Flash of the Cathode Rays Per F Dahl, 1997-01-01 The electron is fundamental to almost all aspects of modern life, controlling the behavior of atoms and how they bind together to form gases, liquids, and solids. *Flash of the Cathode Rays: A History of J.J. Thomson's Electron* presents the compelling story of the discovery of the electron and its role as the first subatomic particle in nature. The book traces the evolution of the concept of electrical charge, from the earliest glow discharge studies to the final cathode ray and oil drop experiments of J.J. Thomson and Robert Millikan. It also provides an overview of the history of modern physics up to the advent of the old quantum theory around 1920. Consolidating scholarly material while incorporating new material discovered by the well-respected author, the book covers the continental and English race for the source of the cathode rays, culminating in Thomson's corpuscle in 1897. It explores the events leading to Millikan's unambiguous isolation of the electron and the simultaneous circumstances surrounding the birth of Ernest Rutherford's nuclear atom and the discovery of radioactivity in 1896. The author also focuses on the controversies over N-rays, Becquerel's positive electron, and the famous Ehrenhaft-Millikan dispute over subelectrons. Scholarly yet accessible to those with basic physics knowledge, this book should be of interest to historians of science, professional scientists and engineers, teachers and students of physics, and general readers interested in the development of modern physics.

10-10-10 Suzy Welch,2009-04-20 Today, the world offers us more options than ever before, but it also forces us to juggle more priorities, to make more choices, and to make them faster. The result: a crisis of doing too much, or not enough, and making our decisions based on impulse, stress or guilt. In 10-10-10 Suzy Welch offers an exciting, effective strategy that will help you make the right decision in any situation, at work or at home; with colleagues, family or friends. The rule is deceptively simple: when faced with a decision, consider what the consequences and outcomes of your various options would be in 10 minutes, 10 months, and 10 years. But the results are extraordinary. Using the framework of 10-10-10 will allow you to think through your decisions and to match them with the expectations and values you hold dearest. Most importantly, it allows you to chart a path in the direction you want, and to head confidently towards it with focus, balance, and joy.
