Guide Keith Ayling, 2016-06-17 “Tell me its pedigree and I’ll tell you what kind of car it is!” According to legend, this pungent comment was made by the great Tazio Nuvolari when a manufacturer asked him to drive a new car in the German Grand Prix. West Germany’s Auto Union products—the front-wheel-drive DKW 750 and the larger Auto Union S-1000 series—are direct descendants of the famous Auto Union racing cars that Nuvolari was later to drive to victory in the British and German Grand Prix races, and which literally cleaned up on the racing tracks of Europe before World War II ended peaceful competition between great automobile marques. These were the cars that would do 205 mph, weighed a mere 2,508 pounds, and were constructed with what one writer describes as an “unearthly kind of superior craftsmanship ...” (1961 - Keith Ayling)

Autos and Progress Joel Wolfe,2010-02-16 Autos and Progress reinterprets twentieth-century Brazilian history through automobiles, using them as a window for understanding the nation's struggle for modernity in the face of its massive geographical size, weak central government, and dependence on agricultural exports. Among the topics Wolfe touches upon are the first sports cars and elite consumerism; intellectuals' embrace of cars as the key for transformation and unification of Brazil; Henry Ford's building of a company town in the Brazilian jungle; the creation of a transportation infrastructure; democratization and consumer culture; auto workers and their creation of a national political party; and the economic and environmental impact of autos on Brazil. This focus on Brazilians' fascination with automobiles and their reliance on auto production and consumption as keys to their economic and social transformation, explains how Brazil--which enshrined its belief in science and technology in its national slogan of Order and Progress--has differentiated itself from other Latin American nations. Autos and Progress engages key issues in Brazil around the meaning and role of race in society and also addresses several classic debates in Brazilian studies about the nature of Brazil's great size and diversity and how they shaped state-making.

The Mit International Auto Research Program Vandana Upadhyay,2015-08-05 Excerpt from The Mit International Auto Research Program: A Study of University-Industry Research Partnership The mit auto research program has set the standard for global industry studies. By involving numerous governments, firms, researchers, and stakeholders from all over the world, the program has produced an extensive, systemic body of knowledge that is of great use to the industry. In fact, as a result of the program, more is known about automobile production than about any other industry of comparable size and international importance. The program's research methodology was revolutionary. It bridged the social science and technology disciplines by systemically studying the interaction between technology and people in industry. Thus, the program's broad range, usefulness to the industry, and innovative methodology make it an excellent model for other international research programs.
