Scientific Engineering for Distributed Java Applications Nicolas Guelfi,Egidio Astesiano,Gianna Reggio,2003-07-01 FIDJI 2002 was an international forum for researchers and practitioners interested in the advances in, and applications of, software engineering for distributed application development. Concerning the technologies, the workshop focused on "Java-related" technologies. It was an opportunity to present and observe the latest research, results, and ideas in these areas. All papers submitted to this workshop were reviewed by at least two members of the International Program Committee. Acceptance was based primarily on the originality and contribution. We selected for these postworkshop proceedings 16 papers amongst 33 submitted, two tutorials, and two keynotes. FIDJI 2002 was aimed at promoting a scientific approach to software engineering. The scope of the workshop included the following topics: – design of distributed Java applications – Java-related technologies – software and system architecture engineering and development methodologies – development methodologies for UML – development methodologies for reliable distributed systems – component-based development methodologies – management of evolutions/iterations in the analysis, design, implementation, and test phases – dependability support during system lifecycle – managing inconsistencies during application development – atomicity and exception handling in system development – software architectures, frameworks, and design patterns for developing distributed systems – integration of formal techniques in the development process – formal analysis and grounding of modeling notation and techniques (e. g.

Workshop Proceedings of the 11th International Conference on Intelligent Environments D.

Preuveneers,2015-07-06 With emerging trends such as the Internet of Things, sensors and actuators are now deployed and connected everywhere to gather information and solve problems, and such systems are expected to be trustworthy, dependable and reliable under all circumstances. But developing intelligent environments which have a degree of common sense is proving to be exceedingly complicated, and we are probably still more than a decade away from sophisticated networked systems which exhibit human-like thought and intelligent behavior. This book presents the proceedings of four workshops and symposia: the 4th International Workshop on Smart Offices and Other Workplaces (SOOW'15); the 4th International Workshop on the Reliability of Intelligent Environments (WoRIE'15); the Symposium on Future Intelligent Educational Environments and Learning 2015 (SOFIEEE'15); and the 1st Immersive Learning Research Network Conference (iLRN'15). These formed part of the 11th International Conference on Intelligent Environments, held in Prague, Czech Republic, in July 2015, which focused on the development of advanced, reliable intelligent environments, as well as newly emerging and rapidly evolving topics. This overview of and insight into the latest developments of active researchers in the field

will be of interest to all those who follow developments in the world of intelligent environments.

Avatars! Bruce Damer, 1998 With *Avatars!*, readers can grab their avatar (a digital representation of themselves) and run to the nearest virtual world where they can experience the Internet. *Avatars!* focuses on what people do inside virtual worlds, such as building three-dimensional structures, navigating through the worlds, and learning digital etiquette and social interaction skills. A CD-ROM provides readers with ready-to-run worlds that connect them with thousands of other people on the Internet, and which are referenced in a companion Web site.

Intelligent Interactive Multimedia: Systems and Services Toyohide Watanabe, Junzo Watada, Naohisa Takahashi, Robert J. Howlett, Lakhmi C. Jain, 2012-05-20 This volume contains the Proceedings of the 5th International Conference on Intelligent Interactive Multimedia Systems and Services (KES-IIMSS-12). The Conference was jointly organised by Nagoya University in Japan and the KES International organisation, and held in the attractive city of Gifu. The KES-IIMSS conference series, (series chairs Prof. Maria Virvou and Prof. George Tsihrantzis), presents novel research in various areas of intelligent multimedia system relevant to the development of a new generation of interactive, user-centric devices and systems. The aim of the conference is to provide an internationally respected forum for scientific research in the technologies and applications of this new and dynamic research area.

The Formal Education of the Author of Luke-Acts Steve Reece, 2022-06-16 Steve Reece proposes that the author of Luke-Acts was trained as a youth in the primary and secondary Greek educational curriculum typical of the Eastern Mediterranean during the Roman Imperial period, where he gained familiarity with the Classical and Hellenistic authors whose works were the focus of study. He makes a case for Luke's knowledge of these authors internally by spotlighting the density of allusions to them in the narrative of Luke-Acts, and externally by illustrating from contemporary literary, papyrological, and artistic evidence that the works of these authors were indeed widely known in the Eastern Mediterranean at the time of the composition of Luke-Acts, not only in the schools but also among the general public. Reece begins with a thorough examination of the Greek educational system during the Hellenistic and Roman Imperial periods, emphasizing that the educational curriculum was very homogeneous, at least at the primary and secondary levels, and that children growing up anywhere in the Eastern Mediterranean could expect to receive quite similar educations. His close examination of the Greek text of Luke-Acts has turned up echoes, allusions, and quotations of several of the very authors that were most prominently featured in the school curriculum: Homer, Aesop, Euripides, Plato, and Aratus. This reinforces the view that Luke, along with other writers of the New Testament, lived in a cultural milieu that was influenced by Classical and Hellenistic Greek literature and that he was not averse to invoking that literature when it served his theological and literary purposes.

Performance Perspectives Jonathan Pitches, Sita Popat, 2011-10-18 What is 'performance'? What are the boundaries of Performance Studies? How do we talk about contemporary performance practices today in simple but probing terms? What kinds of practices represent the field and how can we interpret them?

Combining the voices of academics, artists, cultural critics and teachers, *Performance Perspectives* answers these questions and provides a critical introduction to Performance Studies. Presenting an accessible way into key terminology and context, it offers a new model for analyzing contemporary performance based on six frames or perspectives: - Body - Space - Time - Technology - Interactivity - Organization Drawing on examples from a wide range of practices across site specific performance, virtual reality, dance, applied theatre and everyday performance, *Performance Perspectives* addresses the binary of theory and practice and highlights the many meeting points between studio and seminar room. Each chapter takes the innovative form of a three-way conversation, bringing together theoretical introductions with artist interviews and practitioner statements. The book is supported by activities for discussion and practical devising work, as well as clear guidance for further reading and an extensive reference list across media *Performance Perspectives* is essential reading for anyone studying, interpreting or making performance.

Mahatma I & II Brian Grattan,1994-01-01 What all of humankind has learned in the past about creation is the way that existence isn't -- a paradox! I, Vywamus, think that this (Mahatma) is the most important thing that's happened on your Earth and for humanity. Awaken and realize that all of humankind will create a body for ascension, whether this is accomplished now or later. This is not the exclusive domain of Christ or Buddha or many others who have ascended -- this is your birthright. You are not relegated to worshipping those who have already done this very basic initiation called ascension. Christ and Buddha would be the first to acknowledge that they are just beginners on their eternal journeys. When humans lift the veils of their unworthiness and recognize that they are the sons of God, that there is divine equality and no one is greater than another, then you will have begun your journey in the way that it was intended. In your near future, your Planetary Hierarchy will release the world from theology, ecclesiasticism, and the wrathful Jehovah and return humanity to its rightful journey into spiritualizing matter, not worshipping it! The Mahatma is for those who are motivated to search for the answers that can respond to their mental and spiritual bodies. In the past, humankind's choices of beliefs and religions have supported only the emotional body and the darker, material side of life. And truly, if humankind is going to remain on Earth, very drastic shifts of consciousness will be required in Earth's new four-dimensional reality. No matter how contrary to your current beliefs, this book contains methods for creating your spiritual lightbody for ascension, and it also explains your eternal journey in a way that was never before available to humankind.
