Scholarly Information Discovery in the Networked Academic Learning Environment LiLi

Li, 2014-09-10 In the dynamic and interactive academic learning environment, students are required to have qualified information literacy competencies while critically reviewing print and electronic information. However, many undergraduates encounter difficulties in searching peer-reviewed information resources. *Scholarly Information Discovery in the Networked Academic Learning Environment* is a practical guide for students determined to improve their academic performance and career development in the digital age. Also written with academic instructors and librarians in mind who need to show their students how to access and search academic information resources and services, the book serves as a reference to promote information literacy instructions. This title consists of four parts, with chapters on the search for online and printed information via current academic information resources and services: part one examines understanding information and information literacy; part two looks at academic information delivery in the networked world; part three covers searching for information in the academic learning environment; and part four discusses searching and

utilizing needed information in the future in order to be more successful beyond the academic world. Provides a reference guide for motivated students who want to improve their academic performance and career development in the digital age Lays out a roadmap for searching peer-reviewed scholarly information in dynamic and interactive academic learning environments Explains how to access and utilize academic information ethically, legally, and safely in public-accessed computing environments Provides brainstorming and discussion, case studies, mini-tests, and real-world examples for instructors and students to promote skills in critical thinking, decision making, and problem solving

FREE ANTIVIRUS AND ITS MARKET IMPLEMENTATION Yang Yiming, Andreas Clementi, Peter Stelzhammer, 2014-10-16 The study analyzed the business model of two selected Chinese AV-vendors, Qihoo 360 and Baidu, from the perspective of their product development model, revenue model, marketing and distribution, and services and implementation. Furthermore, market research was conducted to compare the Chinese and Western users in order to investigate the influential factors on users' choice of security software. This study was initiated for the purpose of investigating the business model which supports Chinese "free" AV-vendors to offer free fully-functional security software.

Windows Lockdown! Andy Walker, 2008-07-28 Today, if you own a Windows computer you need to understand the risks and the potential damage security threats pose. The mere act of turning on an Internet-connected computer can put you, your family, and even your personal finances at risk! This book defines all the threats an average household might face and provides strategies to turn novice and basic users into adept home security experts, making you safer and more secure from cyber criminals. We start off with plain English definitions for security mumbo jumbo, and then we dig in with step-by-step instructions to help you cut your exposure in less than 10 minutes! Finally, we provide steps for more involved security measures that you can do in a weekend. We also take an in-depth look at the security measures Microsoft put in Windows Vista. We also look at how Vista responds to the key threats. It teaches you how to tweak the system and make Microsoft's new security features--like the User Access Control--less annoying and helps you adjust the system to be usable. It shows you how to set up Vista to protect your system from your kids--the biggest security hazard to

your computer. • More than 5 million spam emails flood the Internet daily—many with your name on them—we show you how to make yourself invisible to detestable spammers! • Did you know that hackers are snooping around your IP address right now, while you read this? They might already have breached what security you have and could be running amok with your personal data. Stop them dead in their tracks with a few simple steps! • Identity theft is the most popular form of consumer fraud today, and last year thieves stole more than \$100 million from people just like you. Put a stop to the madness with the steps provided in this book! • Spyware—nasty little programs that you might not even know you have installed on your PC—could be causing your PC to crash. We show you how to root it out of your system and prevent further infection. Andy Walker is one of North America's top technology journalists and is the author of Que's Absolute Beginner's Guide to Security, Spam, Spyware & Viruses and Microsoft Windows Vista Help Desk. Since 1995, he has written about personal computer technology for dozens of newspapers, magazines, and websites. Today, his columns (and hundreds more technology how-to articles) are published at Cyberwalker.com where more than 5 million unique visitors read the advice annually. Andy co-hosted the internationally syndicated TV show Call for Help with Leo Laporte. Alongside his ongoing TV guest appearances, he also hosts the popular tech video podcast Lab Rats at LabRats.tv.

ICT Systems Support Level 2 Andrew Smith, Jenny Lawson, Monique Heery, 2004-07 This book provides exactly what students need to complete their chosen route in the new e-Equals IT Practitioner qualifications from City & Guilds at Level 2.
